PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

What Do I Already Know?

Do this before your lesson. It is OK to guess!

1. Review: Name **two** things every living thing needs.

2. What does a **caterpillar** turn into? How do you think it changes?

3. Draw a baby animal next to its parent. Circle **one way** they look different.

4. **Predict:** Does a baby frog look like its parent? Why do you think so?

5. What is one question you have about how living things grow?

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Show What You Learned

Do this after your lesson. Use what you learned and the Lab evidence.

1. Put the butterfly stages in order: **adult, larva, egg, pupa**.

2. Use the Butterfly Journal. How many days were they inside a chrysalis? Show how you know.

3. Name **two** ways a tadpole is different from an adult frog.

4. Be like Maria Merian. Draw and label the **four stages** of a butterfly.

★ **Challenge:** Long ago, many people said insects came from mud. What evidence did Merian use to show they were wrong?

Looking Ahead: Next week we learn about **habitats and adaptations**: how body parts and behaviors help animals survive. Bring a question: why does a duck have webbed feet?
