PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

Pre-Lesson Warm-Up: Factors on the Farm

Nadia lives on a dairy farm in Wisconsin. Before the lesson, warm up with these problems. Show your work.

1 Nadia puts 12 calves into equal rows. Write every multiplication fact that equals 12 (for example, 1 × 12).

2 Skip-count by 4 to write the first six multiples of 4.

3 Which number can be divided evenly by 5?

42 55 63 71

4 List all the factors of 20.

5 Match each word to its meaning. Write the letter next to each word.

___ **factor**	**A.** the answer to a multiplication problem
___ **multiple**	**B.** a number you multiply to get a product
___ **product**	**C.** the answer when you multiply a number by 1, 2, 3, 4…

6 Review (Week 7): 576 ÷ 24 = ?

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Post-Lesson Challenge: Nadia's Farm Schedule

Use factors, multiples, and prime numbers to finish Nadia's plans. Show your work.

1 Nadia has 42 bales of hay. List every factor pair of 42. Then name one way she could stack the bales in equal stacks.

2 Which cow ID number is prime?

(39) (43) (49) (57)

3 The milk truck comes every 3 days and the feed truck comes every 4 days. Both came today. In how many days will they come on the same day again? What is this number called?

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON · CONTINUED

Post-Lesson Challenge: Nadia's Farm Schedule

4. Nadia packs 16 bags of cheese curds and 24 milk bottles into identical crates with nothing left over. What is the greatest number of crates she can fill? How many bags and how many bottles go in each crate?

5. Writing: Nadia's brother says, "87 is prime because it is odd." In two or three complete sentences, explain whether he is right. Use a divisibility rule and the word composite or prime.

★ **Challenge:** The feed truck comes every 4 days, the vet every 6 days, and the cheese buyer every 9 days. All three came on Day 0. On what day will all three come on the same day again?

Looking Ahead: Next week (Week 12) we visit an apartment build in Houston, where factors help us find equivalent fractions, simplify fractions, and work with mixed numbers.
