KCE PATHWAYS · GRADES 4-5 · UNIT 1: FIRST STEPS · FLORIDA FOCUS · SCIENCE

Florida Ecosystems: River of Grass, Mangroves and Reefs

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

Page 1 (Pre): What I Already Know

Do this before the lesson. Guessing is OK!

1. What do you already know about the Everglades, mangroves or coral reefs? Write at least two things.

2. Prediction: Heavy rain fills Lake Okeechobee. Where do you think that water goes next, and how fast does it move?

3. Draw a food chain you think could live in a Florida wetland. Label the producer and the consumers.

4. What is one question you wonder about Florida's wild places?

Florida Ecosystems: River of Grass, Mangroves and Reefs

Name: _____ **Date:** _____

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Page 2 (Post): What I Learned

Do this after the lesson. Use evidence and your own words.

1. Explain sheet flow in your own words. Why does Everglades water move so slowly?

2. Draw and label an Everglades food web with at least one producer, two consumers and one decomposer.

3. Use the wading bird data: what happened to nests in years with heavy dry-season rain? Give numbers as evidence.

4. Cause and effect: if the mangroves along a coast are cut down, what could happen to young fish and to nearby homes?

★ **Challenge:** Design a fair test: How could you test whether mangrove roots slow down waves? Name what you would change, what you would measure, and what you would keep the same.

Looking Ahead: Unit 2 explores how wind, water and weather shape the land. Bring this question: How might a hurricane's storm surge change a Florida shoreline?

Florida's First Nations

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

What Do I Already Know?

Answer what you can. Guessing is fine; this is just to find out what you already know.

1. Name any Indigenous nation you know of that lived in Florida, long ago or today.

2. Prediction: People in south Florida long ago lived near the ocean. How do you think they got most of their food?

3. Draw an outline of Florida. Mark where you think people lived long ago, and label one place.

4. What is one question you have about how we can learn about people who did not write books?

5. Why might a story written by a visitor be different from the story the people would tell about themselves?

Florida's First Nations

Name: _____ **Date:** _____

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Show What You Learned

Use evidence from the lesson in your answers.

1. Match each nation to its homeland in a sentence or two: Calusa, Timucua, Apalachee, Tequesta.

2. Compare: How was the Calusa way of getting food different from the Apalachee way? Give a reason.

3. Name one piece of archaeological evidence and one Spanish record from the lesson. Which point of view is missing from both?

4. Cause and effect: Give two causes for why most of Florida's original nations were gone by the 1700s.

★ **Challenge:** Who benefited and who paid the cost when Spain and England came to Florida? Explain in two or three sentences, and name one nation that still lives in Florida today.

Looking Ahead: Next Florida Focus lesson: Spanish Florida, St. Augustine and Fort Mose, a free Black town. Bring this question: How could a Spanish colony also become a place where people escaping slavery sought freedom?
