Squares in the Rice Paddies

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

Pre-Lesson Warm-Up: Squares in the Rice Paddies

Do this side before the lesson. Try your best. It is okay if some problems feel new!

1 Draw a rectangle with 2 rows of 5 squares. Count the squares. What is its area in square units?

2 What does area measure?

the space inside a flat shape | the distance around a shape | how heavy a shape is

3 A rice paddy map has 3 rows with 5 squares in each row. What is the area in square units?

4 Write a multiplication fact for the area of a grid with 6 rows and 2 columns.

5 Review: 35 ÷ 7 = ___. Then write one more fact in the same fact family.

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Post-Lesson Challenge: Squares in the Rice Paddies

Do this side after the Boss Battle. Show your work and name your units.

1. A drying mat is 7 meters long and 4 meters wide. What is its area? Remember to name the unit.

2. An L-shaped garden is split into a rectangle 5 meters by 2 meters and a square 3 meters by 3 meters. Find the total area. Show both steps.

3. Minh says a rectangle 6 units long and 3 units wide has an area of 9 square units. Which is correct?

   Minh is right. | The area is 18 square units, because 6 × 3 = 18. | The area is 18 units.

4. Two steps! A paddy is 8 meters long and 5 meters wide. Linh has planted 15 square meters. How many square meters are left to plant?

5. Draw two different rectangles that each have an area of 12 square units. Label the side lengths.

★ **Challenge:** Grandma Hoa's L-shaped paddy has a left part that is 3 meters wide and 6 meters tall. The bottom part stretches 8 meters across and is 2 meters tall. Split the paddy into two rectangles and find the total area. Can you split it a second way and get the same answer?

Looking Ahead: Next week we visit a community garden in Atlanta, Georgia, where you will compare perimeter (the distance around a garden bed) with area (the space inside it).
