KCE PATHWAYS · GRADES 4-5 · UNIT 1: FIRST STEPS · WEEK 5 · SCIENCE CHECKPOINT

Science Checkpoint: Unit 1

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

What Do I Remember?

Before the checkpoint, write what you remember from Weeks 1–4. Be honest about what you are unsure of. It is OK to guess!

1. Which Unit 1 idea do you feel sure about? Explain it in one or two sentences.

2. Which idea are you still unsure of? Write what confuses you about it.

3. From memory, name the three kinds of variables in a fair test and what each one means.

4. Draw a food chain with at least three living things. Label the producer and draw the arrows the right way.

5. Name one scientist or group from Unit 1 and what their evidence showed.

KCE PATHWAYS · GRADES 4-5 · UNIT 1: FIRST STEPS · WEEK 5 · SCIENCE CHECKPOINT

Science Checkpoint: Unit 1

Name: _____ **Date:** _____

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Show What I Learned in Unit 1

Use evidence and vocabulary from all four weeks to explain your thinking.

1. Write the photosynthesis equation. Then explain why it makes plants the producers in a food web.

2. Pick one adaptation. Explain how it helps survival, and what could happen to the population if the environment changed.

3. Look back at Page 1. What did you get right, and what do you understand better now?

4. Connect two weeks: choose a scientist or group (such as Rachel Carson or the Haudenosaunee farmers) and explain how they used careful observation or evidence. Why does their knowledge count as science?

★ **Challenge:** Design a fair test that connects two weeks, such as how light affects a plant that an animal eats. Write your question, your hypothesis, the independent variable, the dependent variable and two controlled variables.

Looking Ahead: Week 6 starts Unit 2 with Weathering, Erosion and Landforms: how wind, water and ice shape the land, featuring geologist Florence Bascom. Question to bring: How could flowing water, over a very long time, carve a canyon out of solid rock?
