KCE PATHWAYS · GRADES 4–5 · UNIT 3: BUILDING THINGS · WEEK 15 · CHECKPOINT

Checkpoint 3 — Building Things Review — Teacher Lesson Plan & Answer Key

Learning objectives: Students show mastery of Unit 3 (Weeks 11–14): factors, multiples, and prime and composite numbers; equivalent fractions, simplifying, and mixed numbers; multiplying fractions; and measurement conversions, plus punctuating dialogue, informative paragraphs and transitions, figurative language and poetry, and quoting vs. paraphrasing. Students also solve two-step problems, judge explanations, find mistakes, edit sentences, and write a short piece that combines the unit's writing skills.

Duration: 35–45 minutes
Materials: Computer or tablet with the lesson open · pencil · printed Pre & Post sheet

Lesson flow (as it appears on screen)

1. Slide 0 — Intro and name: the four Unit 3 settings (Wisconsin dairy farm, Houston apartment build, Andes village in Peru, PortMiami) and the skill grid for Weeks 11–14. Student types first and last name so results are sent.
2. Slide 1 — Pencil Break (Pre): student completes the Checkpoint 3 Warm-Up sheet off screen.
3. Slide 2 — Week 11 Math: factors, multiples, prime and composite (7 pts). Each skill slide has a one-line reminder at the top; if a student misses an item, point back to that reminder.
4. Slide 3 — Week 11 Reading: punctuating dialogue, with a short three-paragraph conversation (7 pts).
5. Slide 4 — Week 12 Math: equivalent fractions, simplifying with the GCF, mixed numbers and improper fractions (7 pts). Mixed-number answers are multiple choice.
6. Slide 5 — Week 12 Reading: informative paragraph with numbered sentences: topic sentence, off-topic sentence, transitions, concluding sentence (7 pts).
7. Slide 6 — Week 13 Math: multiplying fractions by whole numbers and by fractions, area, scaling (7 pts).
8. Slide 7 — Week 13 Reading: an original two-stanza poem about the Andes village: simile, metaphor, personification, hyperbole, stanza, rhyme (7 pts).
9. Slide 8 — Week 14 Math: customary, metric, and time conversions (7 pts). Remind: big unit to small unit, multiply; small to big, divide.
10. Slide 9 — Week 14 Reading: a short source about PortMiami: quote vs. paraphrase, punctuating a quote, plagiarism, citation (7 pts).
11. Slide 10 — Putting Skills Together (12 pts): a two-step problem that mixes two weeks, a "which explanation is correct?" item, a math "find the mistake," and a reading/writing "find the mistake." Ask the student to say why each wrong choice is wrong.
12. Slide 11 — Fix the Sentence (8 pts): dialogue punctuation, punctuating a quote from a source, capitalization of proper nouns, and subject-verb agreement. The answer must match exactly (straight or curly quotes both work).
13. Slide 12 — Writer's Notebook (unscored, XP only): 3–5 sentences about a Unit 3 place with a topic sentence, a transition, one line of dialogue, and a simile or metaphor; the checklist gives instant feedback. Then one scored follow-up item (4 pts). Read the student's notebook writing aloud together if time allows.
14. Slide 13 — Match-Up Round (10 pts): 5 Unit 3 vocabulary words across math and reading, 2 pts each on the first try.

15. Slide 14 — Looking Back on Unit 3 reflection (bonus XP only).
16. Slide 15 — Unit 3 Boss Challenge (10 pts): a multi-step math problem that combines multiplying fractions with measurement, and a reading/writing item that combines two skills.
17. Slide 16 — Pencil Break (Post): student completes the Checkpoint 3 Challenge sheet off screen.
18. Slide 17 — Results: score out of 100 sent to KingCretot Experience, with a breakdown by week so you can see what to review. 85+ shows the Unit 3 completion celebration with a big confetti burst; below 85 shows encouragement, and Try Again gives the next question set.

Lesson answer key with reasoning

Every scored item the student sees, in order, across all three rotating question sets. The "why" is the same reasoning shown on screen after a second missed try.

WEEK 11 MATH: FACTORS, MULTIPLES, AND PRIME & COMPOSITE NUMBERS (3, 2, 2 POINTS)

ID	Question	Answer	Why (explain to student)
a1_s0	Set 1: Nadia is back on her family's dairy farm in Wisconsin, planning the barn for a new group of calves and the farm's delivery schedule. Nadia has 42 calves to put into equal rows of pens. Which number of rows will NOT work?	**8 rows**	A number of rows works only if it is a factor of 42. 42 = 6 × 7 = 3 × 14, so 6, 7, and 3 all work. 8 is not a factor of 42 (8 × 5 = 40 and 8 × 6 = 48), so 8 rows will not work.
a2_s0	Set 1: Nadia is back on her family's dairy farm in Wisconsin, planning the barn for a new group of calves and the farm's delivery schedule. The milk tanker comes every 6 days and the hoof trimmer comes every 9 days. Both came today. In how many days will they both come on the same day again? Days:	**18 (also accepted: 18 days, 18 day)**	Find the least common multiple. Multiples of 6: 6, 12, 18... Multiples of 9: 9, 18... The first one they share is 18, so in 18 days.
a3_s0	Set 1: Nadia is back on her family's dairy farm in Wisconsin, planning the barn for a new group of calves and the farm's delivery schedule. Which cow's ear tag number is PRIME?	**43**	43 has exactly two factors, 1 and 43. The others are composite: 39 = 3 × 13, 57 = 3 × 19, and 49 = 7 × 7.
a1_s1	Set 2: Nadia is back on her family's dairy farm in Wisconsin, stacking hay for winter and packing an order for the farm stand. Nadia has 54 hay bales to split into equal stacks. Which stack size will NOT work?	**8 bales**	A stack size works only if it is a factor of 54. 54 = 6 × 9 = 3 × 18, so 6, 9, and 3 all work. 54 ÷ 8 has a remainder (8 × 6 = 48 and 8 × 7 = 56), so 8 will not work.
a2_s1	Set 2: Nadia is back on her family's dairy farm in Wisconsin, stacking hay for winter and packing an order for the farm stand. Nadia packs 28 bags of cheese curds and 42 bottles of milk into identical boxes, with nothing left over. What is the GREATEST number of boxes she can fill? Boxes:	**14 (also accepted: 14 boxes, 14 box)**	The number of boxes must divide both 28 and 42, so find the greatest common factor. Factors of 28: 1, 2, 4, 7, 14, 28. Factors of 42: 1, 2, 3, 6, 7, 14, 21, 42. The GCF is 14.
a3_s1	Set 2: Nadia is back on her family's dairy farm in Wisconsin, stacking hay for winter and packing an order for the farm stand. Which cow's ear tag number is COMPOSITE?	**51**	51 = 3 × 17 (its digits add to 6, so it is divisible by 3). 53, 59, and 61 each have only two factors, so they are prime.

ID	Question	Answer	Why (explain to student)
a1_s2	Set 3: Nadia is back on her family's dairy farm in Wisconsin, setting up calf pens and planning truck visits. Nadia has 60 calves to put into equal rows of pens. Which number of rows will NOT work?	**8 rows**	A number of rows works only if it is a factor of 60. 60 = 5 × 12 = 6 × 10, so 5, 6, and 12 all work. 60 ÷ 8 has a remainder (8 × 7 = 56 and 8 × 8 = 64), so 8 rows will not work.
a2_s2	Set 3: Nadia is back on her family's dairy farm in Wisconsin, setting up calf pens and planning truck visits. The milk tanker comes every 4 days and the feed truck comes every 10 days. Both came today. In how many days will they both come on the same day again? Days:	**20 (also accepted: 20 days, 20 day)**	Find the least common multiple. Multiples of 4: 4, 8, 12, 16, 20... Multiples of 10: 10, 20... The first one they share is 20, so in 20 days.
a3_s2	Set 3: Nadia is back on her family's dairy farm in Wisconsin, setting up calf pens and planning truck visits. Which cow's ear tag number is PRIME?	**67**	67 has exactly two factors, 1 and 67. The others are composite: 63 = 7 × 9, 69 = 3 × 23, and 65 = 5 × 13.

WEEK 11 READING: PUNCTUATING DIALOGUE (3, 2, 2 POINTS)

ID	Question	Answer	Why (explain to student)
b1_s0	Set 1: Passage: 1 "The milk truck comes at seven," Dad said. "We need to finish milking by then." 2 Nadia hurried down the row of black-and-white Holsteins. "I'll start on this side," she called. 3 "Thanks, kiddo," Dad answered. "You're faster than I am." Which sentence punctuates the dialogue correctly?	**"We need more straw," Nadia said.**	Quotation marks go around only the spoken words. When a dialogue tag follows, the spoken sentence ends with a comma (not a period) inside the closing quotation mark.
b2_s0	Set 1: Passage: 1 "The milk truck comes at seven," Dad said. "We need to finish milking by then." 2 Nadia hurried down the row of black-and-white Holsteins. "I'll start on this side," she called. 3 "Thanks, kiddo," Dad answered. "You're faster than I am." Why does the writer start a new paragraph when Nadia speaks in paragraph 2?	**A new speaker is talking**	In a story, each time the speaker changes, the writer starts a new paragraph. Dad spoke in paragraph 1, so when Nadia speaks, a new paragraph begins.
b3_s0	Set 1: Passage: 1 "The milk truck comes at seven," Dad said. "We need to finish milking by then." 2 Nadia hurried down the row of black-and-white Holsteins. "I'll start on this side," she called. 3 "Thanks, kiddo," Dad answered. "You're faster than I am." In paragraph 1, which words are the dialogue tag?	**Dad said**	The dialogue tag tells who is speaking. "Dad said" is outside the quotation marks and tells us Dad is talking. The other choices are the spoken words.
b1_s1	Set 2: Passage: 1 "Did you fill the water trough?" Grandpa asked. 2 "Yes, and I fed the calves too," Nadia replied. 3 Grandpa smiled. "Then you have earned a mug of hot cocoa." Which sentence punctuates the dialogue correctly?	**Grandpa asked, "Where is the bucket?"**	Put a comma after the tag, capitalize the first word of the spoken sentence, and keep the question mark inside the closing quotation mark because the question is part of what Grandpa said.

ID	Question	Answer	Why (explain to student)
b2_s1	Set 2: Passage: 1 “Did you fill the water trough?” Grandpa asked. 2 “Yes, and I fed the calves too,” Nadia replied. 3 Grandpa smiled. “Then you have earned a mug of hot cocoa.” In paragraph 1, why is the question mark inside the closing quotation mark?	**The question is part of what Grandpa said**	Grandpa’s spoken words are a question, so the question mark belongs to his words and stays inside the quotation marks.
b3_s1	Set 2: Passage: 1 “Did you fill the water trough?” Grandpa asked. 2 “Yes, and I fed the calves too,” Nadia replied. 3 Grandpa smiled. “Then you have earned a mug of hot cocoa.” In paragraph 2, which word is the tag verb?	**replied**	The tag is “Nadia replied.” The verb replied tells that Nadia was answering Grandpa. “Fed” and “Yes” are part of her spoken words, and “fill” is from Grandpa’s question.
b1_s2	Set 3: Passage: 1 Nadia peeked into the calf pen. “She’s standing up!” she whispered. 2 “That’s a good sign,” Mom said softly. “Let’s give her some space.” 3 “Can I name her Maple?” Nadia asked. Which sentence punctuates the dialogue correctly?	**“Let’s go inside,” Mom said, “before the snow gets deeper.”**	This is ONE spoken sentence split by the tag. Put commas around the tag, use quotation marks around both parts, and do NOT capitalize “before,” because it continues the same sentence.
b2_s2	Set 3: Passage: 1 Nadia peeked into the calf pen. “She’s standing up!” she whispered. 2 “That’s a good sign,” Mom said softly. “Let’s give her some space.” 3 “Can I name her Maple?” Nadia asked. Why does paragraph 3 begin on a new line?	**The speaker changes from Mom to Nadia**	A new paragraph begins whenever a different character speaks. Mom spoke in paragraph 2, and Nadia speaks in paragraph 3.
b3_s2	Set 3: Passage: 1 Nadia peeked into the calf pen. “She’s standing up!” she whispered. 2 “That’s a good sign,” Mom said softly. “Let’s give her some space.” 3 “Can I name her Maple?” Nadia asked. In paragraph 1, what does the tag verb whispered tell the reader?	**Nadia speaks very quietly**	Whispered means speaking very quietly. It is a strong tag verb that shows how Nadia said her words.

WEEK 12 MATH: EQUIVALENT FRACTIONS, SIMPLIFYING & MIXED NUMBERS (3, 2, 2 POINTS)

ID	Question	Answer	Why (explain to student)
c1_s0	Set 1: Amara is back at the six-story apartment building in Houston, Texas, helping her aunt, Ms. Okafor, the project engineer, check floor plans and supply orders. The floor plan shows that 18/24 of the lobby floor is tiled. Type 18/24 in simplest form. 18/24 =	**3/4**	The GCF of 18 and 24 is 6. Divide both by 6: 18 ÷ 6 = 3 and 24 ÷ 6 = 4, so 18/24 = 3/4.
c2_s0	Set 1: Amara is back at the six-story apartment building in Houston, Texas, helping her aunt, Ms. Okafor, the project engineer, check floor plans and supply orders. Which fraction is equivalent to 2/3?	**10/15**	Multiply the numerator and denominator by the same number: 2 × 5 = 10 and 3 × 5 = 15, so 2/3 = 10/15. The others do not name the same amount.
c3_s0	Set 1: Amara is back at the six-story apartment building in Houston, Texas, helping her aunt, Ms. Okafor, the project engineer, check floor plans and supply orders. A pipe is 19/4 feet long. Which mixed number is that?	**4 3/4 feet**	Divide 19 by 4: 4 × 4 = 16 with 3 left over. That is 4 wholes and 3/4 more, so 19/4 = 4 3/4.

ID	Question	Answer	Why (explain to student)
c1_s1	Set 2: Amara is back at the six-story apartment building in Houston, Texas, helping her aunt, Ms. Okafor, the project engineer, check floor plans and supply orders. Amara finds that 20/30 of the windows are installed. Type 20/30 in simplest form. 20/30 =	**2/3**	The GCF of 20 and 30 is 10. Divide both by 10: 20 ÷ 10 = 2 and 30 ÷ 10 = 3, so 20/30 = 2/3.
c2_s1	Set 2: Amara is back at the six-story apartment building in Houston, Texas, helping her aunt, Ms. Okafor, the project engineer, check floor plans and supply orders. Which fraction is equivalent to 3/5?	**12/20**	Multiply the numerator and denominator by 4: 3 × 4 = 12 and 5 × 4 = 20, so 3/5 = 12/20. (6/15 simplifies to 2/5, not 3/5.)
c3_s1	Set 2: Amara is back at the six-story apartment building in Houston, Texas, helping her aunt, Ms. Okafor, the project engineer, check floor plans and supply orders. A steel bar is 3 2/5 feet long. Which improper fraction is equal to 3 2/5?	**17/5**	Multiply the whole number by the denominator, then add the numerator: 3 × 5 = 15 and 15 + 2 = 17. Keep the denominator: 17/5.
c1_s2	Set 3: Amara is back at the six-story apartment building in Houston, Texas, helping her aunt, Ms. Okafor, the project engineer, check floor plans and supply orders. The schedule shows that 16/40 of the painting is done. Type 16/40 in simplest form. 16/40 =	**2/5**	The GCF of 16 and 40 is 8. Divide both by 8: 16 ÷ 8 = 2 and 40 ÷ 8 = 5, so 16/40 = 2/5.
c2_s2	Set 3: Amara is back at the six-story apartment building in Houston, Texas, helping her aunt, Ms. Okafor, the project engineer, check floor plans and supply orders. The hallway plan shows that 3/4 of the carpet is laid. Which fraction names the same amount as 3/4?	**15/20**	Multiply the numerator and denominator by 5: 3 × 5 = 15 and 4 × 5 = 20, so 3/4 = 15/20. (6/12 simplifies to 1/2.)
c3_s2	Set 3: Amara is back at the six-story apartment building in Houston, Texas, helping her aunt, Ms. Okafor, the project engineer, check floor plans and supply orders. A board is 29/6 feet long. Which mixed number is that?	**4 5/6 feet**	Divide 29 by 6: 6 × 4 = 24 with 5 left over. That is 4 wholes and 5/6 more, so 29/6 = 4 5/6.

WEEK 12 READING: INFORMATIVE PARAGRAPHS & TRANSITIONS (3, 2, 2 POINTS)

ID	Question	Answer	Why (explain to student)
d1_s0	Set 1: Paragraph: (1) Houston builders have to plan for heavy rain. (2) First, they shape the ground so water flows away from the building. (3) Next, they add drains that carry rainwater into large underground pipes. (4) My cousin likes to swim at the community pool. (5) As a result, the new apartments stay dry even during a big storm. Which sentence does NOT belong because it is off-topic?	**Sentence 4**	The paragraph is about how builders plan for heavy rain. Sentence 4, about a cousin swimming, does not support that main idea.

ID	Question	Answer	Why (explain to student)
d2_s0	Set 1: Paragraph: (1) Houston builders have to plan for heavy rain. (2) First, they shape the ground so water flows away from the building. (3) Next, they add drains that carry rainwater into large underground pipes. (4) My cousin likes to swim at the community pool. (5) As a result, the new apartments stay dry even during a big storm. Which sentence is the topic sentence?	**Sentence 1**	Sentence 1 tells the main idea, planning for heavy rain. The other sentences give details, an off-topic idea, or the result.
d3_s0	Set 1: Paragraph: (1) Houston builders have to plan for heavy rain. (2) First, they shape the ground so water flows away from the building. (3) Next, they add drains that carry rainwater into large underground pipes. (4) My cousin likes to swim at the community pool. (5) As a result, the new apartments stay dry even during a big storm. What does the transition “As a result” in sentence 5 show?	**An effect of the steps that came before it**	“As a result” shows cause and effect: because the builders shaped the ground and added drains, the apartments stay dry.
d1_s1	Set 2: Paragraph: (1) The windows on the new Houston apartment building are made to stand up to hurricanes. (2) The glass has a tough plastic layer inside it. (3) _____ the window frames are bolted tightly into the concrete walls. (4) Because of this, strong winds cannot easily push the windows in. Which transition best fills the blank in sentence 3?	**Also,**	Sentence 3 adds a second way the windows are made strong, so “Also” fits. “However” would show a contrast, “In conclusion” would end the paragraph, and “Instead” would replace an idea.
d2_s1	Set 2: Paragraph: (1) The windows on the new Houston apartment building are made to stand up to hurricanes. (2) The glass has a tough plastic layer inside it. (3) _____ the window frames are bolted tightly into the concrete walls. (4) Because of this, strong winds cannot easily push the windows in. What is the main idea of the paragraph?	**The windows are built to stand up to hurricanes**	Sentence 1, the topic sentence, says the windows are made to stand up to hurricanes. Every other sentence explains how.
d3_s1	Set 2: Paragraph: (1) The windows on the new Houston apartment building are made to stand up to hurricanes. (2) The glass has a tough plastic layer inside it. (3) _____ the window frames are bolted tightly into the concrete walls. (4) Because of this, strong winds cannot easily push the windows in. Which sentence would make the best concluding sentence?	**With tough glass and strong frames, these windows help keep families safe in a storm.**	A concluding sentence wraps up the main idea in a new way. The other choices go off-topic, repeat a detail, or start a new idea.
d1_s2	Set 3: Paragraph: (1) A building crew in Houston works as a team. (2) For example, the crane operator lifts steel beams to the top floors. (3) Meanwhile, electricians run wires through the walls below. (4) Houston is the fourth-largest city in the United States. (5) Finally, the site manager checks that every job is done safely. Which sentence does NOT belong because it is off-topic?	**Sentence 4**	The paragraph is about how the crew works as a team. Sentence 4 is a true fact about Houston, but it does not support the main idea, so it does not belong.

ID	Question	Answer	Why (explain to student)
d2_s2	Set 3: Paragraph: (1) A building crew in Houston works as a team. (2) For example, the crane operator lifts steel beams to the top floors. (3) Meanwhile, electricians run wires through the walls below. (4) Houston is the fourth-largest city in the United States. (5) Finally, the site manager checks that every job is done safely. What does the transition "For example" in sentence 2 tell the reader?	**An example of the main idea is coming**	"For example" signals that the writer is about to give an example that supports the main idea, teamwork.
d3_s2	Set 3: Paragraph: (1) A building crew in Houston works as a team. (2) For example, the crane operator lifts steel beams to the top floors. (3) Meanwhile, electricians run wires through the walls below. (4) Houston is the fourth-largest city in the United States. (5) Finally, the site manager checks that every job is done safely. Which word or phrase from the paragraph signals the LAST job in the list?	**Finally**	"Finally" signals the last item: the site manager checks every job. "For example" introduces an example, "Meanwhile" means at the same time, and "safely" is not a transition.

WEEK 13 MATH: MULTIPLYING FRACTIONS (3, 2, 2 POINTS)

ID	Question	Answer	Why (explain to student)
e1_s0	Set 1: Killa is back in her Quechua village high in the Andes mountains of Peru, helping her family cook, weave, and plant on the terraces. Killa makes 8 pots of soup. Each pot needs 3/4 cup of quinoa. How many cups of quinoa does she need? 8 × 3/4 =	**6 (also accepted: 6 cups, 6 cup, 24/4, 6/1)**	8 × 3/4 = 24/4, and 24 ÷ 4 = 6 cups.
e2_s0	Set 1: Killa is back in her Quechua village high in the Andes mountains of Peru, helping her family cook, weave, and plant on the terraces. 2/3 × 3/5 = ?	**2/5**	Multiply the numerators (2 × 3 = 6) and the denominators (3 × 5 = 15) to get 6/15. Simplify by dividing both by 3: 2/5.
e3_s0	Set 1: Killa is back in her Quechua village high in the Andes mountains of Peru, helping her family cook, weave, and plant on the terraces. Grandmother Rosa weaves a cloth that is 3/4 meter long and 1/2 meter wide. What is its area?	**3/8 square meter**	Area = length × width = 3/4 × 1/2. Multiply the numerators (3 × 1 = 3) and the denominators (4 × 2 = 8): 3/8 square meter.
e1_s1	Set 2: Killa is back in her Quechua village high in the Andes mountains of Peru, helping her family cook, weave, and plant on the terraces. Killa spins 10 balls of yarn. Each ball uses 2/5 kilogram of alpaca wool. How many kilograms of wool does she use? 10 × 2/5 =	**4 (also accepted: 4 kilograms, 4 kilogram, 4 kg, 20/5, 4/1)**	10 × 2/5 = 20/5, and 20 ÷ 5 = 4 kilograms.
e2_s1	Set 2: Killa is back in her Quechua village high in the Andes mountains of Peru, helping her family cook, weave, and plant on the terraces. 3/4 × 2/3 = ?	**1/2**	Multiply the numerators (3 × 2 = 6) and the denominators (4 × 3 = 12) to get 6/12. Simplify by dividing both by 6: 1/2.

ID	Question	Answer	Why (explain to student)
e3_s1	Set 2: Killa is back in her Quechua village high in the Andes mountains of Peru, helping her family cook, weave, and plant on the terraces. Which product is GREATER than 8?	**5/4 × 8**	Multiplying by a fraction greater than 1 makes the product bigger than 8. 5/4 is greater than 1, so 5/4 × 8 = 10. The other fractions are less than 1, so their products are less than 8.
e1_s2	Set 3: Killa is back in her Quechua village high in the Andes mountains of Peru, helping her family cook, weave, and plant on the terraces. There are 9 rows of potatoes on a terrace. Killa waters 2/3 of the rows. How many rows does she water? 2/3 × 9 =	**6 (also accepted: 6 rows, 6 row, 18/3, 6/1)**	2/3 of 9 means 2/3 × 9 = 18/3, and 18 ÷ 3 = 6 rows.
e2_s2	Set 3: Killa is back in her Quechua village high in the Andes mountains of Peru, helping her family cook, weave, and plant on the terraces. 4/5 × 5/8 = ?	**1/2**	Multiply the numerators (4 × 5 = 20) and the denominators (5 × 8 = 40) to get 20/40. Simplify by dividing both by 20: 1/2.
e3_s2	Set 3: Killa is back in her Quechua village high in the Andes mountains of Peru, helping her family cook, weave, and plant on the terraces. Killa plants potatoes on 1/4 of a field. She plants yellow potatoes on 2/3 of that part. What fraction of the WHOLE field has yellow potatoes?	**1/6**	Find 2/3 of 1/4: 2/3 × 1/4 = 2/12, which simplifies to 1/6 of the whole field.

WEEK 13 READING: FIGURATIVE LANGUAGE & POETRY (3, 2, 2 POINTS)

ID	Question	Answer	Why (explain to student)
g1_s0	Set 1: Poem: Alpaca Morning The sun climbs over the mountain wall, / a golden coin above us all. / The alpacas wake and stretch and yawn, / their wool as soft as clouds at dawn. The wind runs laughing down the slope / and tugs at Killa's braided rope. / She'd climb a thousand hills today / to lead her herd along the way. Which line from the poem uses a SIMILE?	**their wool as soft as clouds at dawn**	A simile compares two different things using like or as. "As soft as clouds" compares the wool to clouds using as. The others are a metaphor, personification, and hyperbole.
g2_s0	Set 1: Poem: Alpaca Morning The sun climbs over the mountain wall, / a golden coin above us all. / The alpacas wake and stretch and yawn, / their wool as soft as clouds at dawn. The wind runs laughing down the slope / and tugs at Killa's braided rope. / She'd climb a thousand hills today / to lead her herd along the way. What does "She'd climb a thousand hills today" really mean?	**Killa is willing to work very hard for her herd**	This is hyperbole, a huge exaggeration. Killa will not really climb 1,000 hills; the line shows how much she cares about leading her herd.

ID	Question	Answer	Why (explain to student)
g3_s0	Set 1: Poem: Alpaca Morning The sun climbs over the mountain wall, / a golden coin above us all. / The alpacas wake and stretch and yawn, / their wool as soft as clouds at dawn. The wind runs laughing down the slope / and tugs at Killa's braided rope. / She'd climb a thousand hills today / to lead her herd along the way. How many stanzas does the poem have?	**2**	A stanza is a group of lines in a poem. This poem has two groups of four lines, so it has 2 stanzas (and 8 lines).
g1_s1	Set 2: Poem: Market Morning in Pisac The plaza is a rainbow quilt, / with stalls of cloth and wood, well built. / Potatoes purple, gold, and red / are piled up high on every spread. The church bell sings its morning song / to call the shoppers all along. / Then Killa calls out, sweet and clear, / "Fresh corn and quinoa, sold right here!" "The plaza is a rainbow quilt" is an example of which kind of figurative language?	**Metaphor**	The line says the plaza IS a rainbow quilt, without using like or as. That makes it a metaphor. It helps us picture all the colors of the market.
g2_s1	Set 2: Poem: Market Morning in Pisac The plaza is a rainbow quilt, / with stalls of cloth and wood, well built. / Potatoes purple, gold, and red / are piled up high on every spread. The church bell sings its morning song / to call the shoppers all along. / Then Killa calls out, sweet and clear, / "Fresh corn and quinoa, sold right here!" Which line uses PERSONIFICATION?	**The church bell sings its morning song**	Personification gives human actions to an object. A bell cannot really sing, so "The church bell sings" is personification.
g3_s1	Set 2: Poem: Market Morning in Pisac The plaza is a rainbow quilt, / with stalls of cloth and wood, well built. / Potatoes purple, gold, and red / are piled up high on every spread. The church bell sings its morning song / to call the shoppers all along. / Then Killa calls out, sweet and clear, / "Fresh corn and quinoa, sold right here!" Which pair of words RHYMES in the poem?	**red and spread**	Rhyming words end with the same sound. Red and spread both end with the "-ed" sound, and they end lines 3 and 4 of stanza 1.
g1_s2	Set 3: Poem: Night in the Village Snow sits upon the mountain / like a woolly hat of white. / The river hums a lullaby / to the valley every night. The stars are scattered sugar / on a blanket, black and deep, / while Killa and her family / lie down, at last, to sleep. Which line from the poem uses a METAPHOR?	**The stars are scattered sugar**	A metaphor says one thing IS another without like or as: the stars ARE scattered sugar. "Like a woolly hat" is a simile, "The river hums" is personification, and the last line is literal.
g2_s2	Set 3: Poem: Night in the Village Snow sits upon the mountain / like a woolly hat of white. / The river hums a lullaby / to the valley every night. The stars are scattered sugar / on a blanket, black and deep, / while Killa and her family / lie down, at last, to sleep. What does "The river hums a lullaby" help the reader imagine?	**The river makes a soft, gentle sound**	A lullaby is a soft song for falling asleep. Saying the river hums a lullaby helps us hear its quiet, gentle sound at night.

ID	Question	Answer	Why (explain to student)
g3_s2	Set 3: Poem: Night in the Village Snow sits upon the mountain / like a woolly hat of white. / The river hums a lullaby / to the valley every night. The stars are scattered sugar / on a blanket, black and deep, / while Killa and her family / lie down, at last, to sleep. Which word rhymes with “white” in stanza 1?	**night**	White and night both end with the “-ight” sound. They end lines 2 and 4 of the first stanza.

WEEK 14 MATH: MEASUREMENT CONVERSIONS (3, 2, 2 POINTS)

ID	Question	Answer	Why (explain to student)
h1_s0	Set 1: Andre is back at PortMiami with his Aunt Guerline, who runs a giant crane, and Mr. Alvarez, who checks the refrigerated fruit containers. The walkway from the dock to a ship is 11 feet long. How many inches long is it? Inches:	**132 (also accepted: 132 inches, 132 inch, 132 in)**	1 foot = 12 inches. Feet are bigger than inches, so multiply: 11 × 12 = 132 inches.
h2_s0	Set 1: Andre is back at PortMiami with his Aunt Guerline, who runs a giant crane, and Mr. Alvarez, who checks the refrigerated fruit containers. A box of mangoes weighs 7 pounds. How many ounces is that?	**112 ounces**	1 pound = 16 ounces. Pounds are bigger, so multiply: 7 × 16 = 112 ounces. (84 comes from using 12 instead of 16.)
h3_s0	Set 1: Andre is back at PortMiami with his Aunt Guerline, who runs a giant crane, and Mr. Alvarez, who checks the refrigerated fruit containers. Mr. Alvarez fills a cooler with 5 gallons of water. How many quarts is that?	**20 quarts**	1 gallon = 4 quarts. Gallons are bigger, so multiply: 5 × 4 = 20 quarts.
h1_s1	Set 2: Andre is back at PortMiami with his Aunt Guerline, who runs a giant crane, and Mr. Alvarez, who checks the refrigerated fruit containers. A mooring rope is 7 yards long. How many feet long is it? Feet:	**21 (also accepted: 21 feet, 21 foot, 21 ft)**	1 yard = 3 feet. Yards are bigger than feet, so multiply: 7 × 3 = 21 feet.
h2_s1	Set 2: Andre is back at PortMiami with his Aunt Guerline, who runs a giant crane, and Mr. Alvarez, who checks the refrigerated fruit containers. A loaded container weighs 9 tons. How many pounds is that?	**18,000 pounds**	1 ton = 2,000 pounds. Tons are bigger, so multiply: 9 × 2,000 = 18,000 pounds.
h3_s1	Set 2: Andre is back at PortMiami with his Aunt Guerline, who runs a giant crane, and Mr. Alvarez, who checks the refrigerated fruit containers. A tugboat guides a ship 8 kilometers up the channel. How many meters is that?	**8,000 meters**	1 kilometer = 1,000 meters. Kilometers are bigger, so multiply: 8 × 1,000 = 8,000 meters.
h1_s2	Set 3: Andre is back at PortMiami with his Aunt Guerline, who runs a giant crane, and Mr. Alvarez, who checks the refrigerated fruit containers. A stack of pallets is 120 inches tall. How many feet tall is it? Feet:	**10 (also accepted: 10 feet, 10 foot, 10 ft)**	12 inches = 1 foot. Inches are smaller than feet, so divide: 120 ÷ 12 = 10 feet.

ID	Question	Answer	Why (explain to student)
h2_s2	Set 3: Andre is back at PortMiami with his Aunt Guerline, who runs a giant crane, and Mr. Alvarez, who checks the refrigerated fruit containers. Mr. Alvarez has 96 ounces of trail mix for the crew. How many pounds is that?	**6 pounds**	16 ounces = 1 pound. Ounces are smaller, so divide: 96 ÷ 16 = 6 pounds. (1,536 comes from multiplying by mistake.)
h3_s2	Set 3: Andre is back at PortMiami with his Aunt Guerline, who runs a giant crane, and Mr. Alvarez, who checks the refrigerated fruit containers. Aunt Guerline's crane works for 2 hours 40 minutes. How many minutes is that?	**160 minutes**	1 hour = 60 minutes, so 2 hours = 120 minutes. Add the extra 40: 120 + 40 = 160 minutes.

WEEK 14 READING: QUOTING VS. PARAPHRASING (3, 2, 2 POINTS)

ID	Question	Answer	Why (explain to student)
j1_s0	Set 1: Source: From "The Busy Bay," a magazine article by Lena Torres Every morning, giant cranes lift steel containers off the ships as if they were toy blocks. The crane operators sit in small cabs high above the dock. Kiara writes: Lena Torres explains that each morning, tall cranes unload heavy containers almost like a child stacking blocks. Is this a quote or a paraphrase?	**A paraphrase, because it keeps the idea in new words and names the source**	Kiara kept the author's idea but used her own words and sentence pattern, and she named the source. That is an honest paraphrase, so it needs no quotation marks.
j2_s0	Set 1: Source: From "The Busy Bay," a magazine article by Lena Torres Every morning, giant cranes lift steel containers off the ships as if they were toy blocks. The crane operators sit in small cabs high above the dock. Which quote is punctuated correctly?	**Lena Torres writes, "The crane operators sit in small cabs high above the dock."**	Put a comma after the tag, capitalize the first word of the quoted sentence, and keep the period inside the closing quotation mark.
j3_s0	Set 1: Source: From "The Busy Bay," a magazine article by Lena Torres Every morning, giant cranes lift steel containers off the ships as if they were toy blocks. The crane operators sit in small cabs high above the dock. Which sentence is PLAGIARISM?	**Every morning, giant cranes lift steel containers off the ships.**	The sentence "Every morning, giant cranes lift steel containers off the ships." copies the author's exact words with no quotation marks and no source, so it pretends the words are the writer's own. The other sentences quote or paraphrase AND name Lena Torres.
j1_s1	Set 2: Source: From "PortMiami Facts," a fact sheet by the Bayfront Learning Center PortMiami sits on Dodge Island in Biscayne Bay. Cruise ships and cargo ships both dock there. Mateo writes: According to the Bayfront Learning Center, "Cruise ships and cargo ships both dock there." Is this a quote or a paraphrase?	**A quote, because it copies the exact words inside quotation marks**	Mateo copied the exact words and put them inside quotation marks with the source named. That is a quote.

ID	Question	Answer	Why (explain to student)
j2_s1	Set 2: Source: From “PortMiami Facts,” a fact sheet by the Bayfront Learning Center PortMiami sits on Dodge Island in Biscayne Bay. Cruise ships and cargo ships both dock there. Which is the BEST paraphrase of “PortMiami sits on Dodge Island in Biscayne Bay”?	**The Bayfront Learning Center explains that the port is on an island in Biscayne Bay called Dodge Island.**	A strong paraphrase keeps the meaning, uses new words and sentence order, and names the source. Names like Dodge Island and Biscayne Bay can stay. Copying “PortMiami sits on Dodge Island in Biscayne Bay.” with no credit is plagiarism, and the sentences about the middle of the ocean and ships being fun change the meaning.
j3_s1	Set 2: Source: From “PortMiami Facts,” a fact sheet by the Bayfront Learning Center PortMiami sits on Dodge Island in Biscayne Bay. Cruise ships and cargo ships both dock there. Which is a correct citation for this source?	**“PortMiami Facts” by the Bayfront Learning Center**	A simple citation gives the title plus the author or organization: “PortMiami Facts” by the Bayfront Learning Center.
j1_s2	Set 3: Source: From “Night Shift at the Port,” a magazine article by Daniel Reyes The port never really sleeps. Trucks roll in and out long after the sun goes down. Kiara loves the words “never really sleeps” and wants to use them in her report. What should she do?	**Quote them inside quotation marks and name Daniel Reyes**	When an author’s exact words are special, quote them: put the exact words inside quotation marks and name the source. Changing words inside quotation marks is not honest, and leaving out the author is plagiarism.
j2_s2	Set 3: Source: From “Night Shift at the Port,” a magazine article by Daniel Reyes The port never really sleeps. Trucks roll in and out long after the sun goes down. Which quote is punctuated correctly?	**“The port never really sleeps,” writes Daniel Reyes.**	When the tag comes after the quote, end the quoted sentence with a comma INSIDE the closing quotation mark, then write the tag.
j3_s2	Set 3: Source: From “Night Shift at the Port,” a magazine article by Daniel Reyes The port never really sleeps. Trucks roll in and out long after the sun goes down. Which sentence is an honest PARAPHRASE?	**Daniel Reyes explains that trucks keep coming and going at the port even late at night.**	The sentence about trucks coming and going late at night keeps the meaning in new words and names the author. “Trucks roll in and out long after the sun goes down.” is copied with no credit, the sentence with quotation marks is a quote, and saying the port closes at sunset changes the meaning.

PUTTING SKILLS TOGETHER (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
x1_s0	Set 1: Two steps: Amara’s crew has 36 floor tiles. They lay 3/4 of the tiles in the lobby. How many tiles are LEFT? Tiles left:	**9 (also accepted: 9 tiles, 9 tile)**	Step 1: 3/4 × 36 = 108/4 = 27 tiles are used. Step 2: 36 − 27 = 9 tiles are left. (Or: 1/4 are left, and 1/4 × 36 = 9.)
x2_s0	Set 1: Which explanation is correct? Is 9/12 in simplest form?	**No. 9 and 12 share the factor 3, so 9/12 = 3/4**	9 = 3 × 3 and 12 = 3 × 4, so they share the factor 3. Divide both by 3: 9/12 = 3/4. (9 is not divisible by 2.)
x3_s0	Set 1: Find the mistake: Nadia says 2/3 × 6 = 2/18. What did she do wrong?	**She multiplied the denominator by 6. Multiply the numerator: 2/3 × 6 = 12/3 = 4**	A whole number times a fraction multiplies the numerator: 2 × 6 = 12, so 12/3 = 4. Multiplying the denominator makes the answer smaller, but 2/3 of 6 should be 4.

ID	Question	Answer	Why (explain to student)
x4_s0	Set 1: Find the mistake: a student labels this line from a poem as a simile: “The moon is a silver plate.” What is wrong?	**It compares without like or as, so it is a metaphor**	A simile uses like or as. “The moon IS a silver plate” compares without like or as, so it is a metaphor.
x1_s1	Set 2: Two steps: a crane cable is 5 yards long. Andre cuts off 1/3 of it. How many FEET does he cut off? Feet:	**5 (also accepted: 5 feet, 5 foot, 5 ft)**	Step 1: 5 yards = 5 × 3 = 15 feet. Step 2: 1/3 × 15 = 15/3 = 5 feet.
x2_s1	Set 2: Which explanation is correct? Is 91 a prime number?	**No. 91 = 7 × 13, so it has more than two factors**	Checking 2, 3, and 5 is not enough. 91 = 7 × 13, so its factors are 1, 7, 13, and 91. More than two factors means 91 is composite. (Numbers like 11, 31, and 41 end in 1 and ARE prime.)
x3_s1	Set 2: Find the mistake: Leo says 2 3/5 = 6/5, because 2 × 3 = 6. What should he do instead?	**Multiply the whole number by the denominator and add the numerator: 2 × 5 + 3 = 13, so 13/5**	Each whole is 5/5, so 2 wholes = 10/5. Add the 3/5: 10/5 + 3/5 = 13/5.
x4_s1	Set 2: Find the mistake: Kiara copied a sentence from an article into her report. She named the author but did NOT use quotation marks. Is that okay?	**No. Copied words need quotation marks even when the source is named**	Copied words always go inside quotation marks, even when you name the source. Without the marks, the reader thinks the words are Kiara’s own.
x1_s2	Set 3: Two steps: Killa has 3 kilograms of quinoa. She cooks 1/4 of it for a family meal. How many GRAMS does she cook? Grams:	**750 (also accepted: 750 grams, 750 gram, 750 g)**	Step 1: 3 kilograms = 3 × 1,000 = 3,000 grams. Step 2: 1/4 × 3,000 = 3,000 ÷ 4 = 750 grams.
x2_s2	Set 3: Which explanation is correct? What is the least common multiple (LCM) of 6 and 8?	**24, because it is the smallest number that is a multiple of both 6 and 8**	Multiples of 6: 6, 12, 18, 24... Multiples of 8: 8, 16, 24... The smallest shared multiple is 24. 48 is a common multiple, but not the least one, and 2 is the greatest common factor.
x3_s2	Set 3: Find the mistake: Mei says 4/6 is equivalent to 6/8, because she added 2 to the top and the bottom. What is wrong?	**Adding does not make equivalent fractions. 4/6 = 2/3 and 6/8 = 3/4, which are not equal**	Equivalent fractions come from multiplying or dividing the top and bottom by the same number. Simplify both: 4/6 = 2/3 and 6/8 = 3/4. They are not the same amount.
x4_s2	Set 3: Find the mistake: “Alpacas give soft wool for weaving. However, their manure helps the crops grow.” Why is “However” the wrong transition?	**The second sentence adds another benefit, so it should use Also, not a contrast word**	“However” signals a contrast. Both sentences tell good things alpacas give, so the writer should use an adding transition such as “Also.”

FIX THE SENTENCE (2 POINTS EACH)

ID	Question	Answer	Why (explain to student)
s1_s0	Set 1: Fix the sentence: nadia said, the cows are ready for milking	**Nadia said, "The cows are ready for milking."**	Capitalize Nadia, the name that starts the sentence. Put quotation marks around her exact words, capitalize the first word of what she said, and put the period inside the closing quotation mark.

ID	Question	Answer	Why (explain to student)
s2_s0	Set 1: Fix the sentence: Lena Torres writes, the cranes work late into the night.	**Lena Torres writes, "The cranes work late into the night."**	A quote copies an author's exact words, so put quotation marks around them. Capitalize the first word of the quoted sentence, and keep the period inside the closing quotation mark.
s3_s0	Set 1: Fix the sentence: last summer amara visited her aunt in houston.	**Last summer Amara visited her aunt in Houston. OR Last summer, Amara visited her aunt in Houston.**	Capitalize the first word of a sentence and every proper noun: the name Amara and the city Houston.
s4_s0	Set 1: Fix the sentence: The alpacas in Killa's village eats grass on the hillside.	**The alpacas in Killa's village eat grass on the hillside.**	The subject is alpacas (plural), so the verb is eat, not eats. The words "in Killa's village" come between the subject and verb, but they do not change the subject.
s1_s1	Set 2: Fix the sentence: where is the hay asked Grandpa	**"Where is the hay?" asked Grandpa.**	Put quotation marks around Grandpa's exact words and capitalize Where. His words are a question, so the question mark goes inside the closing quotation mark. End the whole sentence with a period.
s2_s1	Set 2: Fix the sentence: Daniel Reyes writes, "the port never really sleeps".	**Daniel Reyes writes, "The port never really sleeps."**	Capitalize the first word of the quoted sentence, and move the period inside the closing quotation mark.
s3_s1	Set 2: Fix the sentence: on sunday killa sold potatoes at the market in pisac, peru.	**On Sunday Killa sold potatoes at the market in Pisac, Peru. OR On Sunday, Killa sold potatoes at the market in Pisac, Peru.**	Capitalize the first word and every proper noun: the day Sunday, the name Killa, the town Pisac, and the country Peru.
s4_s1	Set 2: Fix the sentence: Each of the cranes have its own operator.	**Each of the cranes has its own operator.**	The subject is Each, which means each ONE, so it is singular and needs has, not have. (Its, with no apostrophe, correctly shows the operator belongs to the crane.)
s1_s2	Set 3: Fix the sentence: Let's check the calves, Mom said, before it gets dark.	**"Let's check the calves," Mom said, "before it gets dark."**	This is one spoken sentence split by the tag. Put quotation marks around both parts of Mom's words. The comma after calves goes inside the closing quotation mark, and before stays lowercase because it continues the same sentence.
s2_s2	Set 3: Fix the sentence: Lena Torres writes, The crane operators sit in small cabs high above the dock.	**Lena Torres writes, "The crane operators sit in small cabs high above the dock."**	Put quotation marks around the author's exact words, and keep the period inside the closing quotation mark.

ID	Question	Answer	Why (explain to student)
s3_s2	Set 3: Fix the sentence: the ship sailed from miami to the bahamas on friday.	**The ship sailed from Miami to the Bahamas on Friday.**	Capitalize the first word and the proper nouns Miami, Bahamas, and Friday. The word the before Bahamas stays lowercase in the middle of a sentence.
s4_s2	Set 3: Fix the sentence: Amara and her aunt was at the building site by seven.	**Amara and her aunt were at the building site by seven.**	Amara and her aunt are two people, a plural subject, so use were, not was.

WRITER'S NOTEBOOK FOLLOW-UP (4 POINTS; THE NOTEBOOK WRITING ITSELF IS UNSCORED)

ID	Question	Answer	Why (explain to student)
k1_s0	Set 1: Which sentence correctly punctuates dialogue AND uses a simile?	**“The barn is as warm as a blanket,” Nadia said.**	“As warm as a blanket” is a simile because it uses as, and the comma sits inside the closing quotation mark before the tag. Without the comma the dialogue is punctuated wrong, “The barn is warm” has no comparison, and “The barn is a warm blanket” is a metaphor.
k1_s1	Set 2: Which sentence correctly punctuates dialogue AND uses a metaphor?	**“The crane is a giant in the sky,” Andre said.**	“The crane IS a giant” is a metaphor (no like or as), and the dialogue has a comma inside the quotation mark and a capital A for the name Andre. “Like a giant” makes a simile, not a metaphor; the other wrong sentences are missing the comma or have a lowercase name.
k1_s2	Set 3: Which sentence uses a transition AND a simile?	**Finally, the terraces glowed like steps of gold in the evening sun.**	“Finally” is a transition, and “like steps of gold” is a simile. Without “Finally” there is no transition, “green and wet” has no comparison, and “the terraces are steps of gold” is a metaphor instead of a simile.

MATCH-UP ROUND (2 POINTS PER FIRST-TRY MATCH, 10 TOTAL)

ID	Question	Answer	Why (explain to student)
match1_s0	Set 1: prime number	**exactly two factors: 1 and itself**	Unit 3 vocabulary: prime number means exactly two factors: 1 and itself.
match2_s0	Set 1: equivalent fractions	**fractions that name the same amount**	Unit 3 vocabulary: equivalent fractions means fractions that name the same amount.
match3_s0	Set 1: dialogue tag	**words that tell who is speaking**	Unit 3 vocabulary: dialogue tag means words that tell who is speaking.
match4_s0	Set 1: simile	**a comparison using like or as**	Unit 3 vocabulary: simile means a comparison using like or as.
match5_s0	Set 1: paraphrase	**an author’s idea in your own words**	Unit 3 vocabulary: paraphrase means an author’s idea in your own words.
match1_s1	Set 2: composite number	**a number with more than two factors**	Unit 3 vocabulary: composite number means a number with more than two factors.

ID	Question	Answer	Why (explain to student)
match2_s1	Set 2: mixed number	**a whole number and a fraction together**	Unit 3 vocabulary: mixed number means a whole number and a fraction together.
match3_s1	Set 2: topic sentence	**tells the main idea of a paragraph**	Unit 3 vocabulary: topic sentence means tells the main idea of a paragraph.
match4_s1	Set 2: metaphor	**says one thing IS another**	Unit 3 vocabulary: metaphor means says one thing IS another.
match5_s1	Set 2: plagiarism	**using words or ideas without credit**	Unit 3 vocabulary: plagiarism means using words or ideas without credit.
match1_s2	Set 3: least common multiple	**the smallest multiple two numbers share**	Unit 3 vocabulary: least common multiple means the smallest multiple two numbers share.
match2_s2	Set 3: simplest form	**top and bottom share no factor but 1**	Unit 3 vocabulary: simplest form means top and bottom share no factor but 1.
match3_s2	Set 3: transition	**a word like first or however that links ideas**	Unit 3 vocabulary: transition means a word like first or however that links ideas.
match4_s2	Set 3: personification	**giving human actions to a thing**	Unit 3 vocabulary: personification means giving human actions to a thing.
match5_s2	Set 3: citation	**names a source's title and author or organization**	Unit 3 vocabulary: citation means names a source's title and author or organization.

UNIT 3 BOSS CHALLENGE (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
z1_s0	Set 1: A refrigerated truck from Nadia's family farm in Wisconsin delivers 24 boxes of cheese curds to a ship at PortMiami. Each box weighs 15 pounds. Back home, Nadia is writing about the day the truck left the farm. Two steps: Aunt Guerline's crew has loaded 2/3 of the boxes onto the ship. How many POUNDS of cheese curds have they loaded? Pounds:	**240 (also accepted: 240 pounds, 240 pound, 240 lb, 240 lbs)**	Step 1: 2/3 × 24 = 48/3 = 16 boxes are loaded. Step 2: 16 × 15 = 240 pounds.
z2_s0	Set 1: A refrigerated truck from Nadia's family farm in Wisconsin delivers 24 boxes of cheese curds to a ship at PortMiami. Each box weighs 15 pounds. Back home, Nadia is writing about the day the truck left the farm. Nadia's draft says: the cheese truck is as shiny as a new spoon nadia told her dad. Which revision fixes the dialogue AND keeps the simile?	**"The cheese truck is as shiny as a new spoon," Nadia told her dad.**	Quotation marks go around only Nadia's words, a comma goes inside the closing quotation mark, and Nadia is capitalized. The simile "as shiny as a new spoon" stays. The other choices miss the comma, drop the simile, or put the marks around the tag.

ID	Question	Answer	Why (explain to student)
z1_s1	Set 2: Ms. Okafor orders 18 steel beams for the top floor of the Houston apartment building. Each beam is 12 feet long. Amara is also writing a paragraph for the building's newsletter. Three steps: 5/6 of the beams are delivered on Monday. How many YARDS of beams are delivered on Monday? Yards:	**60 (also accepted: 60 yards, 60 yard, 60 yd, 60 yds)**	Step 1: 5/6 × 18 = 90/6 = 15 beams. Step 2: 15 × 12 = 180 feet. Step 3: 180 ÷ 3 = 60 yards.
z2_s1	Set 2: Ms. Okafor orders 18 steel beams for the top floor of the Houston apartment building. Each beam is 12 feet long. Amara is also writing a paragraph for the building's newsletter. Amara's paragraph: (1) An apartment building goes up in stages. (2) First, the crew pours the foundation. (3) _____ they build the frame, one floor at a time. (4) Finally, families move in. Which transition best fills the blank, and why?	**Next, because sentence 3 tells the following step in time order**	The paragraph tells steps in order: first, then the next step, then finally. Sentence 3 is the step after the foundation, so "Next" fits. There is no contrast or example, and sentence 3 is not the end.
z1_s2	Set 3: Killa's family harvests 40 kilograms of potatoes from their terraces in the Andes. Meanwhile, at PortMiami, Mateo is finishing his research report about the port. Two steps: the family sells 3/8 of the potatoes at the Sunday market. How many GRAMS of potatoes do they sell? Grams:	**15,000 (also accepted: 15000, 15,000 grams, 15000 grams, 15,000 gram, 15,000 g)**	Step 1: 3/8 × 40 = 120/8 = 15 kilograms. Step 2: 15 × 1,000 = 15,000 grams.
z2_s2	Set 3: Killa's family harvests 40 kilograms of potatoes from their terraces in the Andes. Meanwhile, at PortMiami, Mateo is finishing his research report about the port. Mateo found this sentence in an article by Lena Torres: At sunrise, the cranes stand like giraffes against the pink sky. Which sentence uses it correctly and honestly?	**Lena Torres writes, "At sunrise, the cranes stand like giraffes against the pink sky."**	The words are special (a simile!), so quote them exactly, inside quotation marks, and name the author. Copying the sentence with no quotation marks and no author is plagiarism, the "dinosaurs" version changes the words inside the quotation marks, and the version with the tag but no quotation marks is missing the marks.

Pre & Post sheet answer guide

Many items are open-ended. Grade for genuine understanding and complete sentences, not exact wording.

PRE-LESSON WARM-UP

#	Prompt	Model answer / grading note
1	Factors of 30; prime or composite	1, 2, 3, 5, 6, 10, 15, 30. Composite, because it has more than two factors.
2	12/18 simplest form; 11/4 as a mixed number	12/18 = 2/3 (divide by the GCF, 6). 11/4 = 2 3/4.
3	Correct dialogue punctuation	"Come see the new calf," Nadia called.
4	3/4 × 8 and 1/2 × 4/5	3/4 × 8 = 24/4 = 6. 1/2 × 4/5 = 4/10 = 2/5.
5	Match the words	simile: a comparison using like or as; metaphor: a comparison that says one thing IS another; paraphrase: an author's idea written in your own words.
6	6 feet to inches; 3 kilograms to grams	72 inches (6 × 12). 3,000 grams (3 × 1,000).

POST-LESSON CHALLENGE

#	Prompt	Model answer / grading note
1	LCM of 4 and 6	12 days. Multiples of 4: 4, 8, 12. Multiples of 6: 6, 12. The least common multiple is 12.
2	3/4 of 4 yards, in feet	9 feet. 4 yards = 4 × 3 = 12 feet; 3/4 × 12 = 9 feet. (Or 3/4 × 4 = 3 yards = 9 feet.)
3	Personification	The wind whistled a tune through the corn. (Wind cannot really whistle a tune. The giant line is a simile, the ocean line is a metaphor, and the Tuesday line is literal.)
4	Quote and paraphrase Lena Torres	(a) Lena Torres writes, “Container ships carry fruit, clothing, and cars to ports around the world.” (comma after the tag, exact words, period inside the closing quotation mark). (b) Model: Lena Torres explains that big cargo ships bring goods like food, clothes, and vehicles to harbors all over the globe. Look for new words, the same meaning, and the author named, with no quotation marks.
5	Writing: informative paragraph	Model: PortMiami is one of the busiest places in Miami. First, giant cranes lift containers off the ships. The cranes are steel giants that work all day. Finally, trucks carry the cargo to stores across Florida. Look for a topic sentence, at least one transition, a simile or metaphor, complete sentences, and correct capitalization and end marks.
