KCE PATHWAYS · GRADE 3 · UNIT 4: PARTS AND PIECES · WEEK 20 · CHECKPOINT

Checkpoint 4 — Parts and Pieces Review — Teacher Lesson Plan & Answer Key

Learning objectives: Students show mastery of the Unit 4 math skills (fractions of a whole and of a group; number lines and equivalent fractions; comparing fractions; time, liquid volume and mass) and reading skills (context clues; the parts of a poem; fact and opinion; reading a play), including two-step problems, "which explanation is correct?" reasoning and "find the mistake" items.

Duration: 35–45 minutes
Materials: Computer or tablet with the lesson open · pencil · printed Checkpoint Pre & Post sheet

Lesson flow (as it appears on screen)

1. Title and name: the student types first and last name so results go to KingCretot Experience. Read the Pathway Points rules together: 2 tries per question, points only for a correct first try, and the answer and reason appear after a second miss.
2. Warm-Up: A Quick Unit 4 Mix (6 pts, 3 each): one math item and one reading item from across the unit.
3. Picture It: The Unit 4 Patchwork Quilt. Theo and Mia sew a travel quilt with 8 equal patches, one for each Unit 4 lesson (Russo's Pizza Kitchen, the Vermont maple farm, Clover Creek Dairy, the Rockport harbor poems, Gee's Bend, Market Square, the Balloon Fiesta and the Tucson radio play). Ask the student to name one skill from each patch.
4. Vocabulary Round-Up: 8 flip cards from across the unit (fraction, denominator, equivalent fractions, elapsed time, context clues, simile, opinion, stage directions). Have the student say each meaning before flipping.
5. Pencil Break (Pre): the student opens or prints the Checkpoint Pre/Post sheet (grade3/prepost/KCE_Checkpoint_PrePost_G3W20.pdf) and completes Page 1 (Pre) before the review. Do not help yet; it shows what they remember.
6. Math Review: Fractions of a Whole and of a Group (Week 16, 6 pts). Tip: count all the equal parts or all the items first for the denominator.
7. Math Review: Number Lines and Equivalent Fractions (Week 17, 6 pts). Tip: count the equal spaces, not the tick marks.
8. Math Review: Comparing Fractions (Week 18, 6 pts). Tip: same denominator, compare numerators; same numerator, compare piece size.
9. Math Review: Time, Liquid Volume, and Mass (Week 19, 6 pts). Tip: count by fives, then by ones; for two-step problems, say step 1 aloud.
10. Reading Review: Context Clues (Week 16, 6 pts): a short maple-farm text in each set. Ask: which signal word points to the clue?
11. Reading Review: The Parts of a Poem (Week 17, 6 pts): a short harbor poem in each set (stanzas, rhyme, simile, sensory words).
12. Reading Review: Fact and Opinion (Week 18, 6 pts). Tip: use the Prove It Test and look for signal words; split mixed sentences.

13. Reading Review: Reading a Play (Week 19, 6 pts): a short script in each set. Remind: the name before the colon speaks; stage directions are acted, not said.
14. Match-Up Round (10 pts, 2 per first-try match): Set 1 matches fractions, times and liters to answers; Sets 2 and 3 match Unit 4 vocabulary to meanings.
15. Fix the Sentence (8 pts, 4 each): typed answers are checked exactly (capital letters, names, end mark, list commas); curly quotes and extra spaces are forgiven. Both serial-comma and no-serial-comma list forms are accepted.
16. Type-It Corral (8 pts, 4 each): one typed math answer and one typed reading word. Capital letters do not matter; spelling does.
17. Speed Arena and Keyboard Corral (XP only, not scored).
18. Boss Battle, Part 1: The Patchwork Fair (10 pts, 5 each): a flyer per set (the fair, the play, or the cocoa stand), then a reading item about the flyer and a two-step math item.
19. Boss Battle, Part 2: The Last Patch (10 pts, 5 each): a fraction of the quilt patches and a find-the-mistake item.
20. Pencil Break (Post): the student turns to Page 2 (Post) of the Checkpoint sheet (grade3/prepost/KCE_Checkpoint_PrePost_G3W20.pdf) and completes it, plus the ★ Challenge if time allows, before seeing the score.
21. Results (Checkpoint 4 Complete!): the score out of 100 is sent to KingCretot Experience. 85 or higher shows “Unit 4 Champion!” with the congratulations message “Unit 4 complete! You mastered Parts and Pieces!” and a big confetti burst; below 85 shows “Great Effort Today!” with encouragement (“Every quilt is sewn one patch at a time.”), and the next attempt brings a fresh question set (sets rotate 1, 2, 3). Both messages remind the student to finish the Post-Lesson Challenge sheet.

Lesson answer key with reasoning

Every scored item the student sees, in order, across all three rotating question sets. Each item allows 2 tries and earns Pathway Points only on a correct first try. The "why" is the same reasoning shown on screen after a second missed try.

WARM-UP: A QUICK UNIT 4 MIX (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
w1_s0	Set 1: Hana cuts a pizza into 6 equal slices. Owen eats 1 slice. What fraction of the pizza did Owen eat? Type it like 1/2.	**1/6** (also accepted: 1 / 6, one sixth, one-sixth, 1 sixth, a sixth)	The pizza has 6 equal slices (the denominator), and Owen ate 1 of them (the numerator): 1/6. It is a unit fraction, because it names just one equal part.
w2_s0	Set 1: Which word names a group of lines in a poem? [a stanza / a rhyme / dialogue / a caption]	**a stanza**	A stanza is a group of lines. You can spot one because there is a space before the next stanza starts.
w1_s1	Set 2: Fill in the numerator. 1 =?/4. How many fourths make 1 whole?	**4** (also accepted: four, 4/4, 4 fourths, four fourths)	A whole cut into 4 equal parts has 4 fourths, so 1 = 4/4. When the numerator and denominator match, the fraction is 1 whole.
w2_s1	Set 2: Which sentence is an OPINION? [Tacos are the best food in the whole world. / The market opens at 10:00 in the morning. / The shop sold 25 paper flowers. / San Antonio is a city in Texas.]	**Tacos are the best food in the whole world.**	Best is a feeling word, and people could disagree. The other sentences can be proved by checking a clock, counting, or looking at a map.
w1_s2	Set 3: The hour hand is just past the 6. The minute hand points right at the 3. What time is it? Type it like 7:48.	**6:15** (also accepted: 6:15 a.m., 6:15 p.m., 6:15 am, 6:15 pm, 6:15am, 6:15pm)	The hour hand has passed the 6, so the hour is 6. Count by fives to the 3: 5, 10, 15. It is 6:15.

ID	Question	Answer	Why (explain to student)
w2_s2	Set 3: In a play, what do we call the notes in parentheses that tell actors how to move or sound? [stage directions / dialogue / the cast / a stanza]	**stage directions**	Stage directions are written inside parentheses. Actors act them out. They do not say them.

MATH REVIEW: FRACTIONS OF A WHOLE AND OF A GROUP (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
m16a_s0	Set 1: Two steps! Darius has a box of 8 garlic knots. He gives 3 knots to Hana and 2 knots to Owen. What fraction of the garlic knots is still in the box? Type it like 3/4.	**3/8** (also accepted: 3 / 8, three eighths, three-eighths, 3 eighths, 3 out of 8)	Step 1: 3 + 2 = 5 knots are given away. Step 2: 8 − 5 = 3 knots are left, so 3/8 of the knots are still in the box.
m16b_s0	Set 1: Which explanation is correct? A square pizza has 6 equal parts, and 4 parts have peppers. Owen says the peppers cover 4/2 of the pizza. Hana says the peppers cover 4/6. [Hana is correct. The denominator counts all 6 equal parts. / Owen is correct. Count the parts with peppers and the parts without. / They are both correct. / Neither is correct. The peppers cover 2/6.]	**Hana is correct. The denominator counts all 6 equal parts.**	The denominator counts ALL the equal parts, with and without peppers: 6. The numerator counts the pepper parts: 4. So the peppers cover 4/6.
m16a_s1	Set 2: Two steps! Mr. Russo cuts a pan pizza into 4 equal rows. Then he cuts each row into 2 equal pieces. What do we call each piece? Type the name of the parts, like halves or thirds.	**eighths** (also accepted: eighth, 8ths, one eighth, 1/8, an eighth, 8 eighths, eight eighths)	Step 1: 4 rows × 2 pieces = 8 equal parts. Step 2: 8 equal parts are called eighths.
m16b_s1	Set 2: Which explanation is correct? Why is 1/6 a unit fraction? [It names just one equal part, so its numerator is 1. / It has a 6 on the bottom. / It is more than one whole. / Unit fractions always have a big denominator.]	**It names just one equal part, so its numerator is 1.**	A unit fraction names just one equal part, so the top number is 1. 1/6 is one of 6 equal parts.
m16a_s2	Set 3: Two steps! A topping tray holds 8 peppers. 2 are red, 1 is yellow, and the rest are green. What fraction of the peppers are green? Type it like 3/4.	**5/8** (also accepted: 5 / 8, five eighths, five-eighths, 5 eighths, 5 out of 8)	Step 1: 2 + 1 = 3 peppers are red or yellow. Step 2: 8 − 3 = 5 green peppers, so 5/8 of the peppers are green.
m16b_s2	Set 3: Find the mistake. Owen has 4 peppers: 3 red and 1 green. He says 3/1 of the peppers are red, because he compared the red peppers to the green one. What went wrong? [The whole group is 4 peppers, so 3/4 of the peppers are red. / Nothing is wrong. 3/1 of the peppers are red. / 1/4 of the peppers are red. / 3/3 of the peppers are red.]	**The whole group is 4 peppers, so 3/4 of the peppers are red.**	For a group, the denominator is the number of things in the WHOLE group: 4 peppers. 3 of the 4 are red, so 3/4 are red.

MATH REVIEW: NUMBER LINES AND EQUIVALENT FRACTIONS (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
m17a_s0	Set 1: What fraction names point P? Type it like 1/2.	**3/8** (also accepted: 3 / 8, three eighths, three-eighths, 3 eighths, 3/8 mile, 3/8 of a mile)	The line from 0 to 1 has 8 equal spaces, so each jump is 1/8. Point P is 3 jumps from 0: 3/8.

ID	Question	Answer	Why (explain to student)
m17b_s0	Set 1: Find the mistake. Zuri looks at a number line from 0 to 1 with 7 tick marks at equal spaces. She says each part is 1/7. What went wrong? [She counted tick marks. There are only 6 equal spaces, so each part is 1/6. / Nothing is wrong. Each part is 1/7. / Each part is 1/8. / Each part is 7 miles long.]	**She counted tick marks. There are only 6 equal spaces, so each part is 1/6.**	Count the spaces, not the tick marks. 7 tick marks make only 6 equal spaces, so each part is 1/6.
m17a_s1	Set 2: What fraction names point C? Count every jump from 0. Type it like 1/2.	**7/4** (also accepted: 7 / 4, seven fourths, seven-fourths, 7 fourths, 7/4 mile, 7/4 miles)	Each whole has 4 equal spaces, so each jump is 1/4. Point C is 7 jumps from 0, so it is at 7/4, three fourths past 1.
m17b_s1	Set 2: Which explanation is correct? Tomas says 2/4 and 1/2 are equivalent fractions. [He is right. They land on the same point, halfway from 0 to 1. / He is wrong, because 2 and 4 are bigger numbers. / He is wrong, because 2/4 has more pieces, so it is more. / He is right, because both fractions have a 2 in them.]	**He is right. They land on the same point, halfway from 0 to 1.**	Equivalent fractions land on the same point. 2/4 and 1/2 are both halfway between 0 and 1.
m17a_s2	Set 3: Two steps! Zuri has 1/4 of a cheese block. Tomas has a same-size block cut into 8 equal pieces. How many eighths must Tomas take to have the same amount as Zuri?	**2** (also accepted: two, 2/8, 2 eighths, 2 pieces, two eighths)	Step 1: Each fourth splits into 2 eighths. Step 2: 1 fourth is 1 × 2 = 2 eighths, so 1/4 = 2/8. Tomas takes 2 pieces.
m17b_s2	Set 3: On a number line cut into sixths, which fraction lands on the same point as 1 whole? [6/6 / 1/6 / 5/6 / 7/6]	**6/6**	Six jumps of 1/6 cover the whole space from 0 to 1, so 6/6 = 1. 7/6 is one sixth past 1.

MATH REVIEW: COMPARING FRACTIONS (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
m18a_s0	Set 1: Type <, >, or = to compare the fractions. 3/4 ___ 3/6	**>** (also accepted: is greater than, greater than)	Both fractions have 3 pieces. Fourths are bigger pieces than sixths, so 3/4 > 3/6.
m18b_s0	Set 1: Two steps! Tasha and Calvin each have a same-size ribbon cut into 6 equal parts. Tasha uses 1 part. Calvin uses 4 parts. Who has more ribbon left? [Tasha, with 5/6 left / Calvin, with 4/6 left / Calvin, with 2/6 left / Tasha, with 1/6 left]	**Tasha, with 5/6 left**	Step 1: Tasha has 6 − 1 = 5 parts left, 5/6. Calvin has 6 − 4 = 2 parts left, 2/6. Step 2: 5/6 > 2/6, so Tasha has more left.
m18a_s1	Set 2: Type <, >, or = to compare the fractions. 2/8 ___ 2/3	**<** (also accepted: is less than, less than)	Both fractions have 2 pieces. Eighths are smaller pieces than thirds, so 2/8 < 2/3.
m18b_s1	Set 2: Find the mistake. Ruthie says 1/8 > 1/4, because 8 is bigger than 4. What went wrong? [A whole cut into 8 parts has smaller pieces, so 1/8 < 1/4. / Nothing is wrong. 1/8 > 1/4. / They are equal, because both have a 1 on top. / You can never compare unit fractions.]	**A whole cut into 8 parts has smaller pieces, so 1/8 < 1/4.**	The more equal parts a whole is cut into, the smaller each part is. Eighths are smaller than fourths, so 1/8 < 1/4.
m18a_s2	Set 3: Put these in order from least to greatest: 5/6, 2/6, 4/6. Type the fraction that goes in the middle.	**4/6** (also accepted: 4 / 6, four sixths, four-sixths, 4 sixths)	All three are sixths, so compare the numerators: 2 < 4 < 5. The order is 2/6, 4/6, 5/6, and 4/6 is in the middle.

ID	Question	Answer	Why (explain to student)
m18b_s2	Set 3: Which explanation is correct? Calvin walked 3/4 of the path to the river. Ruthie walked 3/8 of the same path. Who walked farther? [Calvin, because both walked 3 parts and fourths of the path are longer than eighths. / Ruthie, because 8 is greater than 4. / They walked the same distance, because both walked 3 parts. / Ruthie, because eighths of the path are longer than fourths.]	**Calvin, because both walked 3 parts and fourths of the path are longer than eighths.**	It is the same path, so the wholes match. Both walked 3 parts, and fourths are longer than eighths. 3/4 > 3/8, so Calvin walked farther.

MATH REVIEW: TIME, LIQUID VOLUME, AND MASS (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
m19a_s0	Set 1: What time does the crew tent clock show? Type it like 7:48.	**9:41** (also accepted: 9:41 a.m., 9:41 p.m., 9:41 am, 9:41 pm, 9:41am, 9:41pm)	The hour hand has passed the 9, so the hour is 9. The minute hand is 1 mark past the 8: 40 + 1 = 41. It is 9:41.
m19b_s0	Set 1: Two steps! Nico has 3 jugs with 9 liters of water in each. He pours 5 liters into the cocoa urn. How many liters of water are left in the jugs? [22 liters / 17 liters / 32 liters / 27 liters]	**22 liters**	Step 1: 3 jugs × 9 liters = 27 liters. Step 2: 27 − 5 = 22 liters are left.
m19a_s1	Set 2: A balloon lifts off at 7:35 a.m. and lands at 8:20 a.m. How many minutes was the flight?	**45** (also accepted: 45 minutes, forty-five, forty-five minutes, 45 minute)	Jump from 7:35 to 8:00: 25 minutes. Jump from 8:00 to 8:20: 20 minutes. 25 + 20 = 45 minutes.
m19b_s1	Set 2: Find the mistake. Luz says a Balloon Fiesta pin has a mass of about 10 kilograms. What went wrong? [Kilograms are for heavy things. A pin is light, so it is about 10 grams. / Nothing is wrong. A pin is about 10 kilograms. / She should say 10 liters, because a pin is small. / A pin is about 10,000 kilograms.]	**Kilograms are for heavy things. A pin is light, so it is about 10 grams.**	Grams are for light things, like a pin or a paper clip. Kilograms are for heavy things, like a sandbag. A pin is about 10 grams.
m19a_s2	Set 3: Two steps! Ivy heats 2 urns of cocoa, one right after the other. Each urn takes 20 minutes. She starts the first urn at 2:45 p.m. What time is the second urn ready? Type the time with a.m. or p.m.	**3:25 p.m.** (also accepted: 3:25, 3:25 pm, 3:25pm, 3:25p.m., 3:25 p.m, 3:25 p. m.)	Step 1: 20 + 20 = 40 minutes in all. Step 2: Jump from 2:45 to 3:00 (15 minutes), then 25 more minutes: 3:25 p.m.
m19b_s2	Set 3: Which explanation is correct? A sandbag has a mass of 6 kilograms. Luz loads 4 sandbags. Nico says the mass is 10 kilograms, because 6 + 4 = 10. Luz says it is 24 kilograms, because 4 × 6 = 24. [Luz is correct. 4 equal groups of 6 kilograms is 24 kilograms. / Nico is correct. / They are both correct. / Neither one is correct.]	**Luz is correct. 4 equal groups of 6 kilograms is 24 kilograms.**	There are 4 equal groups of 6 kilograms, so multiply: 4 × 6 = 24 kilograms. Adding 6 + 4 mixes up the number of bags and the mass.

READING REVIEW: CONTEXT CLUES (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
r16a_s0	Set 1: *Read this text Sugaring Day Aunt June lit the fire in the sugarhouse. Soon the sap in the pan began to simmer, or bubble gently. Desmond carried a heavy log for the fire, but Hazel carried a light one.* Use the synonym clue. In the text, simmer means to ___ gently.	**bubble** (also accepted: bubbles)	The signal word or is followed by one word, bubble, so simmer means to bubble gently.
r16b_s0	Set 1: Find the mistake. Desmond says the word light in "Hazel carried a light one" means a lamp that shines. What went wrong? [Light has more than one meaning. The antonym clue heavy, after but, shows that here light means not heavy. / Nothing is wrong. Here light means a lamp. / Here light means a kind of maple tree. / Here light means very hot.]	**Light has more than one meaning. The antonym clue heavy, after but, shows that here light means not heavy.**	Light is a multiple-meaning word. The sentence compares a heavy log to a light one, so here light means not heavy.
r16a_s1	Set 2: *Read this text The Sap Tags Each maple tree has a tag, which is a small card with a number on it. Hazel checked the tags on the hill. The path was slushy, but the barn floor was dry. When Desmond saw his full pail, he was elated, or very happy.* Use the definition clue. A tag is a small ___ with a number on it.	**card** (also accepted: a card)	The signal words which is tell you the meaning: a tag is a small card with a number on it.
r16b_s1	Set 2: Which explanation is correct? What does slushy mean, and which clue shows it? [Wet and mushy. The antonym clue dry, after the word but, shows the opposite. / Dry and dusty. The synonym clue dry means the same. / Frozen solid. The definition clue tells the meaning. / Very happy. The word or points to the meaning.]	**Wet and mushy. The antonym clue dry, after the word but, shows the opposite.**	The word but signals an opposite. The barn floor was dry, so the slushy path was the opposite: wet and mushy.
r16a_s2	Set 3: *Read this text Boiling Day The fire under the pan was roaring. "Stand back," said Aunt June. "The pan is scalding, unlike the icy snow outside." Hazel used a ladle, which is a big spoon with a long handle, to scoop the syrup. By night, Desmond felt weary, or tired.* Use the synonym clue. In the text, weary means ___.	**tired** (also accepted: very tired)	The signal word or is followed by one word, tired, which means the same as weary.
r16b_s2	Set 3: Two steps! Find the clue for scalding. Then choose what it means. [Clue: unlike the icy snow (an antonym clue). Meaning: very hot / Clue: a big spoon with a long handle. Meaning: very hot / Clue: unlike the icy snow. Meaning: very cold / Clue: or tired. Meaning: sleepy]	**Clue: unlike the icy snow (an antonym clue). Meaning: very hot**	Step 1: The signal word unlike points to an opposite, the icy snow. Step 2: Flip it. The opposite of icy is very hot, so scalding means very hot.

READING REVIEW: THE PARTS OF A POEM (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
r17a_s0	Set 1: *Read this poem Night Watch The lighthouse stands so tall and white, It sweeps its beam across the night. The waves roar like a hungry bear, And cold salt wind blows through my hair.* How many stanzas are in Night Watch? Type the number.	**2** (also accepted: two, 2 stanzas, two stanzas)	There is a space after line 2, so the poem has 2 groups of 2 lines. That is 2 stanzas.
r17b_s0	Set 1: Which line from Night Watch is a simile? [The waves roar like a hungry bear, / The lighthouse stands so tall and white, / It sweeps its beam across the night. / And cold salt wind blows through my hair.]	**The waves roar like a hungry bear,**	The waves roar like a hungry bear compares waves to a bear using like. The other lines do not compare two different things.
r17a_s1	Set 2: *Read this poem Gulls Gulls float over the dock like white kites on strings. I hear them squawk and squeal. I taste the salty air.* Which sense does the line "I hear them squawk and squeal." use? Type sight, hearing, smell, taste, or touch.	**hearing** (also accepted: hear, sound, the sense of hearing)	Hear, squawk, and squeal tell about sounds, so the line uses the sense of hearing.
r17b_s1	Set 2: Find the mistake! Josie says the line "like white kites on strings" is NOT part of a simile, because it does not use the word as. What went wrong? [A simile can use like OR as. These lines compare gulls to kites using like. / Nothing is wrong. Similes must use the word as. / The lines are a simile only because they rhyme. / The lines are a stanza, so they cannot be a simile.]	**A simile can use like OR as. These lines compare gulls to kites using like.**	A simile compares two different things using like or as. Gulls float like white kites, so it is a simile.
r17a_s2	Set 3: *Read this poem The Fishing Boat My boat is slow, my boat is old, It creaks and groans out in the cold. The engine purrs as soft as a cat, And rain drips down upon my hat.* Which word at the end of line 2 rhymes with old?	**cold**	Old and cold end with the same -old sound, so they rhyme.
r17b_s2	Set 3: Which explanation is correct? Keiko says "The engine purrs as soft as a cat" is a simile. Josie says it is not a simile, because an engine and a cat are very different. [Keiko is right. A simile compares two different things using like or as. / Josie is right. A simile only compares things that are the same. / Josie is right, because the line does not rhyme. / Neither is right, because the line is a whole stanza.]	**Keiko is right. A simile compares two different things using like or as.**	A simile compares two DIFFERENT things using like or as. An engine and a cat are different, and the line uses as.

READING REVIEW: FACT AND OPINION (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
r18a_s0	Set 1: Type the opinion signal word in this sentence: Mr. Pham sells the tastiest mangoes at the market.	**tastiest**	Tastiest tells what someone thinks. Another person might like a different fruit stand better.

ID	Question	Answer	Why (explain to student)
r18b_s0	Set 1: Split it! The fruit stand has 4 baskets of mangoes, and they are the best mangoes in Texas. Which part is the OPINION? [they are the best mangoes in Texas / The fruit stand has 4 baskets of mangoes / Both parts are facts. / Both parts are opinions.]	**they are the best mangoes in Texas**	You can count the baskets, so the first part is a fact. Best is a feeling word, so the second part is the opinion.
r18a_s1	Set 2: Is this sentence a fact or an opinion? Type fact or opinion. The plaza should have more benches for visitors.	**opinion** (also accepted: an opinion)	Should is an opinion signal word. People could disagree about whether the plaza needs more benches.
r18b_s1	Set 2: Which explanation is correct? Benicio says, "The shop sold 30 piñatas, and they were the most beautiful piñatas ever" is a fact, because it has a number. Lupe says the sentence mixes a fact and an opinion. [Lupe is right. 30 piñatas can be counted, but most beautiful is a feeling. / Benicio is right, because any sentence with a number is a fact. / Benicio is right, because piñatas are real. / Neither is right, because the whole sentence is a question.]	**Lupe is right. 30 piñatas can be counted, but most beautiful is a feeling.**	Split the sentence. The shop sold 30 piñatas can be proved by counting. Most beautiful is a feeling, so that part is an opinion.
r18a_s2	Set 3: Opinion writers join the opinion to the reason with one word. Finish it: Every market needs music ___ it makes shoppers want to stay longer.	**because**	Because joins the opinion to the reason that tells why.
r18b_s2	Set 3: Find the mistake! Lupe wrote, "I think the yellow shop sign is the best sign in the plaza because it is next to a tree." What went wrong? [The reason does not tell WHY the sign is the best. A strong reason would be because it is bright and easy to see. / Nothing is wrong. Every reason is a strong reason. / An opinion should never have a reason. / The sentence is a fact, not an opinion.]	**The reason does not tell WHY the sign is the best. A strong reason would be because it is bright and easy to see.**	A strong reason tells WHY and matches the opinion. Being next to a tree does not show the sign is the best.

READING REVIEW: READING A PLAY (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
r19a_s0	Set 1: *Read this script The Lost Headphones (Morning in Studio A. Ezra looks under the table.) EZRA: (worried) I cannot find the headphones! MEI: Did you check the shelf by the door? NANA PILAR: (smiling) Let us look together, slowly. (Mei finds the headphones on the shelf. Ezra cheers.)* Who says, "Did you check the shelf by the door?" Type the name.	**Mei**	The name before the colon tells who is talking. The line is MEI: Did you check the shelf by the door?
r19b_s0	Set 1: Find the mistake! Ezra reads his line out loud like this: "worried, I cannot find the headphones!" What went wrong? [Worried is a stage direction. Actors act it out, they do not say it. / Nothing is wrong. / He should also say the name EZRA out loud. / Worried is a character in the play.]	**Worried is a stage direction. Actors act it out, they do not say it.**	Words in parentheses are stage directions. The actor should sound worried, but only say: I cannot find the headphones!

ID	Question	Answer	Why (explain to student)
r19a_s1	Set 2: *Read this script Rain in the Desert Scene 1: The desert garden. Afternoon. (Dark clouds roll over the saguaro cactus.) MEI: (holding out her hand) Ezra, I felt a raindrop! EZRA: Let us record the sound of the rain for the show! Scene 2: Studio A. That evening. NANA PILAR: (listening to the recording) Our listeners will hear a desert storm!* The scene heading for Scene 2 tells a new time. What time of day is Scene 2? Type one word.	**evening** (also accepted: that evening, in the evening, the evening)	The heading says Scene 2: Studio A. That evening. The time changed, so a new scene began.
r19b_s1	Set 2: Which is the BEST summary of Rain in the Desert? [In the desert garden, Mei feels rain and Ezra wants to record it. That evening in the studio, Nana Pilar listens to the recording of the storm. / Clouds are dark. Mei holds out her hand. There is a cactus. / This is the best play ever, and Mei is the funniest character. / Ezra watches the clock, and Mr. Tsosie hears the show at his bookshop.]	**In the desert garden, Mei feels rain and Ezra wants to record it. That evening in the studio, Nana Pilar listens to the recording of the storm.**	A good summary tells who, where, what happened, and how it ended, in order. The others list tiny details, give an opinion, or tell about a different play.
r19a_s2	Set 3: *Read this script The Bookshop Visit Scene 1: Mr. Tsosie's bookshop on Fourth Avenue. Saturday morning. MR. TSOSIE: (holding up a book) This book is all about the cactus wren. EZRA: (reaching for it fast) Can I take it right now? MEI: Ezra, remember. Be patient! (Ezra takes a deep breath and waits his turn.)* Where does Scene 1 happen? Type the place from the scene heading: Mr. Tsosie's ___.	**bookshop** (also accepted: book shop, bookstore, book store)	The scene heading tells the place: Mr. Tsosie's bookshop on Fourth Avenue.
r19b_s2	Set 3: Which explanation is correct? What does the stage direction (Ezra takes a deep breath and waits his turn.) tell the reader? [What Ezra does on the stage. It shows he is learning to be patient. / The exact words Ezra says out loud. / The name of the next scene. / Who is in the cast.]	**What Ezra does on the stage. It shows he is learning to be patient.**	Stage directions tell actions. Ezra waits his turn instead of rushing, which shows he is learning to be patient.

MATCH-UP ROUND (2 POINTS PER FIRST-TRY MATCH)

ID	Question	Answer	Why (explain to student)
match_s0_1	Set 1: Match 23	**46**	2 points if matched on the first try.
match_s0_2	Set 1: Match 44	**1 whole**	2 points if matched on the first try.
match_s0_3	Set 1: Match 12	**48**	2 points if matched on the first try.
match_s0_4	Set 1: Match 8:15 to 9:00	**45 minutes**	2 points if matched on the first try.
match_s0_5	Set 1: Match 4 jugs of 5 liters	**20 liters**	2 points if matched on the first try.
match_s1_1	Set 2: Match denominator	**the bottom number of a fraction**	2 points if matched on the first try.
match_s1_2	Set 2: Match stanza	**a group of lines in a poem**	2 points if matched on the first try.
match_s1_3	Set 2: Match opinion	**what someone thinks or feels**	2 points if matched on the first try.

ID	Question	Answer	Why (explain to student)
match_s1_4	Set 2: Match dialogue	**the words characters say**	2 points if matched on the first try.
match_s1_5	Set 2: Match kilogram	**a unit of mass for heavy things**	2 points if matched on the first try.
match_s2_1	Set 3: Match simile	**compares using like or as**	2 points if matched on the first try.
match_s2_2	Set 3: Match fact	**something that can be proved**	2 points if matched on the first try.
match_s2_3	Set 3: Match synonym clue	**a nearby word that means the same**	2 points if matched on the first try.
match_s2_4	Set 3: Match stage directions	**notes in parentheses for actors**	2 points if matched on the first try.
match_s2_5	Set 3: Match elapsed time	**how much time passes**	2 points if matched on the first try.

FIX THE SENTENCE (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
fs1_s0	Set 1: Fix the sentence: hazel and desmond visited vermont	**Hazel and Desmond visited Vermont.**	Hazel starts the sentence and is a name, Desmond is a name, and Vermont is the name of a state, so all three get capital letters. A telling sentence ends with a period.
fs2_s0	Set 1: Fix the sentence: tasha sews red blue and gold strips	**Tasha sews red, blue, and gold strips.** (also accepted: Tasha sews red, blue and gold strips.)	Tasha is a name and starts the sentence, so it gets a capital T. Put commas between the things in the list and end with a period.
fs1_s1	Set 2: Fix the sentence: how many balloons flew over albuquerque	**How many balloons flew over Albuquerque?**	Start with a capital H. Albuquerque is the name of a city, so it gets a capital A. This sentence asks something, so it ends with a question mark.
fs2_s1	Set 2: Fix the sentence (one verb is wrong, and Ezra is one person): ezra watch the clock	**Ezra watches the clock.**	Ezra is a name and starts the sentence, so it gets a capital E. Ezra is one person, so the verb is watches. End with a period.
fs1_s2	Set 3: Fix the sentence: lupe and benicio helped at the shop in san antonio	**Lupe and Benicio helped at the shop in San Antonio.**	Lupe and Benicio are names, and San Antonio is the name of a city, so they get capital letters. A telling sentence ends with a period.
fs2_s2	Set 3: Fix the sentence: josie read poems about boats gulls and fog	**Josie read poems about boats, gulls, and fog.** (also accepted: Josie read poems about boats, gulls and fog.)	Josie is a name and starts the sentence, so it gets a capital J. Put commas between the things in the list and end with a period.

⌨ TYPE-IT CORRAL (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
t1_s0	Set 1: Fill in the numerator. 3/4 =?/8	**6** (also accepted: six, 6/8, 6 eighths, six eighths)	Each fourth splits into 2 eighths. 3 fourths is 3 × 2 = 6 eighths, so 3/4 = 6/8.

ID	Question	Answer	Why (explain to student)
t2_s0	Set 1: In a play, the list of every character at the beginning is called the ___ of characters.	**cast** (also accepted: the cast)	The cast of characters lists everyone in the play, often with a few words about each one.
t1_s1	Set 2: Two steps! A cocoa urn holds 32 liters. Ivy pours in 3 pitchers with 8 liters in each. How many more liters will fit in the urn?	**8** (also accepted: eight, 8 liters, 8 liter)	Step 1: 3 × 8 = 24 liters are poured in. Step 2: 32 − 24 = 8 more liters will fit.
t2_s1	Set 2: Words and sentences around a new word that help you figure out what it means are called context ___.	**clues** (also accepted: clue)	Context clues are the words around a new word that help you find its meaning.
t1_s2	Set 3: A balloon lifts off at 10:50 a.m. and floats for 25 minutes. What time does it land? Type the time with a.m. or p.m.	**11:15 a.m.** (also accepted: 11:15, 11:15 am, 11:15am, 11:15a.m., 11:15 a.m, 11:15 a. m.)	Jump from 10:50 to 11:00: 10 minutes. 25 − 10 = 15 more minutes. 11:00 + 15 minutes = 11:15 a.m.
t2_s2	Set 3: A comparison of two different things using like or as is called a ___.	**simile** (also accepted: a simile)	A simile compares two different things using like or as, like a boat that rocks like a cradle.

BOSS BATTLE: THE PATCHWORK FAIR (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
bb1_s0	Set 1: *Theo and Mia's flyer The Patchwork Fair Come to the Patchwork Fair this Saturday! The doors open at 9:45 a.m. and close at 11:30 a.m. Our quilt has 8 equal patches, and 3 of them are blue. Hot cocoa comes in pitchers that hold 2 liters each. It will be the most colorful fair of the year!* Which sentence from the flyer is an OPINION? [It will be the most colorful fair of the year! / Our quilt has 8 equal patches, and 3 of them are blue. / The doors open at 9:45 a.m. and close at 11:30 a.m. / Hot cocoa comes in pitchers that hold 2 liters each.]	**It will be the most colorful fair of the year!**	Most colorful is a feeling, and people could disagree. The other sentences can be proved by counting, checking a clock, or measuring.
bb2_s0	Set 1: Two steps! The fair is open from 9:45 a.m. to 11:30 a.m. How long is it open? Type it in hours and minutes, like 1 hour 35 minutes.	**1 hour 45 minutes** (also accepted: 1 hour and 45 minutes, 1 hour, 45 minutes, 105 minutes, 105, 1 hour 45 minute, one hour 45 minutes, one hour and forty-five minutes)	Step 1: Jump from 9:45 to 10:00: 15 minutes. Step 2: Jump from 10:00 to 11:30: 1 hour 30 minutes. 15 minutes + 1 hour 30 minutes = 1 hour 45 minutes.
bb1_s1	Set 2: *Theo and Mia's flyer Play Time at the Fair At the Patchwork Fair, kids will act out a short play in 2 scenes! The play starts at 1:20 p.m. and lasts 40 minutes. The quilt behind the stage has 6 equal patches, and 4 of them have stars. I think the play is the best part of the fair, because everyone gets to clap and cheer!* Two steps! The play starts at 1:20 p.m. and lasts 40 minutes. What time does it end? Type the time with a.m. or p.m.	**2:00 p.m.** (also accepted: 2:00, 2:00 pm, 2:00pm, 2:00p.m., 2:00 p.m, 2:00 p. m., 2 p.m., 2 pm, 2pm)	Step 1: Jump from 1:20 to 2:00: that is 40 minutes. Step 2: All 40 minutes are used, so the play ends at 2:00 p.m.

ID	Question	Answer	Why (explain to student)
bb2_s1	Set 2: Which explanation is correct? The flyer says, "I think the play is the best part of the fair, because everyone gets to clap and cheer!" Theo says it is a fact. Mia says it is an opinion with a reason. [Mia is right. I think and best show a feeling, and because gives the reason. / Theo is right, because it has the word because. / Theo is right, because the fair is real. / Neither is right, because the sentence is a question.]	**Mia is right. I think and best show a feeling, and because gives the reason.**	I think and best are opinion signal words. The part after because is the reason that tells why.
bb1_s2	Set 3: *Theo and Mia's flyer The Cocoa Stand Visit the cocoa stand at the Patchwork Fair! We have 5 big jugs, and each jug holds 6 liters of cocoa. Try a sample, or a small taste, of every flavor. Our banner is cut into 4 equal parts, and 1 part is red. Mia says, "Cocoa is the yummiest drink in the world!"* Use the synonym clue. In the flyer, a sample is a small ___.	**taste** (also accepted: small taste, a taste, a small taste)	The signal word or is followed by a small taste, which means the same as a sample.
bb2_s2	Set 3: Two steps! The stand has 5 jugs with 6 liters of cocoa in each. By noon, 12 liters are gone. How much cocoa is left? [18 liters / 23 liters / 30 liters / 42 liters]	**18 liters**	Step 1: 5 × 6 = 30 liters of cocoa. Step 2: 30 − 12 = 18 liters are left.

BOSS BATTLE: THE LAST PATCH (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
bb3_s0	Set 1: *From the flyer The Patchwork Fair Our quilt has 8 equal patches, and 3 of them are blue. Hot cocoa comes in pitchers that hold 2 liters each.* What fraction of the quilt's patches are NOT blue? Type it like 3/4.	**5/8** (also accepted: 5 / 8, five eighths, five-eighths, 5 eighths, 5 out of 8)	The quilt has 8 equal patches and 3 are blue. 8 − 3 = 5 patches are not blue, so 5/8 are not blue.
bb4_s0	Set 1: Find the mistake. Mia pours 4 pitchers of cocoa into a big pot. She says the pot now has 6 liters, because 4 + 2 = 6. What went wrong? [There are 4 equal groups of 2 liters, so she should multiply: 4 × 2 = 8 liters. / Nothing is wrong. The pot has 6 liters. / She should subtract: 4 − 2 = 2 liters. / The pot has 42 liters.]	**There are 4 equal groups of 2 liters, so she should multiply: 4 × 2 = 8 liters.**	Each pitcher holds 2 liters, and there are 4 pitchers. Equal groups means multiply: 4 × 2 = 8 liters.
bb3_s1	Set 2: *From the flyer Play Time at the Fair The quilt behind the stage has 6 equal patches, and 4 of them have stars. In the script, one line says: MIA: (bowing) Thank you for coming!* The star patches are 4/6 of the quilt, and the plain patches are 2/6. Type <, >, or = to compare. 4/6 ___ 2/6	**>** (also accepted: is greater than, greater than)	Both are sixths, so the pieces are the same size. 4 pieces is more than 2 pieces, so 4/6 > 2/6.

ID	Question	Answer	Why (explain to student)
bb4_s1	Set 2: Find the mistake. Theo reads the line MIA: (bowing) Thank you for coming! He says Mia should say the word bowing out loud. What went wrong? [Bowing is a stage direction. Mia should bow, not say it. / Nothing is wrong. Mia should say bowing. / Mia should say her name out loud too. / Bowing is the name of a scene.]	**Bowing is a stage direction. Mia should bow, not say it.**	Words in parentheses are stage directions. Actors act them out, so Mia bows and says only: Thank you for coming!
bb3_s2	Set 3: *From the flyer The Cocoa Stand Our banner is cut into 4 equal parts, and 1 part is red. Mia says, "Cocoa is the yummiest drink in the world!"* The red part of the banner is 1/4. A same-size banner is cut into eighths. Fill in the numerator: 1/4 =?/8	**2** (also accepted: two, 2/8, 2 eighths, two eighths)	Each fourth splits into 2 eighths, so 1/4 = 2/8. They land on the same point on a number line.
bb4_s2	Set 3: Which explanation is correct? Theo says Mia's sentence, "Cocoa is the yummiest drink in the world," is a fact because she said it at the fair. Mia says it is an opinion. [Mia is right. Yummiest is a feeling word, and people could disagree. / Theo is right, because she said it at the fair. / Theo is right, because cocoa is a drink. / Neither is right, because the sentence is a question.]	**Mia is right. Yummiest is a feeling word, and people could disagree.**	Saying something at the fair does not make it a fact. Yummiest shows a feeling, so it is an opinion.

Pre & Post sheet answer guide

Many items are open-ended. Grade for genuine understanding and complete sentences, not exact wording. Sheet: grade3/prepost/KCE_Checkpoint_PrePost_G3W20.pdf.

PRE-LESSON WARM-UP

#	Prompt	Model answer / grading note
1	Square pizza in 4 equal parts; shade 3	3/4 is shaded. Check that the 4 parts are equal.
2	Number line 0 to 1 in 4 equal parts; mark 3/4	Point at the third jump from 0 (the tick just before 1).
3	Compare 2/8 and 5/8	2/8 < 5/8. Same denominator, so compare the numerators: 2 parts is less than 5 parts.
4	What does murky mean?	cloudy and hard to see through (antonym clue: not clear like the creek)
5	Which sentence is an opinion?	Poems about the sea are the best poems.
6	What stage directions tell actors	how to move or sound

POST-LESSON CHALLENGE

#	Prompt	Model answer / grading note
1	8 tomatoes: 2 yellow, 1 orange, the rest red	Step 1: 2 + 1 = 3 and 8 − 3 = 5 red. Step 2: 5/8 of the tomatoes are red.
2	Wen says 1/6 > 1/3 because 6 is bigger than 3	More equal parts makes smaller pieces, so sixths are smaller than thirds. Correct comparison: 1/6 < 1/3.

#	Prompt	Model answer / grading note
3	Lifts off 8:40 a.m., lands 9:25 a.m.	45 minutes: 8:40 to 9:00 is 20 minutes, and 9:00 to 9:25 is 25 minutes.
4	One fact and one opinion about a market, with because	Answers vary. The fact must be provable; the opinion needs because and a reason that tells why.

★ CHALLENGE

#	Prompt	Model answer / grading note
1	Quilt with 8 equal patches; color 4/8; another fraction	4/8 = 1/2 (also 2/4). Drawing shows 8 equal patches with 4 colored.
