KCE PATHWAYS · GRADE 3 · UNIT 4: PARTS AND PIECES · WEEK 17 · MATH

The Long Lane at Clover Creek Dairy

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

Pre-Lesson Warm-Up: Down the Farm Lane

Try your best on each problem. Draw a picture if it helps! It is okay if some of it feels new.

1 Review: At Russo's Pizza Kitchen, a pizza is cut into 8 equal slices. 5 slices have pepperoni. What fraction of the pizza has pepperoni?

2 Mrs. Jensen's farm lane goes from the barn at 0 to the gate at 1. Draw a line from 0 to 1. Split it into 2 equal parts. Write a fraction for the middle point.

3 A line from 0 to 1 is cut into 4 equal spaces. How many tick marks does it have? Count the marks at 0 and at 1 too.

3 | 4 | 5 | 6

4 Wen and Zuri have two cheese blocks that are the same size. Wen cuts his into 2 equal pieces and takes 1. Zuri cuts hers into 4 equal pieces and takes 2. Draw both blocks. Who has more cheese?

Wen | Zuri | They have the same amount

5 Which fraction is the same as 1 whole?

1/4 | 2/4 | 4/4 | 4/8

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Post-Lesson Activity: Posts on the Lane

*Count the **jumps** from 0, not the tick marks. Fractions that land on the same point are **equivalent**.*

1. Draw a number line from 0 to 1 in 3 equal parts. Label each tick. Mark a post at 2/3 of a mile with a P.

2. Two steps: Posts are every 1/8 of a mile. Zuri walks to the 6th post. Write how far in eighths, then fourths.

3. Find the mistake: Wen says 2/6 = 2/3 because the numerators match. What went wrong? What is 2/3 in sixths?

4. Explain why 7/6 is NOT between 0 and 1 on a number line. Use the word jumps.

★ **Challenge:** Draw a number line in fourths with a number line in eighths right under it. Circle each pair of fractions that land on the same point.

Looking Ahead: Next week, at a Gee's Bend quilting day, you will compare fractions using <, >, and =.
