Mia's Food Truck Challenge

Name: _____ Date: _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

Mia's Morning Prep

It's early Saturday morning, and Mia's about to load the truck for the biggest day of her life. Before you meet her, warm up on the exact skills and words she'll need today.

1 Match each word to its meaning. Draw a line, or write the matching letter next to each word.

___ **factor**	**A.** What's left after subtracting expenses from revenue
___ **product**	**B.** One of the numbers being multiplied
___ **estimate**	**C.** Money spent to run a business
___ **revenue**	**D.** A quick, smart guess made by rounding first
___ **expense**	**E.** The answer when you multiply
___ **profit**	**F.** Total money earned from sales, before costs

2 Today's lesson opens with this real number: 1,209,647. Before you find out what it counts, what is the VALUE of the digit 2 in that number?

3 Preview the Area Model: break 12 × 13 apart by place value (12 = 10+2, and 13 = 10+3), find all four smaller products, then add them. Show every step — you'll use this exact method later in the lesson, just with bigger numbers.

4 Have you ever helped run a lunch stand, bake sale, or lemonade stand? Write 1-2 sentences about it.

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Mia's Victory Lap

The line is finally gone. Mia's uncle hands her his notebook and grins: "You saved the day — now let's see the whole story in numbers." Help her close out the biggest day her truck has ever had.

1 The festival's FINAL official count came in at 1,847,203 visitors — even bigger than the morning headline! What is the value of the digit 4 in that number?

2 Next year, Mia wants to be ready from the start. She's planning to prep for 38 hours of service at 27 tacos per hour. Use the area model to find her new prep total — draw your own grid and label every box.

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON · CONTINUED

Mia's Victory Lap

3 Counting the afternoon rush, Mia's TOTAL revenue for the whole day was $4,216. Her total expenses — ingredients, gas, AND extra supplies for the afternoon rush — came to $1,589. What was her final PROFIT for the day? Show every step.

4 Mia's uncle says: "If we'd run out completely and closed two hours early, we'd have lost about 130 customers at $4 each." How much money would that have cost them? Then explain in one sentence why checking the numbers early (like Mia did) mattered.

_____

_____

_____

_____

★ **Challenge:** You're Mia's business partner now! Write your own word problem about NEXT year's festival — using "revenue," "expense," and "profit" — then solve it. Make it as big and exciting as you want.

Looking Ahead: Next week, you'll meet Zoe, who's in charge of her little brother Milo for the afternoon — and she'll need division to keep everything fair. Bring this sheet back to your next lesson!

KCE PATHWAYS · GRADES 4–5 · UNIT 1: FIRST STEPS · WEEK 1 · READING

The Line Around the Block

Name: _____ Date: _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

Before the Line Forms

It's early Saturday morning — Mia has no idea what's about to happen at the festival. Before you read her story, warm up your reading brain — and your handwriting — on the exact skills you'll use today.

1 Match each word to its meaning. Write the matching letter next to each word.

___ **conflict**	**A.** Specific details from the text that support an answer
___ **resolution**	**B.** The main problem a character faces
___ **infer**	**C.** The deeper lesson or message a story teaches
___ **perspective**	**D.** Figure something out using clues, not stated directly
___ **theme**	**E.** How the main problem finally gets solved
___ **evidence**	**F.** The particular way one character sees or feels about events

2 Inference Warm-Up: Read this sentence: "Jordan's fists clenched as the referee raised the other boxer's hand." What can you INFER about how Jordan feels, even though the sentence never says a feeling word? Write your answer in a full sentence.

3 Handwriting Focus: Copy this sentence in your best cursive or print: "The busiest day can turn into the biggest lesson."

4 Have you ever had to think fast when something didn't go as planned? Write 2-3 sentences about it. Use your neatest handwriting.

The Line Around the Block

Name: _____ Date: _____

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

The Sun Sets on Fifth Street

The line is gone, the sun is low, and Mia's arms ache from a whole day of serving. Now show what you learned about conflict, inference, and theme — with your very best handwriting.

1. In 3-4 sentences, retell Mia's conflict and how it was resolved. Use complete sentences and your neatest handwriting.

2. Find ONE sentence from the story that shows a character's feelings WITHOUT stating the feeling directly (an inference clue). Copy it exactly, word for word, in your best handwriting.

3. In your own words, write what this story's THEME is. Write in full sentences.

★ **Challenge:** Write your OWN 4-5 sentence story about a character solving a problem. Include a conflict AND a resolution. Use your best cursive or print — this is a handwriting sample, so take your time!

Handwriting Check: Before turning this in, look back over everything you wrote today. Are your letters sitting on the lines? Are your capital letters and periods where they should be?

Looking Ahead: Next week we'll read one afternoon told from two sides — Zoe's and her little brother Milo's. Bring this sheet back to your next lesson!

KCE PATHWAYS · GRADES 4-5 · UNIT 1: FIRST STEPS · WEEK 1 · SCIENCE

Thinking Like a Scientist

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

What Do I Already Know?

Answer before the lesson. It is OK to guess!

1. What does a scientist do to find out if something is true? Write two things.

2. Prediction: Will a toy car roll farther from a high ramp or a low ramp? Why do you think so?

3. Draw a simple test you could do at home. Label what you would change and what you would measure.

4. Write one question about the world that you wonder about. How could you test it?

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Show What I Learned

Use the new vocabulary and evidence from the lesson.

1. Name the three kinds of variables and tell what each one means.

2. Look at your ramp prediction on Page 1. Use the lab data (10 cm ramp: 50 cm, 20 cm: 100 cm, 30 cm: 150 cm) to say whether it was supported.

3. Spot the unfair test: Sam compares two paper towels, but he pours more water on one of them. What is wrong, and how would you fix it?

4. Chien-Shiung Wu tested a “law” that everyone believed. Why is it important to test ideas that “everyone knows”?

★ **Challenge:** Design a fair test for this question: Does water temperature change how fast sugar dissolves? Name your independent variable, your dependent variable and two controlled variables.

Looking Ahead: Next week: Ecosystems and Food Webs. Bring a question: What would happen to a forest if all the rabbits disappeared?

KCE PATHWAYS · GRADES 4-5 · UNIT 1: FIRST STEPS · WEEK 1 · SOCIAL STUDIES

How Do We Know About the Past?

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

What Do I Already Know About the Past?

Answer what you can. There are no wrong guesses on this page!

1. Name two ways people today can learn about something that happened 100 years ago.

2. Predict: What could an old clay pot found in the ground tell us about the people who used it?

3. Draw one object from your home that might help a historian 200 years from now learn about your life. Label it.

4. Circle one: A diary from 1850 is a **primary** / **secondary** source. Why do you think so?

5. What is one question you wonder about the past?

KCE PATHWAYS · GRADES 4-5 · UNIT 1: FIRST STEPS · WEEK 1 · SOCIAL STUDIES

How Do We Know About the Past?

Name: _____ **Date:** _____

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Show What I Learned

Use evidence from the lesson in your answers.

1. Explain the difference between a primary source and a secondary source. Give one example of each.

2. How do wampum belts and oral history help the Haudenosaunee keep their history?

3. Frederick Douglass could not see his own birth record. Whose voice was missing from that record, and why does it matter?

4. Why did Carter G. Woodson start Negro History Week in 1926?

★ **Challenge:** Pick an event from your own family's history. List two different sources you could use to corroborate it (for example, a photo and a relative's memory).

Looking Ahead: Next week we travel back before 1492 to a great city near the Mississippi River, towns built into cliffs, and a nation that made a Great Law of Peace. Bring this question: How do we know about people who lived 1,000 years ago?
