KCE PATHWAYS · GRADES 4–5 · UNIT 5: CHARTING THE COURSE · WEEK 22 · READING

Footprints in the Fine Powder — Teacher Lesson Plan & Answer Key

Learning objectives: Students tell a firsthand account from a secondhand account, ask "firsthand about what?", compare the focus, details and point of view of two accounts of the same event, decide what each account can and cannot tell a reader, quote a firsthand source exactly, and retell and compare the accounts in their own words.

Duration: 35–45 minutes
Materials: Computer or tablet with the lesson open · pencil · printed Pre & Post sheet

Lesson flow (as it appears on screen)

1. Slide 0 — Intro and name capture: Abena and her cousin Achille are writing a report about Apollo 11, the 1969 mission that first landed people on the Moon, using the astronauts' own words and an encyclopedia-style article. The student types first and last name so results go to KingCretot Experience. Read the scoring rules together: 2 tries per question, Pathway Points only for a correct first try, and the answer plus the reason appear after the 2nd miss. Typed one-word answers ignore capital letters and are accepted when the answer contains an accepted word.
2. Slide 1 — Warm-Up: Week 21 Review (8 pts, 4 each): text structures and signal words.
3. Slide 2 — Pencil Break (Pre): the student opens or prints the Pre/Post sheet (grade4-5/prepost/KCE_Reading_PrePost_G4-5W22.pdf) and completes Page 1 (Pre-Lesson Warm-Up) on paper before any teaching.
4. Slide 3 — Picture It: Were You There? A firsthand account comes from someone who was there (I, we, my, our; feelings, senses, close-up details); a secondhand account comes from someone who was not there, using other sources (he, she, they; dates, numbers, background). Ask "Firsthand about WHAT?": Michael Collins orbited the Moon but did not walk on it.
5. Slide 4 — Vocabulary Round-Up: 6 flip cards (firsthand account, secondhand account, perspective, transcript, adhere, desolation).
6. Slide 5 — Your Turn: Using the Words (8 pts, 4 each): one multiple-choice and one typed vocabulary item.
7. Slide 6 — Text A: In Their Own Words (5 pts). Short excerpts from NASA's corrected transcript of July 20, 1969 (Apollo 11 Lunar Surface Journal): "The Eagle has landed," "That's one small step for (a) man; one giant leap for mankind," the powdery surface, and "Magnificent desolation." Use the excerpt numbers.
8. Slide 7 — Text B: The Encyclopedia Article (5 pts). An original secondhand article built from NASA facts: launch on July 16, 1969, from Kennedy Space Center; landing in the Sea of Tranquility on July 20 while Collins orbited in Columbia; about two and a half hours outside; more than 40 pounds of samples; more than 21 hours on the surface; return on July 24.
9. Slide 8 — Compare the Two Accounts (10 pts, 5 each): focus, details and feelings in each account, plus Grandpa Abner's invented interview (firsthand about watching on television, secondhand about the Moon itself).
10. Slide 9 — Teach: How to Compare Two Accounts. Four questions: who told it, and were they there for that part; what is the focus; what does only one account give; what can each NOT tell. Model the frame "Both accounts tell about ___. The firsthand account focuses on ___, while the secondhand account focuses on ___," and quote a firsthand source exactly.

11. Slide 10 — Account Detective (12 pts, 6 each): pick the strongest comparison, decide which source can answer which question, and catch the mistakes.
12. Slide 11 — Fix the Sentence, Part 1 (8 pts, 4 each): each item names the one kind of fix. The whole sentence is checked exactly (straight or curly quotes and extra spaces are OK). The corrected sentence appears after the 2nd miss.
13. Slide 12 — Fix the Sentence, Part 2 (8 pts, 4 each): two more sentences, same rules.
14. Slide 13 — Quote the Firsthand Source (4 pts): quote what Armstrong said, starting with the tag shown, a comma, and the exact words in quotation marks with the end mark inside. Checked exactly.
15. Slide 14 — Writer's Turn: In Your Own Words (6 pts): one typed answer auto-checked by rules: a minimum word count; no 4 or more words in a row copied from the original (allowed names count as one word); and every key idea included. Feedback names the rule that was missed, and a model answer appears after the 2nd miss. Encourage covering the original before writing.
16. Slide 15 — Match-Up Round (10 pts): account words, Apollo 11 names and places, or words from the transcript matched to meanings (a different set each attempt), 2 pts each on the first try.
17. Slide 16 — Speed Trail (bonus XP only): 3 quick questions against the student's own best time.
18. Slide 17 — Boss Challenge (16 pts, 8 each): two-step items (who was there and for which part, then the right evidence or the exact quotation).
19. Slide 18 — Pencil Break (Post): the student completes Page 2 (Post-Lesson Activity) of the same sheet (grade4-5/prepost/KCE_Reading_PrePost_G4-5W22.pdf), including the writing item and the ★ Challenge if time allows, before seeing the score.
20. Slide 19 — Results (Accounts Compared!): the score out of 100 is sent to KingCretot Experience. 85 or higher shows "Account Analyst!" with the congratulations message "Account analyst! You can tell who was there and what each source can show!" and a big confetti burst; below 85 shows "Keep Going!" with encouragement ("You're getting closer, and every try makes you stronger."), and the next attempt brings a fresh question set (sets rotate 1, 2, 3). Both messages remind the student to finish the Post-Lesson Challenge sheet.

Lesson answer key with reasoning

Every scored item the student sees, in order, across all three rotating question sets. Each item allows 2 tries and earns Pathway Points only on a correct first try. The "why" is the same reasoning shown on screen after a second missed try.

WARM-UP: WEEK 21 REVIEW (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
rv1_s0	Set 1: Read: The Apollo 11 crew launched on July 16, 1969. Four days later, their lunar module landed on the Moon. Finally, on July 24, the crew returned to Earth. Which text structure does this passage use? [Chronology / Compare and contrast / Problem and solution / Description]	**Chronology**	The passage moves through dates in order (July 16, four days later, July 24) with time signals like "Four days later" and "Finally," so it is chronology (Week 21).
rv2_s0	Set 1: Type your answer: last week's Text B said, "Because rain and snow were scarce, crops failed." The word Because signals the structure called cause and ___.	**effect** (also accepted with "a" or "an" or in the plural)	"Because" introduces a cause, and the failed crops are the effect. The structure is cause and effect (Week 21).

ID	Question	Answer	Why (explain to student)
rv1_s1	Set 2: Which group of signal words points to COMPARE AND CONTRAST? [both, however, unlike / at first, later, finally / because, as a result, led to / for example, such as, in addition]	**both, however, unlike**	Both, however, and unlike show how things are alike and different, so they signal compare and contrast. The other groups signal time order, cause and effect, and description (Week 21).
rv2_s1	Set 2: Type your answer: at Mesa Verde, water was scarce, so people built near seep springs and dug reservoirs. That part of last week's Text B used the structure problem and ___.	**solution** (also accepted with "a" or "an" or in the plural)	Scarce water was the problem, and building near seep springs and reservoirs were solutions, so that part used problem and solution (Week 21).
rv1_s2	Set 3: Find the mistake! Abel says last week's Text A, "From Pithouses to Cliff Dwellings," was cause and effect "because it says families migrated." Which explanation is correct? [He is wrong. Text A was organized in time order, with signal words like At first, Later, Then, and Finally. / He is right. Any text that mentions moving is cause and effect. / He is wrong. Text A was a poem, so it had no structure. / He is wrong. Text A compared Colorado and Florida.]	**He is wrong. Text A was organized in time order, with signal words like At first, Later, Then, and Finally.**	Mentioning that families migrated does not make a text cause and effect. Last week's Text A was built on a timeline, with each paragraph starting with a time signal: At first, Later, Then, Finally (Week 21).
rv2_s2	Set 3: Type your answer: a text that gives the features, details, and examples of ONE topic (like the passage about kivas) uses the structure called ___.	**description** (also accepted: descriptive, describe)	A text that lists the features, details, and examples of one topic, like the kiva passage, uses description (Week 21).

YOUR TURN: USING THE WORDS (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
v1_s0	Set 1: Neil Armstrong said the Moon dust "does adhere in fine layers, like powdered charcoal, to the sole and sides of my boots." Using the context, what does adhere mean? [Stick to / Melt into / Bounce off / Blow away from]	**Stick to**	The dust forms "fine layers" on the "sole and sides" of his boots, the way powdered charcoal would. Something that forms layers on your boots is sticking to them, so adhere means stick.
v2_s0	Set 1: Type your answer: an account told by someone who was there and saw the event is a ___ account.	**firsthand** (also accepted: first-hand, first hand)	An account by someone who was there is a firsthand account.
v1_s1	Set 2: Buzz Aldrin looked out at the gray, airless Moon and said, "Magnificent desolation." What does desolation mean? [A bare, empty place with no life / A crowded, noisy city / A colorful garden / A deep, blue ocean]	**A bare, empty place with no life**	Aldrin was looking out at a gray land with no air, water, plants, or animals. Desolation means a bare, empty place with no life. "Magnificent" adds that it was still grand to see.
v2_s1	Set 2: Type your answer: a written copy of the words people spoke, like NASA's record of the astronauts' radio messages, is called a ___.	**transcript** (also accepted with "a" or "an" or in the plural)	A written copy of spoken words is a transcript. NASA made transcripts of every radio message from Apollo 11.

ID	Question	Answer	Why (explain to student)
v1_s2	Set 3: Armstrong said the Moon “has a stark beauty all its own. It’s like much of the high desert of the United States.” What does stark most likely mean here? [Plain and bare, with nothing extra / Bright and full of color / Soft and fuzzy / Loud and busy]	**Plain and bare, with nothing extra**	Armstrong compares the Moon to a high desert: bare and plain, with no trees or color, yet beautiful. Stark means plain and bare, with nothing extra.
v2_s2	Set 3: Type your answer: an account written by someone who was NOT there, using other sources, is a ___ account.	**secondhand** (also accepted: second-hand, second hand)	An account by someone who was not there, built from other sources, is a secondhand account.

TEXT A: IN THEIR OWN WORDS (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
sa_s0	Set 1: Type your answer: in excerpt 3, Armstrong says the Moon dust sticks to his boots in fine layers, like powdered ___.	**charcoal** (also accepted: powdered charcoal)	In excerpt 3, Armstrong says the dust sticks to his boots “in fine layers, like powdered charcoal.”
sa_s1	Set 2: Which clue BEST shows that Text A is a firsthand account? [Armstrong uses I and my and describes what he feels and sees with his own boots. / It lists the names of all three astronauts and their jobs. / It tells the date the crew returned to Earth. / It explains how many pounds of rock were collected.]	**Armstrong uses I and my and describes what he feels and sees with his own boots.**	Armstrong says I, my toe, and my boots, and he describes what he can feel and see right where he stands. That is the voice of someone who was there. Dates, crew lists, and later events are things a secondhand account usually adds.
sa_s2	Set 3: Type your answer: according to excerpt 3, Armstrong’s boots sank in only a small fraction of an inch, maybe one ___ of an inch.	**eighth** (also accepted: 1/8, one eighth, one-eighth; with “a” or “an” or in the plural)	Excerpt 3 says, “I only go in a small fraction of an inch, maybe an eighth of an inch.”

TEXT B: THE ENCYCLOPEDIA ARTICLE (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
sb_s0	Set 1: Which detail appears in Text B but NOT in Text A? [The rocket launched on July 16, 1969, from Kennedy Space Center in Florida. / The surface was fine and powdery. / “The Eagle has landed.” / Aldrin called the view “magnificent desolation.”]	**The rocket launched on July 16, 1969, from Kennedy Space Center in Florida.**	Only Text B gives the launch date and place (July 16, 1969, from Kennedy Space Center in Florida). The powdery surface, “The Eagle has landed,” and “Magnificent desolation” all come from Text A.
sb_s1	Set 2: Type your answer: according to paragraph 2 of Text B, which astronaut stayed in orbit around the Moon instead of landing?	**collins** (also accepted: michael collins, mike collins)	Paragraph 2 says, “Collins stayed behind, orbiting the Moon in the command module Columbia.”
sb_s2	Set 3: Which clue BEST shows that Text B is a secondhand account? [It calls the astronauts they and the crew, and it gathers dates, numbers, and later events from records. / It uses I and my to describe how the dust felt. / It was written by one of the astronauts. / It is full of the writer’s own feelings about standing on the Moon.]	**It calls the astronauts they and the crew, and it gathers dates, numbers, and later events from records.**	The writer refers to the astronauts as they and the crew, never I or we, and pulls together dates, numbers, and later events from records. That is how a secondhand account sounds. A secondhand writer does not have to be famous, and Text B has no feelings told in the first person.

COMPARE THE TWO ACCOUNTS (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
qp1_s0	Set 1: How do the two accounts describe the Moon's surface DIFFERENTLY? [Text A gives close-up sensory details, like dust "like powdered charcoal"; Text B gives facts, like the amount of rock collected. / Text A gives the weight of the rocks; Text B describes how the dust felt. / Both accounts describe the surface in exactly the same words. / Neither account mentions the surface at all.]	**Text A gives close-up sensory details, like dust "like powdered charcoal"; Text B gives facts, like the amount of rock collected.**	Text A describes the surface up close through the senses: fine, powdery, like charcoal, with treads in the dust. Text B reports facts about the mission, such as the amount of rock collected. The other answers reverse the accounts or invent details.
qp2_s0	Set 1: Type your answer: two steps. First decide which account covers the WHOLE mission. Then use it: on what date (month and day) did the crew return to Earth?	**july 24** (also accepted: 24)	Only the secondhand account covers the whole mission. Paragraph 4 of Text B says, "The crew returned safely to Earth on July 24, 1969."
qp1_s1	Set 2: Find the mistake! Acacia says, "A firsthand account is ALWAYS more useful than a secondhand one." Which explanation is correct? [Not always. A firsthand account shows one close-up view; a secondhand account can combine many sources to show the big picture. Researchers use both. / She is right. Secondhand accounts are always wrong. / She is wrong. Firsthand accounts are always wrong. / She is right, because firsthand accounts always include dates.]	**Not always. A firsthand account shows one close-up view; a secondhand account can combine many sources to show the big picture. Researchers use both.**	Neither kind is always better. A firsthand account gives close-up details but only one view at one moment. A secondhand account can check many sources and give the big picture, but it loses the personal feelings. Careful researchers use both.
qp2_s1	Set 2: Type your answer: in excerpt 3 of Text A, which one-letter pronoun does Armstrong use to talk about himself?	**I**	In excerpt 3, Armstrong says I three times ("I can kick it up," "I only go in," "I can see") and my three times. First-person words like I and my are a firsthand clue.
qp1_s2	Set 3: Two steps: is Grandpa Abner's interview a firsthand account? Which explanation is correct? [It is firsthand about watching on television with his family, but secondhand about the Moon itself. / It is firsthand about walking on the Moon. / It is not an account at all, because it is spoken. / It is secondhand about everything, even his own living room.]	**It is firsthand about watching on television with his family, but secondhand about the Moon itself.**	Grandpa Abner really was there in his living room, so he is a firsthand witness to watching the broadcast and to his family's reactions. He was not on the Moon, so anything he says about the Moon itself is secondhand: he learned it from the television.
qp2_s2	Set 3: Type your answer: Michael Collins could give a firsthand account of orbiting the Moon, but not of walking on it. Use Text B: what was the name of the command module he flew?	**columbia**	Paragraph 2 of Text B says Collins orbited the Moon "in the command module Columbia." He was a firsthand witness to orbiting, not to the moonwalk.

ACCOUNT DETECTIVE (6 POINTS EACH)

ID	Question	Answer	Why (explain to student)
d1_s0	Set 1: Which is the BEST comparison of Text A and Text B? [Both tell about the first Moon landing. Text A gives the astronauts' own close-up words about the surface, while Text B gives the big picture: dates, crew, and what they did. / Text A is way more exciting, and Text B is boring. / Text A gives the launch date and the crew's names, while Text B describes how the dust felt. / Both texts were written by Neil Armstrong.]	**Both tell about the first Moon landing. Text A gives the astronauts' own close-up words about the surface, while Text B gives the big picture: dates, crew, and what they did.**	The best comparison names the shared topic and the different focus of each account: close-up words from the surface versus the big picture of the mission. The others give opinions, reverse the accounts, or say something false.
d2_s0	Set 1: Find the mistake! Abel wrote: "Text B is a firsthand account because it tells exactly what happened." Which explanation is correct? [Being accurate does not make it firsthand. The writer of Text B was not there, so it is secondhand. / He is right. Any account with dates is firsthand. / He is wrong because Text B has mistakes in it. / He is right because encyclopedias are written by astronauts.]	**Being accurate does not make it firsthand. The writer of Text B was not there, so it is secondhand.**	Giving accurate facts does not make an account firsthand. What matters is whether the teller was there. The writer of Text B was not on the Moon, so it is secondhand, even though its facts are correct.
d1_s1	Set 2: Which question can ONLY Text A answer? [What did the Moon dust do when Armstrong kicked it with his toe? / On what date did the rocket launch? / Which astronaut stayed in orbit? / When did the crew return to Earth?]	**What did the Moon dust do when Armstrong kicked it with his toe?**	Only Armstrong, who was standing on the Moon, could tell how the dust felt under his boots; Text A has that in excerpt 3. The launch date, who stayed in orbit, and the return date are all in Text B only.
d2_s1	Set 2: Which question can ONLY Text B answer? [About how many hours did Armstrong and Aldrin stay on the surface? / What did Aldrin say about the view? / Did Armstrong have trouble walking? / What did Armstrong compare the Moon to?]	**About how many hours did Armstrong and Aldrin stay on the surface?**	Text B gives the time on the surface (more than 21 hours). Text A only holds a few minutes of spoken words, so it cannot answer that. How the view looked, how walking felt, and what Aldrin said are all in Text A.
d1_s2	Set 3: Text B never includes Aldrin's words "Magnificent desolation." Which explanation is correct? [Text B's purpose is to give the big picture in a neutral voice, so it reports facts instead of personal reactions. / Aldrin never really said it. / The quote was kept secret until last year. / Encyclopedias are not allowed to mention Aldrin.]	**Text B's purpose is to give the big picture in a neutral voice, so it reports facts instead of personal reactions.**	An encyclopedia article aims to give the big picture in a neutral voice, so it reports facts rather than personal reactions. The quote is real and not secret; it just does not fit the article's purpose.
d2_s2	Set 3: Find the mistake! Achille wrote in his notes: "Text A says the rocket launched on July 16 from Florida." What is wrong? [That fact comes from Text B. Text A holds only the astronauts' words from the Moon on July 20. / The rocket actually launched from Texas. / Nothing is wrong. Text A gives the launch date. / The rocket launched on July 24.]	**That fact comes from Text B. Text A holds only the astronauts' words from the Moon on July 20.**	The launch date and the launch site come from Text B, paragraph 1. Text A holds only words the astronauts spoke on July 20, so Achille credited the wrong source.

FIX THE SENTENCE (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
fs1_s0	Set 1: Dates: add the TWO missing commas. On July 20 1969 the Eagle landed on the Moon.	**On July 20, 1969, the Eagle landed on the Moon.**	Put a comma between the day and the year, and another comma after the year when the sentence keeps going.
fs2_s0	Set 1: Quotation punctuation: add the missing comma. Armstrong said "The Eagle has landed."	**Armstrong said, "The Eagle has landed."**	When the speaker tag comes before the quotation, put a comma after the tag.
fs3_s0	Set 1: Comma after an introductory phrase: add the missing comma. After the landing Armstrong radioed Houston.	**After the landing, Armstrong radioed Houston.**	Put a comma after an introductory phrase like “After the landing.”
fs4_s0	Set 1: Grammar: fix the verb so it agrees with the subject. Armstrong and Aldrin was the first people to walk on the Moon.	**Armstrong and Aldrin were the first people to walk on the Moon.**	“Armstrong and Aldrin” is a compound subject (two people), so it needs the plural verb “were,” not “was.”
fs1_s1	Set 2: Capital letters: fix the SIX capital-letter mistakes. neil armstrong and buzz aldrin landed in the sea of tranquility.	**Neil Armstrong and Buzz Aldrin landed in the Sea of Tranquility.**	Capitalize people’s names (Neil, Armstrong, Buzz, Aldrin) and the important words in a place name (Sea, Tranquility). Small words like “of” and “the” inside a name stay lowercase.
fs2_s1	Set 2: Quotation punctuation: move the period to the right spot. Aldrin called it "magnificent desolation".	**Aldrin called it "magnificent desolation."**	In American English, a period at the end of a quotation goes inside the closing quotation mark.
fs3_s1	Set 2: Commas around a renaming phrase: add the TWO missing commas. Michael Collins the command module pilot stayed in orbit.	**Michael Collins, the command module pilot, stayed in orbit.**	“The command module pilot” renames Michael Collins in the middle of the sentence, so it gets a comma on each side.
fs4_s1	Set 2: Grammar: fix the pronoun mistake. My grandpa and me watched the old video.	**My grandpa and I watched the old video.**	“My grandpa and I” is the subject of the sentence, so use “I,” not “me.” Test it: you would say “I watched,” not “me watched.”
fs1_s2	Set 3: Quotation capitalization: fix the capital-letter mistake. Aldrin said, "beautiful view!"	**Aldrin said, "Beautiful view!"**	The first word of a quoted sentence is capitalized, even in the middle of your sentence.
fs2_s2	Set 3: Quotation punctuation: Armstrong’s words end with an exclamation point. Move it to the right spot. "Isn't that something"! Armstrong replied.	**"Isn't that something!" Armstrong replied.**	The exclamation point belongs to Armstrong’s words, so it goes inside the closing quotation mark, before the speaker tag.
fs3_s2	Set 3: Commas in a series: add the commas between the three actions. The astronauts set up instruments planted a flag and collected rocks.	**The astronauts set up instruments, planted a flag, and collected rocks.** (also accepted: The astronauts set up instruments, planted a flag and collected rocks.)	Use commas to separate the three actions in a series: set up instruments, planted a flag, and collected rocks.
fs4_s2	Set 3: Grammar: fix the past-tense verb. Their boots leaved footprints in the dust.	**Their boots left footprints in the dust.**	“Leave” is an irregular verb. Its past tense is “left,” not “leaved.”

QUOTE THE FIRSTHAND SOURCE (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
qt_s0	Set 1: Quote Armstrong's description of the Moon. Start with the tag shown, then add a comma, quotation marks, and the end mark. Original (Text A, excerpt 5): It has a stark beauty all its own. Start with: Neil Armstrong said	**Neil Armstrong said, "It has a stark beauty all its own."**	Put a comma after the tag, then copy every exact word inside quotation marks, with the period inside. Note "its" has no apostrophe here.
qt_s1	Set 2: Quote Armstrong's first description of the surface. Start with the tag shown, then add a comma, quotation marks, and the end mark. Original (Text A, excerpt 3): Yes, the surface is fine and powdery. Start with: Neil Armstrong said	**Neil Armstrong said, "Yes, the surface is fine and powdery."**	Put a comma after the tag, then copy every exact word, including the comma after "Yes," inside quotation marks, with the period inside.
qt_s2	Set 3: Quote what Armstrong said about walking. Start with the tag shown, then add a comma, quotation marks, and the end mark. Original (Text A, excerpt 4): It's absolutely no trouble to walk around. Start with: Neil Armstrong said	**Neil Armstrong said, "It's absolutely no trouble to walk around."**	Put a comma after the tag, then copy every exact word, including the apostrophe in "It's," inside quotation marks, with the period inside.

WRITER'S TURN: IN YOUR OWN WORDS (6 POINTS EACH)

ID	Question	Answer	Why (explain to student)
wt_s0	Set 1: Turn a firsthand account into a secondhand one! Retell excerpt 3 in one or two sentences, in your own words. Write about Armstrong (he, his), not as Armstrong (I, my). Text A, excerpt 3: Yes, the surface is fine and powdery. I can kick it up loosely with my toe. It does adhere in fine layers, like powdered charcoal, to the sole and sides of my boots... I can see the footprints of my boots and the treads in the fine, sandy particles. Use at least 15 words. Do not copy 4 or more words in a row from the text. Turn it secondhand: tell it about Armstrong (use his name or he). Describe the ground: dusty, powdery, or soft. Mention his boots (or feet). Tell what the dust did: stuck to his boots, or showed prints. Original: "Yes, the surface is fine and powdery. I can kick it up loosely with my toe. It does adhere in fine layers, like powdered charcoal, to the sole and sides of my boots. I only go in a small fraction of an inch, maybe an eighth of an inch, but I can see the footprints of my boots and the treads in the fine, sandy particles."	**Sample:** Armstrong reported that the Moon's ground was soft like dust, that it clung to his boots, and that he sank in only slightly but left clear prints.	A strong retelling changes I and my to Armstrong and he, and keeps the key ideas in new words: the ground is dusty, it sticks to his boots, and his boots leave prints. Auto-check rubric: at least 15 words; no 4 or more words in a row copied from the original (names count as one word); must include: armstrong or he or his or neil or astronaut; dust or powder or fine or soil or ground or surface or sand or dirt; boot or shoe or feet or foot or toe; stick or stuck or cling or clung or adhere or coat or print or track or tread or mark or sank or sink.

ID	Question	Answer	Why (explain to student)
wt_s1	Set 2: Summarize paragraphs 2 and 3 of Text B in one or two sentences, in your own words. Text B, paragraphs 2–3: On July 20, 1969, Armstrong and Aldrin landed the lunar module Eagle... Collins stayed behind, orbiting the Moon... Armstrong became the first person to step onto the Moon, and Aldrin soon followed... They set up science instruments, planted a United States flag, took photographs, and collected more than 40 pounds of Moon rocks and soil... Use at least 18 words. Do not copy 4 or more words in a row from the text. (Names like the Sea of Tranquility are fine to keep.) Include the landing (the Eagle landed). Include Collins staying in orbit. Name who walked on the Moon: Armstrong and Aldrin. Include one thing they did outside: the flag, instruments, photos, or rocks. Original: "On July 20, 1969, Armstrong and Aldrin landed the lunar module Eagle in a flat region called the Sea of Tranquility. Collins stayed behind, orbiting the Moon in the command module Columbia. About six and a half hours after landing, ..." (the full passage is on screen; it is long, so only its opening is shown here)	**Sample:** On July 20, Armstrong and Aldrin set the Eagle down on the Moon while Collins circled above, and then the pair explored, raised a flag, and gathered rocks.	A strong summary keeps the big ideas of paragraphs 2 and 3 in order and in new words: the landing, Collins in orbit, the moonwalk by Armstrong and Aldrin, and what they did outside. Auto-check rubric: at least 18 words; no 4 or more words in a row copied from the original (names count as one word); must include: eagle or land or lander; collins or columbia or orbit or circl; armstrong or aldrin or astronaut; rock or sample or flag or instrument or plaque or photo or soil or experiment.
wt_s2	Set 3: Write a comparison in one or two sentences: how is the firsthand account (Text A) DIFFERENT from the secondhand account (Text B)? Use the frame from the How to Compare slide if it helps. Frame: The firsthand account focuses on ___, while the secondhand account focuses on ___. Use at least 18 words. Do not copy 4 or more words in a row from the texts or from this lesson's definitions. Name the firsthand account (Text A or the astronauts' words). Name the secondhand account (Text B or the article). Tell what the firsthand account gives: feelings, senses, or close-up details. Tell what the secondhand account gives: dates, facts, or the whole mission. Original: "Apollo 11 was the first mission to land people on the Moon. On July 16, 1969, a Saturn V rocket launched three astronauts from Kennedy Space Center in Florida: Neil Armstrong, Edwin Buzz Aldrin, and Michael Collins. A firsthand account comes from someone who was there and saw or did it. A secondhand account comes from someone who was not there; that writer learned about the event from other sources."	**Sample:** The firsthand account gives the astronauts' close-up words about how the dust and the view seemed, while the secondhand article gives facts such as dates, the crew, and the whole trip.	A strong comparison names both accounts and tells what each one focuses on: the firsthand account gives feelings and close-up sensory details, and the secondhand account gives dates, facts, and the big picture. Auto-check rubric: at least 18 words; no 4 or more words in a row copied from the original (names count as one word); must include: firsthand or first hand or first-hand or text a or armstrong or astronaut; secondhand or second hand or second-hand or encyclopedia or article or text b; feel or felt or see or saw or sens or close or own words or emotion or describ or look or dust or view; date or fact or number or big picture or background or crew or mission or launch or whole.

MATCH-UP ROUND (2 POINTS PER FIRST-TRY MATCH)

ID	Question	Answer	Why (explain to student)
match_s0_1	Set 1: Match firsthand account	**told by someone who was there**	2 points if matched on the first try.

ID	Question	Answer	Why (explain to student)
match_s0_2	Set 1: Match secondhand account	**told by someone who was not there**	2 points if matched on the first try.
match_s0_3	Set 1: Match perspective	**a person's point of view**	2 points if matched on the first try.
match_s0_4	Set 1: Match transcript	**a written copy of spoken words**	2 points if matched on the first try.
match_s0_5	Set 1: Match encyclopedia	**a reference work of facts on many topics**	2 points if matched on the first try.
match_s1_1	Set 2: Match Eagle	**the lunar module that landed**	2 points if matched on the first try.
match_s1_2	Set 2: Match Columbia	**the command module that orbited**	2 points if matched on the first try.
match_s1_3	Set 2: Match Sea of Tranquility	**the flat region where Eagle landed**	2 points if matched on the first try.
match_s1_4	Set 2: Match Kennedy Space Center	**the launch site in Florida**	2 points if matched on the first try.
match_s1_5	Set 2: Match Michael Collins	**the astronaut who stayed in orbit**	2 points if matched on the first try.
match_s2_1	Set 3: Match adhere	**to stick to something**	2 points if matched on the first try.
match_s2_2	Set 3: Match desolation	**a bare, empty place with no life**	2 points if matched on the first try.
match_s2_3	Set 3: Match stark	**plain and bare, with nothing extra**	2 points if matched on the first try.
match_s2_4	Set 3: Match magnificent	**grand and very beautiful**	2 points if matched on the first try.
match_s2_5	Set 3: Match mankind	**all people; humankind**	2 points if matched on the first try.

BOSS CHALLENGE (8 POINTS EACH)

ID	Question	Answer	Why (explain to student)
b1_s0	Set 1: Two-step: Step 1, which text is the firsthand account? Step 2, which evidence proves it? Which answer gets BOTH steps right? [Text A. Evidence: "I can see the footprints of my boots." / Text A. Evidence: "On July 16, 1969, a Saturn V rocket launched three astronauts." / Text B. Evidence: "I can see the footprints of my boots." / Text B. Evidence: "Collins stayed behind, orbiting the Moon."]	**Text A. Evidence: "I can see the footprints of my boots."**	Text A is firsthand, and "I can see the footprints of my boots" proves it: Armstrong uses I and my to describe what he sees where he stands. The launch-date sentence is from Text B and does not show who was there, and Text B is the secondhand account.
b2_s0	Set 1: Two-step: Abena wants her report to explain how the Moon looked and felt AND when the mission happened. Which plan is best? [Use Text A for how the Moon looked and felt, and Text B for the dates. / Use only Text A, because it has the dates. / Use only Text B, because it describes how the dust felt. / Use Grandpa Abner's interview for both, because he walked on the Moon.]	**Use Text A for how the Moon looked and felt, and Text B for the dates.**	Abena needs two kinds of information. The firsthand account gives how the Moon looked and felt; the secondhand account gives when the mission happened. Using both covers both goals.

ID	Question	Answer	Why (explain to student)
b1_s1	Set 2: Two-step: Grandpa Abner says, "I saw the Moon landing." Which explanation is MOST accurate? [He saw it on television, so he is a firsthand witness to watching the broadcast, but his account of the Moon itself is secondhand. / He is a firsthand witness to walking on the Moon. / His account is useless because he was young. / His account is exactly like Text A.]	**He saw it on television, so he is a firsthand witness to watching the broadcast, but his account of the Moon itself is secondhand.**	Grandpa Abner saw the broadcast in his living room, so he is a firsthand witness to watching it and to his family's reactions. He was not on the Moon, so what he knows about the Moon itself came from television: secondhand.
b2_s1	Set 2: Find the mistake! Achille wrote: Armstrong said, "That was one small step for man, one giant leap for mankind." Which explanation is correct? [He misquoted it. The transcript says "That's one small step for (a) man; one giant leap for mankind." A quotation must match the source exactly. / Nothing is wrong. Close enough counts as a quotation. / It is wrong only because Aldrin said it, not Armstrong. / It is wrong only because quotations never use commas.]	**He misquoted it. The transcript says "That's one small step for (a) man; one giant leap for mankind." A quotation must match the source exactly.**	NASA's transcript reads, "That's one small step for (a) man; one giant leap for mankind." Achille changed "That's" to "That was" and the semicolon to a comma. A quotation must match its source word for word and mark for mark.
b1_s2	Set 3: Which NEW source would be a firsthand account of the Apollo 11 moonwalk? [A NASA recording of what Aldrin said while he stood on the Moon / An encyclopedia article written in 2019 / A textbook chapter written by a historian / A classmate's report about Apollo 11]	**A NASA recording of what Aldrin said while he stood on the Moon**	A recording of Aldrin's words while he stood on the Moon comes from someone who was there, so it is firsthand. An encyclopedia article, a historian's textbook chapter, and a classmate's report were all made by people who were not there.
b2_s2	Set 3: Text B tells about Michael Collins, but Text A never mentions him. Which explanation is correct? [Text A holds only words spoken on the Moon's surface, so it shows one close-up part of the mission; Text B covers the whole mission. / Collins was not part of Apollo 11. / Text A is secondhand, so it leaves people out. / Collins walked on the Moon first.]	**Text A holds only words spoken on the Moon's surface, so it shows one close-up part of the mission; Text B covers the whole mission.**	Text A holds only words spoken on the Moon's surface, so it shows one close-up part of the mission. Collins was in orbit, so he is not in those excerpts. Text B covers the whole mission, so it includes him. This is the limit of a firsthand account: it shows only what that person was part of.

Pre & Post sheet answer guide

Many items are open-ended. Grade for genuine understanding and complete sentences, not exact wording. Sheet: grade4-5/prepost/KCE_Reading_PrePost_G4-5W22.pdf.

PRE-LESSON WARM-UP

#	Prompt	Model answer / grading note
1	Review: Because the spring dried up…: structure and signal word	Cause and effect. Signal word: Because.
2	Two sentences about your week using I or we	Answers vary. Check for two complete sentences told in the first person (I or we).
3	Who could give a FIRSTHAND account of a soccer game?	A player who was on the field

#	Prompt	Model answer / grading note
4	One fact and one question about the first Moon landing	Answers vary (for example, “Neil Armstrong was the first person to walk on the Moon, in 1969”). Check for one fact and one question.
5	Why someone who was there remembers different details	Model: A person who was there remembers what they saw, heard, and felt up close. A person who only read about it later learns facts such as dates and numbers from other sources, but not those personal feelings.

POST-LESSON CHALLENGE

#	Prompt	Model answer / grading note
1	Which sentence sounds firsthand?	Sentence (1), “I could feel the rocket shake under my seat!” Clue: the pronouns I and my, plus a feeling from someone who was there.
2	Be the editor	a) Aldrin said, "Magnificent desolation." b) On July 16, 1969, the rocket launched from Florida. c) Grandpa Abner and I watched the old video.
3	Michael Collins: firsthand account of which part?	Orbiting the Moon in Columbia
4	Writing: compare Text A and Text B (4–5 sentences)	Grading note: says what each account focuses on; quotes Neil Armstrong exactly once; uses while or however. Model: Both texts tell about the Apollo 11 Moon landing. Text A gives the astronauts’ own words from the Moon, while Text B is an article by a writer who was not there. Neil Armstrong said, "It's absolutely no trouble to walk around." Text A focuses on how the dust and the view seemed up close. However, Text B focuses on the dates, the crew, and the whole mission from launch to return.

★ CHALLENGE

#	Prompt	Model answer / grading note
1	A firsthand moment, then one sentence rewritten secondhand	Answers vary. The firsthand account uses I or we and includes senses or feelings; the rewritten sentence uses he, she, or they and keeps the same fact.
