KCE PATHWAYS · GRADES 4–5 · UNIT 4: SHAPES AND SPACE · WEEK 16 · READING

The Storm Watchers of Norman — Teacher Lesson Plan & Answer Key

Learning objectives: Students take words apart into prefixes, Greek and Latin roots and suffixes to figure out meaning (therm, meter, dict, vis, aud, port, graph, geo, -ology), spell the "not" prefix as in-, im-, il- or ir-, use definition, synonym, antonym, example and inference context clues, apply spelling rules when adding affixes, and explain a hard sentence in plain words.

Duration: 35–45 minutes
Materials: Computer or tablet with the lesson open · pencil · printed Pre & Post sheet

Lesson flow (as it appears on screen)

1. Slide 0 — Intro and name capture: Wyatt and his cousin Noor help a retired weather scientist, Ms. Nwosu, run a neighborhood weather station in Norman, Oklahoma, home of the National Weather Center. The student types first and last name so results go to KingCretot Experience. Read the scoring rules together: 2 tries per question, Pathway Points only for a correct first try, and the answer plus the reason appear after the 2nd miss. Typed one-word answers ignore capital letters and are accepted when the answer contains an accepted word.
2. Slide 1 — Warm-Up: Unit 3 Review (8 pts, 4 each): quoting and paraphrasing from Wyatt's weather log.
3. Slide 2 — Pencil Break (Pre): the student opens or prints the Pre/Post sheet (grade4-5/prepost/KCE_Reading_PrePost_G4-5W16.pdf) and completes Page 1 (Pre-Lesson Warm-Up) on paper before any teaching.
4. Slide 3 — Picture It: How Words Are Built. Prefix + root + suffix charts. Have the student build one word aloud from its parts.
5. Slide 4 — Vocabulary Round-Up: 6 flip cards (meteorologist, thermometer, predict, impassable, inaudible, visible), each with its word parts and a story sentence.
6. Slide 5 — Your Turn: Using the Word Parts (8 pts, 4 each).
7. Slide 6 — The Story: The Storm Watchers of Norman (5 pts). Read it aloud together; the bold words are the word-study words, and the paragraph numbers are used in the questions.
8. Slide 7 — The Weather Station Guide (5 pts): an informational station guide; each tool's name is built from word parts.
9. Slide 8 — Word Builder (10 pts, 5 each): build the word and spell it. Spelling counts. Remind: in- becomes im-, il- or ir- before some letters.
10. Slide 9 — Teach: Context Clues and Spelling Rules. Five kinds of clues (definition, synonym, antonym, example, inference) and the affix spelling rules.
11. Slide 10 — Context Clue Detective (12 pts, 6 each): name the clue and the meaning, and catch the spelling mistake.
12. Slide 11 — Fix the Sentence, Part 1 (8 pts, 4 each): each item names the one kind of fix. The whole sentence is checked exactly (straight or curly quotes and extra spaces are OK). The corrected sentence appears after the 2nd miss.
13. Slide 12 — Fix the Sentence, Part 2 (8 pts, 4 each): two more sentences, same rules.

14. Slide 13 — Spell It Right (4 pts): add BOTH affixes to a base word. A prefix never changes the base word; drop a silent e before a vowel suffix.
15. Slide 14 — Writer's Turn: Say It in Plain Words (6 pts): one typed answer auto-checked by rules: a minimum word count; no 4 or more words in a row copied from the original (allowed names count as one word); and every key idea included. Feedback names the rule that was missed, and a model answer appears after the 2nd miss. Encourage covering the original before writing.
16. Slide 15 — Match-Up Round (10 pts): 5 word parts matched to their meanings, 2 pts each on the first try.
17. Slide 16 — Speed Trail (bonus XP only): 3 quick questions against the student's own best time.
18. Slide 17 — Boss Challenge (16 pts, 8 each): two-step items (break the word into parts, then choose or type the meaning).
19. Slide 18 — Pencil Break (Post): the student completes Page 2 (Post-Lesson Activity) of the same sheet (grade4-5/prepost/KCE_Reading_PrePost_G4-5W16.pdf), including the writing item and the ★ Challenge if time allows, before seeing the score.
20. Slide 19 — Results (Log Complete!): the score out of 100 is sent to KingCretot Experience. 85 or higher shows "Storm Watcher!" with the congratulations message "Storm Watcher! You read the clues in the sky AND the clues inside the words, just like Wyatt and Noor!" and a big confetti burst; below 85 shows "Keep Going!" with encouragement ("You're getting closer, and every try makes you stronger."), and the next attempt brings a fresh question set (sets rotate 1, 2, 3). Both messages remind the student to finish the Post-Lesson Challenge sheet.

Lesson answer key with reasoning

Every scored item the student sees, in order, across all three rotating question sets. Each item allows 2 tries and earns Pathway Points only on a correct first try. The "why" is the same reasoning shown on screen after a second missed try.

WARM-UP: UNIT 3 REVIEW (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
`rv1_s0`	Set 1: Original (Wyatt's weather log): "Dark clouds rolled in after lunch and hid the whole sky." Which note is an honest PARAPHRASE that names the source? [Wyatt's weather log says that soon after noon, heavy storm clouds covered the sky from one side to the other. / Dark clouds rolled in after lunch and hid the whole sky. (Source: Wyatt's weather log) / Wyatt's weather log says that the sky was sunny and clear all afternoon. / Soon after noon, heavy storm clouds covered the sky from one side to the other.]	**Wyatt's weather log says that soon after noon, heavy storm clouds covered the sky from one side to the other.**	It keeps the meaning in new words and names the source. The note with "(Source: Wyatt's weather log)" copies the words with no quotation marks, the sunny note changes the meaning, and the last note names no source.
`rv2_s0`	Set 1: Find the mistake. Noor wrote: Ms. Nwosu says, "Falling pressure often means a storm is coming". Which punctuation mark is in the wrong place? Type its name.	**period** (also accepted: a period, the period)	The period must go INSIDE the closing quotation mark: "...a storm is coming."
`rv1_s1`	Set 2: Which sentence punctuates the quote correctly? [Ms. Nwosu warned, "Head back to town early." / Ms. Nwosu warned "Head back to town early." / Ms. Nwosu warned, "head back to town early." / Ms. Nwosu warned, "Head back to town early".]	**Ms. Nwosu warned, "Head back to town early."**	A comma follows the tag, the quoted sentence starts with a capital letter, and the period goes inside the closing quotation mark. Each wrong choice breaks one of those rules.

ID	Question	Answer	Why (explain to student)
rv2_s1	Set 2: Count the copying. Original: “Falling pressure often means a storm is coming.” Noor’s note: Ms. Nwosu explains that falling pressure often means rough weather. How many words in a row did Noor copy? Type the number.	**4** (also accepted: four)	“falling pressure often means” is 4 words in a row copied from the original, so Noor must reword that part or use quotation marks.
rv1_s2	Set 3: Original: “Falling pressure often means a storm is coming.” Wyatt changed one word: Ms. Nwosu says falling pressure usually means a storm is coming. Which explanation is correct? [It is not a fair paraphrase. He copied almost every word, so he must use quotation marks or rewrite the idea in his own words. / It is a fair paraphrase, because changing one word is enough. / It is fine, because naming Ms. Nwosu makes any note okay. / It is wrong, because you may never use a speaker’s ideas.]	**It is not a fair paraphrase. He copied almost every word, so he must use quotation marks or rewrite the idea in his own words.**	Changing one word does not make a paraphrase. The note still copies almost every word, so it needs quotation marks or a real rewrite in new words.
rv2_s2	Set 3: Find the mistake. Wyatt wrote: “Heading in now” Mr. Harjo shouted. One punctuation mark is missing right after the word now. Type the name of a mark that would fix it.	**comma** (also accepted: a comma, exclamation point, exclamation mark, exclamation)	When the tag comes after the quote, the quote must end with a comma (or an exclamation point) INSIDE the closing quotation mark: “Heading in now!” Mr. Harjo shouted.

YOUR TURN: USING THE WORD PARTS (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
v1_s0	Set 1: Type your answer: the word thermometer has the Greek root therm. Therm means ___.	**heat** (also accepted: hot, warm, warmth)	The Greek root therm means heat. A thermometer measures heat.
v2_s0	Set 1: In the story, the creek road “may be impassable.” Which explanation of the word parts is correct? [im- (not) + pass + -able (can be): the road cannot be passed through. / im- (into) + pass: a road that cars pass into quickly. / impass is a root that means storm, and -able means wet. / im- (not) + pass + -able (without): the road has no cars on it.]	**im- (not) + pass + -able (can be): the road cannot be passed through.**	im- means “not” and -able means “can be,” so impassable means the road cannot be passed through. The story says, “No car or truck will be able to get through.”
v1_s1	Set 2: Type your answer: the Latin root dict in predict and dictionary means to ___.	**say** (also accepted: says, said, saying, speak, speaking, tell, telling)	The Latin root dict means say, as in dictionary (a book that says what words mean) and predict (say before).
v2_s1	Set 2: “The streetlights were barely visible.” The root vis means “see.” What does visible mean? [Able to be seen / Unable to be seen / A person who sees / Seeing something again]	**Able to be seen**	vis means “see” and -ible means “can be,” so visible means able to be seen. “Barely visible” means it could only just be seen.
v1_s2	Set 3: Type your answer: a meteorologist is a person who studies weather. Type the suffix at the end of meteorologist that means “person who.”	**-ist** (also accepted: ist, -ologist, ologist)	The suffix -ist means “person who,” as in scientist, artist, and meteorologist.

ID	Question	Answer	Why (explain to student)
v2_s2	Set 3: Careful! In which word do the letters i-n really form a prefix that means “not”? [inaudible / inside / index / inch]	**inaudible**	In inaudible, in- really is a prefix meaning “not” (not able to be heard). In inside, index, and inch, the letters i-n are not a “not” prefix: inside means in, not “not side.”

THE STORY: THE STORM WATCHERS OF NORMAN (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
sa_s0	Set 1: Paragraph 1 defines meteorologist right inside the sentence. Fill in the word: a meteorologist is a ___ who studies the air and predicts the weather.	**scientist** (also accepted: scientists, a scientist)	Paragraph 1 gives a definition clue right after the word: “a meteorologist, a scientist who studies the air and predicts the weather.”
sa_s1	Set 2: In paragraph 4, find an antonym clue. Type ONE word from the paragraph that means the OPPOSITE of tranquil.	**wild** (also accepted: churning)	Paragraph 4 says the pond was “usually so tranquil” but “was now wild and churning.” Wild and churning are the opposite of tranquil, so tranquil means calm and peaceful.
sa_s2	Set 3: In paragraph 5, which detail is the best clue that inaudible means “not able to be heard”? [Ms. Nwosu asked him to repeat it. / Ms. Nwosu picked up the radio. / “Head back to town early,” she warned. / No car or truck will be able to get through.]	**Ms. Nwosu asked him to repeat it.**	Ms. Nwosu had to ask Mr. Harjo to repeat his reply, which shows nobody could hear it the first time. That clue tells you inaudible means not able to be heard.

THE WEATHER STATION GUIDE (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
sb_s0	Set 1: The guide says a hygrometer measures humidity. Fill in the words the guide uses: humidity is the amount of ___ in the air.	**water vapor** (also accepted: water, vapor, moisture)	The Hygrometer card defines humidity as “the amount of water vapor in the air.” That fits the root hygro, which means wet.
sb_s1	Set 2: Two steps: the barometer reading RISES all day. Use the guide. Type the one word the guide uses to describe the skies Wyatt should expect.	**fair** (also accepted: clear, sunny, nice, good, calm)	Step 1: a barometer measures air pressure. Step 2: the Barometer card says “Rising pressure usually means fair skies.”
sb_s2	Set 3: Which statement about the word parts in the guide is correct? [Thermometer, barometer, anemometer, and hygrometer all share the root meter, which means measure. / The root photo in photograph means far. / A gauge is a tool for writing down the weather. / All four tools share the root graph, which means wind.]	**Thermometer, barometer, anemometer, and hygrometer all share the root meter, which means measure.**	Thermometer, barometer, anemometer, and hygrometer all end in the root meter, which means measure. Photo means light (not far), a gauge measures, and graph means write or record.

WORD BUILDER (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
wb1_s0	Set 1: Build a word: tele (far) + scope (a tool for looking). Type the word for a tool that lets you look at things far away.	**telescope** (also accepted: telescopes)	tele (far) + scope (a tool for looking) = telescope, a tool for looking at things far away.

ID	Question	Answer	Why (explain to student)
wb2_s0	Set 1: Add the prefix that means “not” to the word responsible. Choose the right spelling of the prefix and type the whole new word.	**irresponsible**	Before a word that starts with r, the prefix in- becomes ir-. Keep the r from responsible, so the word has a double r: irresponsible.
wb1_s1	Set 2: Build a word: bio (life) + -ology (the study of). Type the word that means the study of living things.	**biology**	bio (life) + -ology (the study of) = biology, the study of living things.
wb2_s1	Set 2: Add the prefix that means “not” to the word patient. Choose the right spelling of the prefix and type the whole new word.	**impatient**	Before a word that starts with p, the prefix in- becomes im-: impatient (not patient).
wb1_s2	Set 3: Build a word: geo (earth) + graph (write, describe) + -y. Type the name of the school subject that describes Earth’s land, water, and places.	**geography**	geo (earth) + graph (write, describe) + -y = geography, the subject that describes Earth’s land, water, and places.
wb2_s2	Set 3: Add the prefix that means “not” to the word logical. Choose the right spelling of the prefix and type the whole new word.	**illogical**	Before a word that starts with l, the prefix in- becomes il-. Keep the l from logical, so the word has a double l: illogical.

CONTEXT CLUE DETECTIVE (6 POINTS EACH)

ID	Question	Answer	Why (explain to student)
d1_s0	Set 1: Two steps: “That night, the storm was ferocious. Wind howled, rain pounded the windows, and hail rattled on the roof.” What KIND of clue helps you, AND what does ferocious mean? [An example clue; ferocious means fierce and violent. / An antonym clue; ferocious means gentle and calm. / A definition clue; ferocious means wet and rainy. / An example clue; ferocious means quiet and short.]	**An example clue; ferocious means fierce and violent.**	The sentences after ferocious give examples (howling wind, pounding rain, rattling hail), so it is an example clue, and ferocious means fierce and violent.
d2_s0	Set 1: Find the mistake. Wyatt wrote in the log: “The wind was unpredictible all night.” One word is misspelled. Type it correctly.	**unpredictable**	Predict is a whole word, so it takes -able: un + predict + able = unpredictable.
d1_s1	Set 2: “The damage was minimal: only a few branches down and one broken fence.” Use the example clue. Type ONE word that means about the same as minimal.	**small** (also accepted: little, slight, tiny, minor, not much, very little, low, light)	The example clue “only a few branches down and one broken fence” shows the damage was small. Minimal means very small, the least amount.
d2_s1	Set 2: Noor says misspell should be spelled “mispell,” because English never puts the same two letters together. Which explanation is correct? [Misspell is correct. It is mis- + spell, and adding a prefix never changes the base word, so both letters s stay. / Mispell is correct. You always drop one letter when two match. / Misspell is correct, but only because the word is long. / Mispell is correct, because mis- is a suffix.]	**Misspell is correct. It is mis- + spell, and adding a prefix never changes the base word, so both letters s stay.**	The prefix mis- is added to the whole word spell, and a prefix never changes the base word. mis + spell keeps both letters s: misspell.

ID	Question	Answer	Why (explain to student)
d1_s2	Set 3: Two steps: “By afternoon, the sky that had been clear and bright turned murky.” What does murky most likely mean, AND what kind of clue tells you? [Dark and cloudy; a contrast (antonym) clue with “clear and bright.” / Sunny and warm; a synonym clue with “clear and bright.” / Loud and windy; a definition clue after a comma. / Dark and cloudy; a definition clue with “or.”]	**Dark and cloudy; a contrast (antonym) clue with “clear and bright.”**	The sky “had been clear and bright” and then “turned murky,” so murky is the opposite of clear and bright. It is a contrast (antonym) clue, and murky means dark and cloudy.
d2_s2	Set 3: Find the mistake. Noor wrote: “The damage was minimal, so the whole neighborhood felt hopful.” One word is misspelled. Type it correctly.	**hopeful**	The suffix -ful starts with a consonant, so the silent e in hope stays: hope + ful = hopeful.

FIX THE SENTENCE (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
fs1_s0	Set 1: Spelling: fix the misspelled word with a prefix and a suffix. The forecast said the road would be impasable by night.	**The forecast said the road would be impassable by night.**	Impassable is im- + pass + -able. A prefix never changes the base word, so pass keeps both letters s.
fs2_s0	Set 1: Capitalization: fix the five capital-letter mistakes. ms. nwosu once worked at the national weather center.	**Ms. Nwosu once worked at the National Weather Center.**	Capitalize a title and a person’s name (Ms. Nwosu) and every important word in the name of a place or organization (National Weather Center).
fs3_s0	Set 1: Comma: this sentence joins two complete sentences with “and.” Add the missing comma. The barometer dropped all morning and the wind grew stronger by noon.	**The barometer dropped all morning, and the wind grew stronger by noon.**	Two complete sentences joined by “and” need a comma before “and.”
fs4_s0	Set 1: Grammar: fix the verb so it agrees with the subject. Each of the tools measure something different.	**Each of the tools measures something different.**	The subject is “Each,” which is singular, so it needs the singular verb “measures.” The words “of the tools” do not change the subject.
fs1_s1	Set 2: Spelling: fix the misspelled word with a prefix. Wyatt made a mispelled label for the hygrometer.	**Wyatt made a misspelled label for the hygrometer.**	Misspelled is mis- + spelled. A prefix never changes the base word, so the word keeps both letters s.
fs2_s1	Set 2: Capitalization: fix the four capital-letter mistakes. on tuesday, mr. harjo drove back to town.	**On Tuesday, Mr. Harjo drove back to town.**	Capitalize the first word of the sentence, the day of the week, and a title with a name (Mr. Harjo).
fs3_s1	Set 2: Comma: add the missing comma after the introductory part of the sentence. After the storm passed the neighbors cleaned up the broken branches.	**After the storm passed, the neighbors cleaned up the broken branches.**	Put a comma after an introductory part of a sentence that comes before the main idea: “After the storm passed,” then the rest.
fs4_s1	Set 2: Grammar: fix the verb tense so it matches the time in the sentence. Yesterday the wind howls through the town.	**Yesterday the wind howled through the town.** (also accepted: Yesterday, the wind howled through the town.)	“Yesterday” tells you the action is in the past, so the verb must be past tense: howled.
fs1_s2	Set 3: Spelling: fix the misspelled word with a suffix. The barometer is the most relyable tool in the station.	**The barometer is the most reliable tool in the station.**	Rely ends in a consonant + y, so change the y to i before adding -able: reliable.

ID	Question	Answer	Why (explain to student)
fs2_s2	Set 3: Capitalization: fix the four capital-letter mistakes. the cousins sent a report to the national weather service.	**The cousins sent a report to the National Weather Service.**	Capitalize the first word of the sentence and every important word in the name of an organization: National Weather Service.
fs3_s2	Set 3: Commas: add the commas that separate the items in this list. The station has a thermometer a barometer and a rain gauge.	**The station has a thermometer, a barometer, and a rain gauge.** (also accepted: The station has a thermometer, a barometer and a rain gauge.)	Use commas to separate three or more items in a list: a thermometer, a barometer, and a rain gauge.
fs4_s2	Set 3: Grammar: fix the pronoun mistake. Ms. Nwosu showed Wyatt and I the weather log.	**Ms. Nwosu showed Wyatt and me the weather log.**	Use “me” after an action word like “showed.” Test it by taking out “Wyatt and”: you would say “showed me,” not “showed I.”

SPELL IT RIGHT (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
sp_s0	Set 1: Two steps: add the prefix un- AND the suffix -able to the base word believe. Type the new word.	**unbelievable**	un + believe + able: the prefix does not change anything, and the silent e in believe is dropped because -able starts with a vowel. unbelievable.
sp_s1	Set 2: Two steps: add the prefix dis- AND the suffix -ment to the base word agree. Type the new word.	**disagreement**	dis + agree + ment: the prefix does not change anything, and the silent e in agree stays because -ment starts with a consonant. disagreement.
sp_s2	Set 3: Two steps: add the prefix un- AND the suffix -ly to the base word necessary. Type the new word.	**unnecessarily**	un + necessary keeps both letters n, because a prefix never changes the base word. Then necessary ends in a consonant + y, so change the y to i before -ly: unnecessarily.

WRITER’S TURN: SAY IT IN PLAIN WORDS (6 POINTS EACH)

ID	Question	Answer	Why (explain to student)
wt_s0	Set 1: Rewrite this sentence in plain words. Explain the three hard words using what their parts mean. Original (Wyatt’s weather log): The meteorologist predicted that the creek road would be impassable by midnight. Use at least 8 words. Do not copy 4 or more words in a row from the original. Explain meteorologist in plain words: use the word weather (for example, the weather scientist). Explain predicted in plain words: she said, told, or warned ahead of time. Explain impassable in plain words: no one could get through (use not, no, cannot, or unable). Keep the key idea: mention the road (or the cars and trucks on it). Original: “The meteorologist predicted that the creek road would be impassable by midnight.”	**Sample:** The weather scientist warned ahead of time that no car could get through on the road by the creek before midnight.	A strong plain-words paraphrase explains each hard word with its parts: meteorologist (weather scientist), predicted (said before), and impassable (not able to be passed through), and keeps the idea about the road. Auto-check rubric: at least 8 words; no 4 or more words in a row copied from the original; must include: weather; said or say or told or tell or warn or guess or forecast or knew or expect or announc; not or no or cannot or can't or couldn or unable or nobody or impossible or blocked or closed or never; road or street or highway or drive or car or truck or travel.

ID	Question	Answer	Why (explain to student)
wt_s1	Set 2: Rewrite this sentence in plain words. Explain the two hard words using what their roots mean. Original (Wyatt's weather log): Through the rain, the streetlights were barely visible, and the town's storm siren was nearly inaudible. Use at least 8 words. Do not copy 4 or more words in a row from the original. (Single words like streetlights and siren are fine to keep.) Explain visible in plain words: use see, seen, or spot. Explain inaudible in plain words: use hear or heard. Keep the key idea: mention the streetlights. Keep the key idea: mention the storm siren. Original: "Through the rain, the streetlights were barely visible, and the town's storm siren was nearly inaudible."	**Sample:** In the heavy rain, Wyatt could hardly see the streetlights, and he could just barely hear the storm siren.	A strong plain-words paraphrase explains visible (able to be seen) and inaudible (not able to be heard) with the words see and hear, and keeps both the streetlights and the siren. Auto-check rubric: at least 8 words; no 4 or more words in a row copied from the original; must include: see or seen or saw or spot or view or notice or look; hear or heard or listen; light or streetlight or street or lamp; siren or alarm.
wt_s2	Set 3: Rewrite this sentence in plain words. Explain the three hard words using what their parts mean. Original (Wyatt's weather log): After the storm, a biologist with a portable microscope checked the pond for tiny creatures. Use at least 8 words. Do not copy 4 or more words in a row from the original. (Single words like pond are fine to keep.) Explain biologist in plain words: a scientist who studies life or living things. Explain portable in plain words: use carry (port means carry). Explain microscope in plain words: a tool for looking at small things (micro means small). Original: "After the storm, a biologist with a portable microscope checked the pond for tiny creatures."	**Sample:** Once the storm ended, a scientist who studies living things brought a small magnifying tool that is easy to carry and looked for little animals in the pond.	A strong plain-words paraphrase explains biologist (a person who studies life), portable (able to be carried), and microscope (a tool for looking at small things) in new words. Auto-check rubric: at least 8 words; no 4 or more words in a row copied from the original; must include: life or living or alive; carry or carried or carries; small or tiny or little or magnif or enlarg or bigger or zoom or close.

MATCH-UP ROUND (2 POINTS PER FIRST-TRY MATCH)

ID	Question	Answer	Why (explain to student)
match_s0_1	Set 1: Match therm	**heat**	2 points if matched on the first try.
match_s0_2	Set 1: Match meter	**measure**	2 points if matched on the first try.
match_s0_3	Set 1: Match dict	**say**	2 points if matched on the first try.
match_s0_4	Set 1: Match vis	**see**	2 points if matched on the first try.
match_s0_5	Set 1: Match aud	**hear**	2 points if matched on the first try.
match_s1_1	Set 2: Match tele	**far**	2 points if matched on the first try.
match_s1_2	Set 2: Match port	**carry**	2 points if matched on the first try.
match_s1_3	Set 2: Match graph	**write or record**	2 points if matched on the first try.
match_s1_4	Set 2: Match trans-	**across**	2 points if matched on the first try.
match_s1_5	Set 2: Match mis-	**wrongly**	2 points if matched on the first try.
match_s2_1	Set 3: Match bio	**life**	2 points if matched on the first try.
match_s2_2	Set 3: Match geo	**earth**	2 points if matched on the first try.
match_s2_3	Set 3: Match -less	**without**	2 points if matched on the first try.

ID	Question	Answer	Why (explain to student)
match_s2_4	Set 3: Match -ful	**full of**	2 points if matched on the first try.
match_s2_5	Set 3: Match -ology	**the study of**	2 points if matched on the first try.

BOSS CHALLENGE (8 POINTS EACH)

ID	Question	Answer	Why (explain to student)
b1_s0	Set 1: Two steps: "The night of the storm was unforgettable." Which answer gives the correct meaning AND the correct spelling reason? [It means it can never be forgotten. The t doubles because forget ends in one vowel + one consonant, the stress is on the last part, and -able starts with a vowel. / It means it is easy to forget. The t doubles because forget ends in one vowel + one consonant. / It means it can never be forgotten. The t doubles because un- is a prefix. / It means it happened again. The prefix un- means again.]	**It means it can never be forgotten. The t doubles because forget ends in one vowel + one consonant, the stress is on the last part, and -able starts with a vowel.**	un- (not) + forget + -able (can be) means it cannot be forgotten. The t doubles because forGET ends in one vowel + one consonant, the stress is on the last part, and -able starts with a vowel.
b2_s0	Set 1: Two steps: in this word, in- means "into," spect means "look," and the suffix -or means "person who." After the storm, a person came to look closely into the shed roof to check it for damage. Type the word for that person.	**inspector** (also accepted: inspectors)	Here in- means "into," spect means "look," and -or means "person who." A person who looks into things to check them is an inspector.
b1_s1	Set 2: Wyatt says impassable and inaudible start with two DIFFERENT prefixes with two different meanings. Which explanation is correct? [He is wrong. Both use the same prefix meaning "not." It is spelled im- before b, m, or p, and in- before most other letters. / He is right. im- means "into" and in- means "not." / He is right. im- means "not" and in- means "again." / He is wrong. Neither word has a prefix at all.]	**He is wrong. Both use the same prefix meaning "not." It is spelled im- before b, m, or p, and in- before most other letters.**	Both words use the same prefix meaning "not." It is spelled im- before b, m, or p (impassable) and in- before most other letters (inaudible).
b2_s1	Set 2: Two steps: "The neighborhood children were spectators at the bike race." The root spect means "look," and -or means "person who." What were the children doing at the race? Type one word that ends in -ing.	**watching** (also accepted: looking, viewing, observing, seeing, watch, look)	spect means "look" and -or means "person who," so spectators are people who look on. The children were watching the race.
b1_s2	Set 3: Find the mistakes. Noor wrote: The rain was so heavy that the streetlights were invisable, the cars stayed in their driveways. Which list names ALL of her mistakes? [Invisable should be invisible, and the comma joins two complete sentences, so it needs "so" after it or a period instead. / Only the spelling: invisable should be invisible. / Only the comma: it should be a period. / Streetlights and driveways need capital letters.]	**Invisable should be invisible, and the comma joins two complete sentences, so it needs "so" after it or a period instead.**	Invisible needs -ible because vis is a root that cannot stand alone. Also, the comma joins two complete sentences, so it needs a word like "so" after the comma, or a period in its place.
b2_s2	Set 3: Two steps: the root rupt means "break," and the prefix e- means "out." Put them together. Type the word for what a volcano does when melted rock breaks out of it.	**erupt** (also accepted: erupts, erupted, erupting, eruption)	e- (out) + rupt (break) = erupt. When melted rock breaks out of a volcano, the volcano erupts.

Pre & Post sheet answer guide

Many items are open-ended. Grade for genuine understanding and complete sentences, not exact wording. Sheet: grade4-5/prepost/KCE_Reading_PrePost_G4-5W16.pdf.

PRE-LESSON WARM-UP

#	Prompt	Model answer / grading note
1	Review: noor said the wind is getting stronger	Noor said, "The wind is getting stronger."
2	Meaning of therm and meter	therm = heat; meter = measure (a thermometer measures heat, or temperature). Accept reasonable guesses before the lesson.
3	The prefix un- in unsafe means...	not
4	What does timid mean? Which words helped?	Shy or easily scared. Clue: it hid under the porch whenever a stranger came near.
5	Two words with pre- or re-	Answers vary (for example, preview = see before; redo = do again).

POST-LESSON CHALLENGE

#	Prompt	Model answer / grading note
1	Break apart invisible, portable, geologist	a) in- (not) + vis (see) + -ible (able to be): not able to be seen. b) port (carry) + -able (able to be): able to be carried. c) geo (earth) + -ologist (person who studies): a person who studies the earth.
2	Spell the new words	a) unreliable b) disagreement c) irregular
3	Be the editor	a) After the storm passed, Noor said, "The barometer is rising again." b) Ms. Nwosu showed Wyatt and me the rain gauge.
4	Writing: 3–4 sentences about a storm	Grading note: uses two lesson words correctly, includes one context clue, and has correct capitals, commas and end marks.

★ CHALLENGE

#	Prompt	Model answer / grading note
1	Invent a weather-tool name from two word parts	Answers vary (for example, “windmeter”: a tool that measures wind). The definition must match the parts.
