KCE PATHWAYS · GRADE 3 · UNIT 3: MARKET DAYS · WEEK 15 · CHECKPOINT

Checkpoint 3 — Market Days Review — Teacher Lesson Plan & Answer Key

Learning objectives: Students show mastery of the Unit 3 math skills (multiplication facts 6–9 and properties; division facts, fact families and unknowns; area; perimeter versus area) and reading skills (main idea and key details; text features; comparing two texts; author's purpose), including two-step problems, “which explanation is correct?” reasoning and “find the mistake” items.

Duration: 35–45 minutes
Materials: Computer or tablet with the lesson open · pencil · printed Checkpoint Pre & Post sheet

Lesson flow (as it appears on screen)

1. Title and name: student types first and last name so results go to KingCretot Experience. Read the Pathway Points rules together.
2. Warm-Up: A Quick Unit 3 Mix (6 pts, 2 each): one multiplication fact, one division or unknown fact, and one reading item.
3. Picture It: The Market Days Scrapbook. Theo and Mia look back at the four stops (orange grove near Arcadia, FL; Chicago bakery; Mekong Delta rice village; Atlanta community garden) before Grandpa's Market Day. Ask the student to name one math skill and one reading skill from each stop.
4. Vocabulary Round-Up: 8 flip cards from across the unit (product, quotient, area, perimeter, main idea, text feature, contrast, author's purpose). Have the student say each meaning before flipping.
5. Pencil Break (Pre): student completes the Pre side of the printed Checkpoint sheet before the review. Do not help yet; it shows what they remember.
6. Math Review: Multiplication Facts 6–9 (Week 11, 6 pts). Tip: if a fact is slow, model the break-apart trick (7 × 6 = 35 + 7).
7. Math Review: Division and Fact Families (Week 12, 6 pts). Tip: have the student say the question aloud: "8 times what number equals 56?"
8. Math Review: Area (Week 13, 6 pts). Tip: insist on the unit name, such as square meters. For L-shapes, split, find each area, then add (never multiply the parts).
9. Math Review: Perimeter or Area? (Week 14, 6 pts). Tip: ask "Is the job around the edge or covering the inside?" Feet for perimeter, square feet for area.
10. Reading Review: Main Idea and Key Details (Week 11, 6 pts). Each set has its own short passage (Helpers at the Grove / Riding the L / Floating Markets). Ask: what is the whole text mostly about?
11. Reading Review: Text Features (Week 12, 6 pts) with the City Gardens booklet page (table of contents, heading, bold word, caption, labeled diagram, glossary). Have the student point to each feature first.
12. Reading Review: Comparing Two Texts (Week 13, 6 pts): Text A (article) and Text B (Rosa's firsthand account) about picking oranges by hand. Check BOTH texts before calling a detail the same.
13. Reading Review: The Author's Purpose (Week 14, 6 pts): PIE with new mini-texts. Ask "Why did the author write this?" before reading the choices.
14. Match-Up Round (10 pts, 2 per first-try match).

15. Fix the Sentence (8 pts, 4 each): typed answers are checked exactly (capital letters, names, end mark, list commas). Both serial-comma and no-serial-comma list forms are accepted.
16. Type-It Corral (8 pts, 4 each): one typed math answer and one typed reading word. Capital letters do not matter; spelling does.
17. Speed Arena and Keyboard Corral (XP only).
18. Boss Battle: Grand Finale at Market Day (20 pts, 4 each): a flyer or sign per set, then purpose or main idea, a two-step math problem, text features or comparing texts, which-explanation-is-correct, and find-the-mistake.
19. Pencil Break (Post): student completes the Post side of the Checkpoint sheet and the star challenge if time allows.
20. Results: 85 or higher shows the Unit 3 Champion congratulations with a big confetti burst; below 85 shows encouragement and a fresh question set on the next try (sets rotate 1, 2, 3). Both remind the student to finish the Post-Lesson Challenge sheet.

Lesson answer key with reasoning

Every scored item the student sees, in order, across all three rotating question sets. The "why" is the same reasoning shown on screen after a second missed try.

WARM-UP: A QUICK UNIT 3 MIX

ID	Question	Answer	Why (explain to student)
w1_s0	Set 1: Quick fact: 7 × 6 = ___	**42**	7 × 6 = 42. You can break it apart: 7 × 5 = 35 and 35 + 7 = 42.
w2_s0	Set 1: Quick fact: 49 ÷ 7 = ___	**7**	Think 7 × ? = 49. Since 7 × 7 = 49, 49 ÷ 7 = 7.
w3_s0	Set 1: What do we call the most important point a text makes about its topic?	**the main idea**	The main idea is the most important point. Key details support it.
w1_s1	Set 2: Quick fact: 8 × 9 = ___	**72**	8 × 9 = 72. Check with the 9s pattern: 7 + 2 = 9.
w2_s1	Set 2: Find the unknown number. 7 × ? = 49	**7**	7 × 7 = 49, so the unknown is 7. You can also divide: 49 ÷ 7 = 7.
w3_s1	Set 2: Which text feature tells what a picture shows?	**a caption**	A caption is the words near a picture that tell what the picture shows.
w1_s2	Set 3: Quick fact: 9 × 6 = ___	**54**	9 × 6 = 54. The tens digit, 5, is one less than 6, and 5 + 4 = 9.
w2_s2	Set 3: Quick fact: 81 ÷ 9 = ___	**9**	Think 9 × ? = 81. Since 9 × 9 = 81, 81 ÷ 9 = 9.
w3_s2	Set 3: A poster says, "Come to the bake sale. It will be the best day ever!" What is the author's purpose?	**to persuade**	The poster asks you to come and uses the opinion best, so the author wants to persuade.

MATH REVIEW: MULTIPLICATION FACTS 6-9 (WEEK 11)

ID	Question	Answer	Why (explain to student)
m11a_s0	Set 1: Two steps! Rosa fills 7 crates with 8 oranges in each crate. Then Mia adds 6 more oranges. How many oranges are there in all?	**62 (also accepted: 62 oranges)**	Step 1: 7 × 8 = 56 oranges. Step 2: 56 + 6 = 62 oranges.

ID	Question	Answer	Why (explain to student)
m11b_s0	Set 1: Which explanation is correct? Theo says 9 × 7 and 7 × 9 have the same product because of the turn-around property. Mia says 9 × 7 is bigger because the 9 comes first.	**Theo is correct.**	Switching the order of the factors keeps the same product. 9 × 7 = 63 and 7 × 9 = 63.
m11a_s1	Set 2: A block of the grove has 9 rows with 6 trees in each row. How many trees are in the block?	**54 (also accepted: 54 trees)**	9 × 6 = 54 trees. Check with the 9s pattern: the tens digit, 5, is one less than 6, and 5 + 4 = 9.
m11b_s1	Set 2: Find the mistake. Mia wrote: 6 × 7 = 6 × 5 + 6 × 2 = 30 + 12 = 44. Which part is wrong?	**30 + 12 is 42, not 44. So 6 × 7 = 42.**	The break-apart was right: 6 × 5 = 30 and 6 × 2 = 12. But 30 + 12 = 42, so 6 × 7 = 42.
m11a_s2	Set 3: Two steps! Theo packs 8 bags with 7 oranges in each bag. Then he eats 3 oranges. How many oranges are left?	**53 (also accepted: 53 oranges)**	Step 1: 8 × 7 = 56 oranges. Step 2: 56 − 3 = 53 oranges.
m11b_s2	Set 3: Rosa has 9 empty crates. Which fact shows how many oranges are in the crates?	**9 × 0 = 0**	Each empty crate holds 0 oranges. Any number times 0 is 0, so 9 × 0 = 0.

MATH REVIEW: DIVISION, FACT FAMILIES AND UNKNOWNS (WEEK 12)

ID	Question	Answer	Why (explain to student)
m12a_s0	Set 1: Lena packs 54 muffins into boxes of 9. How many boxes does she fill?	**6 (also accepted: 6 boxes)**	Think 9 × ? = 54. Since 9 × 6 = 54, 54 ÷ 9 = 6 boxes.
m12b_s0	Set 1: Find the mistake. Kofi wrote this fact family for 6, 8, and 48: 6 × 8 = 48, 8 × 6 = 48, 48 ÷ 8 = 6, 48 ÷ 6 = 9. Which fact does not belong?	**48 ÷ 6 = 9 is wrong. It should be 48 ÷ 6 = 8.**	Every fact in the family uses 6, 8, and 48. Since 6 × 8 = 48, 48 ÷ 6 = 8.
m12a_s1	Set 2: Find the unknown number. ? ÷ 7 = 9	**63**	The starting number is unknown, so multiply: 7 × 9 = 63. Check: 63 ÷ 7 = 9.
m12b_s1	Set 2: Which explanation is correct? Diego has 36 paczki and puts 4 in each box. Diego says he needs 9 boxes because 4 × 9 = 36. Lena says he needs 32 boxes because 36 − 4 = 32.	**Diego is correct.**	36 ÷ 4 = 9, because 4 × 9 = 36. Lena only subtracted one group of four.
m12a_s2	Set 3: Two steps! Babcia bakes 8 trays with 6 rolls on each tray. She packs all the rolls into bags of 8. How many bags does she fill?	**6 (also accepted: 6 bags)**	Step 1: 8 × 6 = 48 rolls. Step 2: 48 ÷ 8 = 6 bags.
m12b_s2	Set 3: Kofi knows 9 × 7 = 63. Which division fact does that help him solve?	**63 ÷ 9 = 7**	9, 7, and 63 are one fact family. Since 9 × 7 = 63, 63 ÷ 9 = 7.

MATH REVIEW: AREA (WEEK 13)

ID	Question	Answer	Why (explain to student)
m13a_s0	Set 1: Linh's seedling tray is covered with unit squares. Each small square is 1 square unit. What is the area of the tray in square units?	**28 (also accepted: 28 square units / 28 square unit / 28 sq units / 28 sq. units)**	The tray has 4 rows of 7 squares. 4 × 7 = 28 square units.
m13b_s0	Set 1: Find the mistake. Minh says a drying mat that is 6 meters long and 3 meters wide has an area of 9 square meters. What went wrong?	**He added 6 + 3. The area is 6 × 3 = 18 square meters.**	Area is rows times columns, not adding the sides. 6 × 3 = 18 square meters.

ID	Question	Answer	Why (explain to student)
m13a_s1	Set 2: Grandma Hoa's paddy is a rectangle 8 meters long and 7 meters wide. What is its area in square meters?	**56 (also accepted: 56 square meters / 56 square meter / 56 sq m / 56 sq. m / 56 m² / 56 sq meters)**	8 × 7 = 56 square meters.
m13b_s1	Set 2: This L-shaped field is split into rectangle A and rectangle B. Each small square is 1 square unit. What is the total area?	**19 square units**	Rectangle A is 2 rows of 5, so 2 × 5 = 10. Rectangle B is 3 rows of 3, so 3 × 3 = 9. Add them: 10 + 9 = 19 square units.
m13a_s2	Set 3: Two steps! Linh lays out 2 drying mats. Each mat is 6 meters long and 4 meters wide. What is the total area of both mats in square meters?	**48 (also accepted: 48 square meters / 48 square meter / 48 sq m / 48 sq. m / 48 m² / 48 sq meters)**	Step 1: one mat is 6 × 4 = 24 square meters. Step 2: 24 + 24 = 48 square meters.
m13b_s2	Set 3: Which explanation is correct? Minh says a rectangle 9 units long and 2 units wide has an area of 18 square units because 9 × 2 = 18. Linh says the area is 11 square units because 9 + 2 = 11.	**Minh is correct.**	Area is rows times columns: 9 × 2 = 18 square units. Adding the sides does not count the squares inside.

MATH REVIEW: PERIMETER AND AREA (WEEK 14)

ID	Question	Answer	Why (explain to student)
m14a_s0	Set 1: Jalen builds a fence around a raised bed that is a rectangle 7 feet long and 3 feet wide. How many feet of fence does he need?	**20 (also accepted: 20 feet / 20 foot / 20 ft)**	A fence goes around the edge, so find the perimeter: 7 + 3 + 7 + 3 = 20 feet.
m14b_s0	Set 1: Ms. Washington wants to fill the inside of a garden bed that is 5 feet long and 4 feet wide with soil. Which answer has the right number and the right unit?	**20 square feet**	Soil covers the inside, so find the area: 5 × 4 = 20 square feet. 18 feet is the perimeter.
m14a_s1	Set 2: Two steps! A rectangular garden bed has a perimeter of 24 feet. Each long side is 8 feet. How long is each short side in feet?	**4 (also accepted: 4 feet / 4 foot / 4 ft)**	Step 1: the two long sides are 8 + 8 = 16 feet, and 24 − 16 = 8 feet are left. Step 2: split 8 feet into two equal short sides: 8 ÷ 2 = 4 feet.
m14b_s1	Set 2: Find the mistake. Mateo says a square flower bed with 6-foot sides has a perimeter of 36 feet. What went wrong?	**He found the area. The perimeter is 6 + 6 + 6 + 6 = 24 feet.**	6 × 6 = 36 is the area in square feet. Perimeter adds all four sides: 6 + 6 + 6 + 6 = 24 feet.
m14a_s2	Set 3: The herb garden has 5 sides. The sides are 6 feet, 4 feet, 5 feet, 4 feet, and 7 feet long. What is the perimeter in feet?	**26 (also accepted: 26 feet / 26 foot / 26 ft)**	Add all the side lengths: 6 + 4 + 5 + 4 + 7 = 26 feet.
m14b_s2	Set 3: Which explanation is correct? Jalen says a 2-foot-by-6-foot bed and a 3-foot-by-5-foot bed have the same perimeter and the same area. Priya says they have the same perimeter, 16 feet, but different areas, 12 and 15 square feet.	**Priya is correct.**	Both perimeters are 16 feet: 2 + 6 + 2 + 6 and 3 + 5 + 3 + 5. But 2 × 6 = 12 and 3 × 5 = 15, so the areas are different.

READING REVIEW: MAIN IDEA AND KEY DETAILS (WEEK 11)

ID	Question	Answer	Why (explain to student)
r11a_s0	Set 1: What is the main idea of Helpers at the Grove?	**Many helpers work together to get oranges from the grove to the store.**	The whole text tells about different helpers who get oranges to the store. The other choices are small details or are not in the text.
r11b_s0	Set 1: Find the mistake. Theo says the main idea of the text is "Pickers climb ladders." What went wrong?	**That is only one key detail. The main idea tells what the whole text is mostly about.**	Pickers climbing ladders is one detail that supports the main idea. The main idea is about all the helpers working together.
r11a_s1	Set 2: Which sentence tells the main idea of Riding the L?	**Chicago's L trains help people get around the city.**	"Chicago's L trains help people get around the city" tells the most important point. The other sentences from the text are key details, and "Chicago has many bakeries" is not in the text.
r11b_s1	Set 2: Which sentence from the text is a key detail that supports the main idea?	**Every day, the L carries hundreds of thousands of riders to work, to school, and to stores.**	This detail shows how the L helps people get around. "Chicago's L trains help people get around the city" is the main idea itself, and the sentences about drawing trains and muffins are not in the text.
r11a_s2	Set 3: What is Floating Markets mostly about?	**Floating markets are busy places to shop in the Mekong Delta.**	The whole text tells how people shop at floating markets. The other choices are only small parts or are not in the text.
r11b_s2	Set 3: Which key detail tells how shoppers know what a boat sells?	**Sellers tie a sample of what they sell to a tall pole.**	The main idea is that floating markets are busy places to shop. The pole with a sample shows shoppers what each boat sells.

READING REVIEW: TEXT FEATURES (WEEK 12)

ID	Question	Answer	Why (explain to student)
r12a_s0	Set 1: Which text feature tells you that page 3 is mostly about feeding the soil?	**the heading**	A heading is a title for one section. Feeding the Soil tells what page 3 is mostly about.
r12b_s0	Set 1: Two steps! Find the bold word on page 3. Then use the glossary. What does the bold word mean?	**a mix of old plant parts that makes soil healthy**	The bold word is compost. The glossary says compost is a mix of old plant parts that makes soil healthy.
r12a_s1	Set 2: Priya wants to read about raised beds. Use the table of contents. Which page should she turn to?	**page 2**	The table of contents shows that Raised Beds starts on page 2.
r12b_s1	Set 2: Find the mistake. Mateo says the words Plant, Soil, and Wooden frame on the diagram are captions. What went wrong?	**They are labels. Labels name the parts of a diagram.**	Words that name the parts of a diagram are labels. A caption is a sentence that tells what a picture shows.
r12a_s2	Set 3: Read the caption under the picture of the compost bin. What does it tell you?	**Jalen is adding leaves to the garden's compost bin.**	A caption tells what a picture shows. This caption says Jalen adds leaves to the compost bin.

ID	Question	Answer	Why (explain to student)
r12b_s2	Set 3: Which explanation is correct? Priya says the glossary is in ABC order so you can find a word fast. Mateo says the glossary lists the page where each section starts.	**Priya is correct.**	A glossary lists important words and their meanings in ABC order. The table of contents lists where sections start.

READING REVIEW: COMPARING TWO TEXTS (WEEK 13)

ID	Question	Answer	Why (explain to student)
r13a_s0	Set 1: Which detail do Text A and Text B BOTH tell?	**Pickers pour oranges from their bags into a big bin.**	Text A says the picker pours the oranges into a big bin, and Rosa says she poured her oranges into the big bin. The other details are in only one text or in neither.
r13b_s0	Set 1: What is one big difference between Text A and Text B?	**Text A gives facts about many pickers. Text B tells one girl's own experience and feelings.**	Text A is an article full of facts. Text B is Rosa's firsthand account, with the words I and my and her feelings.
r13a_s1	Set 2: Which detail can you find ONLY in Text A, the article?	**Trucks carry the bins to a packing house or a juice plant.**	Only Text A tells about trucks. Ladders and the big bin are in both texts, and tired arms are only in Text B.
r13b_s1	Set 2: Find the mistake. Theo says Text A is a firsthand account because it uses the words I and my. What went wrong?	**Text A does not use I or my. Text B is the firsthand account, told by Rosa.**	A firsthand account is told by someone who was there, using words like I and my. That is Text B, not Text A.
r13a_s2	Set 3: Two steps! Find a detail that is only in Text B. Then decide where it goes in a Venn diagram.	**Rosa felt proud. It goes in the Text B circle, outside the middle.**	Only Rosa tells about feeling proud, so that detail goes in the Text B part that does not overlap. Details in both texts go in the middle.
r13b_s2	Set 3: Which explanation is correct? Mia says both texts are about picking oranges by hand. Theo says Text A is about oranges and Text B is about trucks.	**Mia is correct.**	Both texts share the same topic: picking oranges by hand. Text B never talks about trucks.

READING REVIEW: AUTHOR'S PURPOSE (WEEK 14)

ID	Question	Answer	Why (explain to student)
r14a_s0	Set 1: Read: "Rice grows in flooded fields called paddies. Farmers in the Mekong Delta often grow two or three crops of rice each year." What is the author's purpose?	**to inform**	The author gives true facts about rice farming, so the purpose is to inform.
r14b_s0	Set 1: Find the mistake. Jalen says this sign was written to entertain: "Come pick strawberries at our garden this Saturday. It will be the most fun you have all spring!" What went wrong?	**The sign asks readers to come and uses the opinion most fun, so it was written to persuade.**	Asking the reader to do something and using opinion words are clues for persuade.
r14a_s1	Set 2: Read: "Biscuit the pup sniffed the air at the Chicago bakery. A muffin rolled off the counter, and Biscuit chased it all the way down the street!" What is the author's purpose?	**to entertain**	A made-up character and a funny event are clues that the author wants to entertain.

ID	Question	Answer	Why (explain to student)
r14b_s1	Set 2: Two steps! Find the clue, then name the purpose. “Fresh bread is the best breakfast. Visit the Nowak Family Bakery today!”	**Clue: best and visit today. Purpose: to persuade.**	Best is an opinion word, and visit today asks you to act. Both clues point to persuade.
r14a_s2	Set 3: Read: “Step 1: Fill a cup with soil. Step 2: Push a sunflower seed into the soil. Step 3: Water it every day.” What is the author’s main purpose?	**to inform**	Numbered steps are directions that teach you how to do something, so the purpose is to inform.
r14b_s2	Set 3: Which explanation is correct? A flyer gives facts about the garden and then says, “Come help this Saturday!” Mia says the main purpose is to persuade, because the facts help convince readers to come. Theo says the main purpose is to inform, because it has some facts.	**Mia is correct.**	A text can have more than one kind of clue. The author mostly wants readers to come help, so the main purpose is to persuade.

MATCH-UP ROUND (2 POINTS PER FIRST-TRY MATCH)

ID	Question	Answer	Why (explain to student)
match_s0_1	Set 1: Match 7 × 8	**56**	2 points if matched on the first try.
match_s0_2	Set 1: Match 48 ÷ 6	**8**	2 points if matched on the first try.
match_s0_3	Set 1: Match area of a 3 by 9 rectangle	**27 square units**	2 points if matched on the first try.
match_s0_4	Set 1: Match perimeter of a 5 by 2 rectangle	**14 units**	2 points if matched on the first try.
match_s0_5	Set 1: Match 9 × ? = 81	**9**	2 points if matched on the first try.
match_s1_1	Set 2: Match product	**the answer to a multiplication problem**	2 points if matched on the first try.
match_s1_2	Set 2: Match perimeter	**the distance around a shape**	2 points if matched on the first try.
match_s1_3	Set 2: Match caption	**words that tell what a picture shows**	2 points if matched on the first try.
match_s1_4	Set 2: Match compare	**to tell how two things are the same**	2 points if matched on the first try.
match_s1_5	Set 2: Match persuade	**to try to get the reader to do or believe something**	2 points if matched on the first try.
match_s2_1	Set 3: Match inform	**to give facts and teach the reader**	2 points if matched on the first try.
match_s2_2	Set 3: Match glossary	**word meanings in ABC order**	2 points if matched on the first try.
match_s2_3	Set 3: Match key detail	**a fact that supports the main idea**	2 points if matched on the first try.
match_s2_4	Set 3: Match 6 × 9	**54**	2 points if matched on the first try.
match_s2_5	Set 3: Match area of an 8 by 4 rectangle	**32 square units**	2 points if matched on the first try.

FIX THE SENTENCE

ID	Question	Answer	Why (explain to student)
fs1_s0	Set 1: Fix the sentence: theo and mia visited the bakery	**Theo and Mia visited the bakery.**	Theo starts the sentence and is a name, and Mia is a name, so both get capital letters. A telling sentence ends with a period.
fs2_s0	Set 1: Fix the sentence: linh grows rice beans and mangoes	**Linh grows rice, beans, and mangoes. (also accepted: Linh grows rice, beans and mangoes.)**	Linh is a name and starts the sentence, so it gets a capital L. Put commas between the things in the list and end with a period.
fs1_s1	Set 2: Fix the sentence: what is the perimeter of the garden	**What is the perimeter of the garden?**	Start with a capital W. This sentence asks something, so it ends with a question mark.
fs2_s1	Set 2: Fix the sentence: jalen priya and mateo built a fence	**Jalen, Priya, and Mateo built a fence. (also accepted: Jalen, Priya and Mateo built a fence.)**	Each name gets a capital letter, commas go between the names in the list, and the sentence ends with a period.
fs1_s2	Set 3: Fix the sentence: grandma hoa dries rice in the sun	**Grandma Hoa dries rice in the sun.**	Grandma Hoa is a name, so both words get capital letters. A telling sentence ends with a period.
fs2_s2	Set 3: Fix the sentence: kofi sold rolls muffins and bagels	**Kofi sold rolls, muffins, and bagels. (also accepted: Kofi sold rolls, muffins and bagels.)**	Kofi is a name and starts the sentence, so it gets a capital K. Put commas between the things in the list and end with a period.

TYPE-IT CORRAL

ID	Question	Answer	Why (explain to student)
t1_s0	Set 1: A rectangle has 5 rows of 8 unit squares. What is its area in square units?	**40 (also accepted: 40 square units / 40 square unit / 40 sq units / 40 sq. units)**	5 × 8 = 40 square units.
t2_s0	Set 1: In the City Gardens booklet, the words under the compost bin picture tell what the picture shows. That text feature is called a ___.	**caption (also accepted: a caption)**	Words near a picture that tell what it shows are a caption.
t1_s1	Set 2: A square garden bed has sides that are 7 feet long. What is its perimeter in feet?	**28 (also accepted: 28 feet / 28 foot / 28 ft)**	Add all four sides: 7 + 7 + 7 + 7 = 28 feet.
t2_s1	Set 2: When you tell how two texts are different, you ___ them.	**contrast**	To contrast means to tell how two things are different.
t1_s2	Set 3: 45 ÷ 9 = ___	**5**	Think 9 × ? = 45. Since 9 × 5 = 45, 45 ÷ 9 = 5.
t2_s2	Set 3: An author who writes a funny made-up story wants to ___ the reader.	**entertain**	Made-up characters and funny events are written to entertain.

BOSS BATTLE: GRAND FINALE AT MARKET DAY

ID	Question	Answer	Why (explain to student)
bb1_s0	Set 1: What is the main purpose of Grandpa's flyer?	**to persuade**	The flyer asks people to come and bring friends and uses the opinion best market, so it was written to persuade.
bb2_s0	Set 1: Two steps! The booth has 8 tables with 9 jars of honey on each table. By noon, 6 jars are sold. How many jars are left?	**66 (also accepted: 66 jars)**	Step 1: 8 × 9 = 72 jars. Step 2: 72 − 6 = 66 jars.
bb3_s0	Set 1: Which text feature tells what the flyer is mostly about?	**the heading**	The heading, Market Day at the Trading Post, tells what the flyer is mostly about. This flyer has no glossary, table of contents, or diagram.
bb4_s0	Set 1: Which explanation is correct? Theo wants tape all the way around the edge of a rug that is 4 feet by 6 feet. Theo says he needs 20 feet of tape. Mia says he needs 24 feet, because 4 × 6 = 24.	**Theo is correct.**	Tape around the edge is perimeter: 4 + 6 + 4 + 6 = 20 feet. 4 × 6 = 24 is the area in square feet.
bb5_s0	Set 1: Find the mistake. Mia shares 36 rolls equally into 4 baskets. She says each basket gets 8 rolls. What went wrong?	**4 × 8 is 32. Since 4 × 9 = 36, each basket gets 9 rolls.**	Mia used a wrong fact. 4 × 9 = 36, so 36 ÷ 4 = 9 rolls in each basket.
bb1_s1	Set 2: Which sentence from the flyer gives a fact that informs?	**Rice grows in flooded fields called paddies.**	That rice grows in flooded paddies is a true fact. Come and try it asks you to act, and the sentences about the best rice and loving Market Day are not in the flyer.
bb2_s1	Set 2: Two steps! Grandpa builds 2 rice paddy models. Each model is 8 squares long and 5 squares wide. What is the total area of both models in square units?	**80 (also accepted: 80 square units / 80 square unit / 80 sq units / 80 sq. units)**	Step 1: one model is 8 × 5 = 40 square units. Step 2: 40 + 40 = 80 square units.
bb3_s1	Set 2: The main idea of the flyer is that Market Day has rice to see and taste. Which detail from the flyer supports it?	**Grandpa will cook rice for everyone at noon.**	Cooking rice for everyone supports the idea of rice to see and taste. The other sentences are not in the flyer.
bb4_s1	Set 2: Find the mistake. Theo wrote this fact family for 3, 8, and 24: 3 × 8 = 24, 8 × 3 = 24, 24 ÷ 3 = 8, 24 ÷ 8 = 4. Which fact is wrong?	**24 ÷ 8 = 4 is wrong. It should be 24 ÷ 8 = 3.**	The family uses 3, 8, and 24. Since 8 × 3 = 24, 24 ÷ 8 = 3.
bb5_s1	Set 2: Which explanation is correct? Mia wants to put ribbon around the edge of the model that is 8 squares long and 5 squares wide. Mia says she needs the perimeter, 26 units. Theo says she needs the area, 40 square units.	**Mia is correct.**	Ribbon around the edge is perimeter: 8 + 5 + 8 + 5 = 26 units. 8 × 5 = 40 is the area.
bb1_s2	Set 3: What is the main purpose of the Bean Plant Facts sign?	**to inform**	The sign gives true facts about bean plants and does not ask you to do anything, so it was written to inform.
bb2_s2	Set 3: Two steps! The booth has 7 rows of bean plants with 6 plants in each row. Mateo gives away 5 plants. How many plants are left?	**37 (also accepted: 37 plants)**	Step 1: 7 × 6 = 42 plants. Step 2: 42 − 5 = 37 plants.

ID	Question	Answer	Why (explain to student)
bb3_s2	Set 3: Mateo reads the Bean Plant Facts sign and a story about a bean that can talk. How are the two texts different?	**The sign gives true facts. The story is made up to entertain.**	A sign with true facts informs. A talking bean is a made-up character, so the story entertains.
bb4_s2	Set 3: Find the mistake. Priya finds the area of a garden bed that is 7 feet by 3 feet: 7 + 3 + 7 + 3 = 20 square feet. What went wrong?	**She found the perimeter. The area is 7 × 3 = 21 square feet.**	Adding the sides gives the perimeter, 20 feet. Area is 7 × 3 = 21 square feet.
bb5_s2	Set 3: Which explanation is correct? To find 64 ÷ 8, Mateo thinks 8 × 8 = 64. Jalen thinks 64 − 8 = 56.	**Mateo is correct.**	Division undoes multiplication. 8 × 8 = 64, so 64 ÷ 8 = 8. Jalen only took away one group of eight.

Pre & Post sheet answer guide

Many items are open-ended. Grade for genuine understanding and complete sentences, not exact wording.

PRE-LESSON WARM-UP

#	Prompt	Model answer / grading note
1	8 × 7 and 54 ÷ 6	56; 9 (because 6 × 9 = 54).
2	Area of a 5 by 4 rectangle	5 × 4 = 20 square units (4 × 5 = 20 also accepted).
3	Perimeter of a 6 ft by 2 ft bed	6 + 2 + 6 + 2 = 16 feet.
4	Main idea of the bee text	Bees help gardens grow.
5	Feature with word meanings at the back	glossary
6	Lemonade sign purpose	persuade (it asks you to buy and uses the opinion "best").

POST-LESSON CHALLENGE

#	Prompt	Model answer / grading note
1	6 crates of 9 oranges, give away 8	Step 1: 6 × 9 = 54 oranges. Step 2: 54 − 8 = 46 oranges left.
2	Fact family for 7, 8, and 56	7 × 8 = 56, 8 × 7 = 56, 56 ÷ 7 = 8, 56 ÷ 8 = 7.
3	L-shape 4 by 3 and 2 by 5; fence	4 × 3 = 12 and 2 × 5 = 10; 12 + 10 = 22 square units. A fence goes around the edge, so it needs perimeter.
4	Same and different (two bakery texts)	Same: both are about baking bread at night (in a bakery). Different: Text A gives facts about many bakers; Text B is a firsthand account with I and feelings (smell of butter, sleepy and happy). Accept any accurate pair.
5	Which sentence entertains	A grumpy carrot refused to leave the garden, so the kids sang it a song.

★ CHALLENGE

#	Prompt	Model answer / grading note
1	Booth with area 24 square units	Any rectangle with area 24: 1 by 24 (perimeter 50), 2 by 12 (perimeter 28), 3 by 8 (perimeter 22), or 4 by 6 (perimeter 20). The second rectangle must also have area 24 with a different perimeter. The sentence should persuade (opinion words or asking people to visit).
