KCE PATHWAYS · GRADES 4–5 · UNIT 6: VOICES OF CHANGE · WEEK 30 · SCIENCE FINAL CHECKPOINT

Science Final Checkpoint

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

What Do I Remember?

Before the Final Checkpoint, write what you remember from Weeks 26 to 29. Be honest about what you are unsure of. It is OK to guess!

1. What is the difference between **mass** and **weight**? Which one would change on the Moon?

2. Where is most of Earth's **fresh** water? Circle one.

   in rivers and lakes | frozen in ice caps and glaciers | in the oceans

3. Draw a pot of water heating on a stove. Use arrows to show **conduction** through the pot and **convection** in the water. Label each one.

4. Name one way people protected Earth's air, water or living things, and tell what problem it fixed.

5. Which Unit 6 science idea are you still unsure of? Write what confuses you about it.

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Show What I Learned

Use evidence and science words from all four weeks. Write complete sentences.

1. **Two steps!** A 6-kilogram backpack: gravity pulls each kilogram with about 9.8 newtons on Earth and 3.7 newtons on Mars. How many newtons LESS does it weigh on Mars? Show your work.

2. **Find the mistake:** Leocadia says, "A metal spoon feels colder than a wooden spoon in the same drawer, so it is colder." Fix it. Use the words **conductor** and **temperature**.

3. **Explain:** Why is fresh water precious when Earth has so much water? Use two numbers from the U.S. Geological Survey data.

4. **Cause or effect?** Why did stopping CFCs help the ozone layer more than wearing sunscreen? Use the words **cause** and **effect**.

★ **Challenge:** Connect two weeks: explain how the GRACE satellites use gravity (Week 26) to help scientists protect fresh water (Week 27).

Looking Ahead: You finished all 30 weeks of KCE Pathways Science! Keep asking, "What is the evidence?"
