Hurricanes and Florida Weather

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

Page 1 (Pre): What I Already Know

Do this before the lesson. It is OK to guess!

1. What do you already know about hurricanes? Write two things.

2. Predict: What do you think makes a hurricane grow stronger? Why?

3. Draw what you think a hurricane looks like from space. Label any parts you know.

4. What is one question you have about hurricanes?

Hurricanes and Florida Weather

Name: _____ **Date:** _____

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Page 2 (Post): What I Learned

Do this after the lesson. Use evidence from the lesson.

1. Explain how warm ocean water and the water cycle help a hurricane form.

2. Draw a hurricane from above. Label the eye, the eyewall and a rain band. Add arrows to show which way it spins.

3. Use the storm track table: What happened to the storm on Day 6, and what evidence explains why?

4. A storm is only Category 1, but your family's evacuation zone is told to leave. What should you do, and why?

★ **Challenge:** The hurricane category measures only wind. Design a better 'danger score' for families. What else would you include, such as surge, rain or storm size? Explain why.

Looking Ahead: Keep watching the weather this week. Bring this question: How does the Sun's energy power the water cycle, everyday weather and hurricanes?
