KCE PATHWAYS · GRADES 4-5 · UNIT 3: BUILDING THINGS · FLORIDA FOCUS · SCIENCE

Florida's Space Coast

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

What Do I Already Know?

Answer with what you know right now. It is OK to guess!

1. What do you already know about rockets, astronauts or launches from Florida? Write two things.

2. Predict: Why do you think NASA launches rockets from Florida instead of a state like Kansas or Alaska?

3. Draw a rocket lifting off. Use arrows to show any forces you think are pushing or pulling on it.

4. What is one question you have about the Space Coast?

Florida's Space Coast

Name: _____ **Date:** _____

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Show What I Learned

Use evidence from today's lesson to explain your thinking.

1. Use the spin speed table to explain why Florida is a good place for America's spaceport. Give two numbers as evidence.

2. Draw a rocket at liftoff. Label thrust and gravity with arrows, and explain why the rocket rises.

3. Whose story is this? Name two groups of people, besides astronauts, who are part of the Space Coast's history.

4. Choose one person from today's lesson. What barrier did they break, and why did it matter?

★ **Challenge:** Design a launch site! Choose a real place on a map or globe and use latitude, ocean to the east, weather and wildlife to argue why it would or would not be a good spaceport.

Looking Ahead: This was a bonus Florida lesson. Bring this question back to the unit: how do balanced and unbalanced forces explain both a rolling toy car and a rocket leaving Launch Complex 39B?
