KCE PATHWAYS · GRADE 3 · UNIT 5: DATA AND DESIGN · WEEK 21 · MATH

Saturday at Pike Place Market

Name: _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

Pre-Lesson Warm-Up: Ready for Market Day

Try your best on each problem. Draw a picture if it helps! It is okay if some of it feels new.

1. Review: The Market bakery opens at 6:50 a.m. The first loaves come out of the oven 35 minutes later. What time is it then? Show your jumps.

2. A picture graph key says each flower picture stands for 2 bouquets. How many bouquets do 5 flower pictures show?

3. On a bar graph, the grid lines count by 10. A bar stops halfway between 20 and 30. What number does the bar show?

4. Which part of a picture graph tells how many each picture stands for?

   the key | the title | the labels

5. Draw a picture graph row for 15 apples. Use a key where each circle stands for 5 apples.

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

Post-Lesson Activity: The Market Report

Read the key or the scale first. Subtract to find how many more or how many fewer. Show your work.

1. Mr. Bashir's picture graph key says each picture stands for 10 boxes. Plums show 4 pictures and pears show 2 and a half pictures. How many boxes of each? How many more boxes of plums?

2. Draw a bar graph with a scale of 5 for these honey sales: Clover 20 jars, Fireweed 35 jars, Blackberry 10 jars. Label the numbers and the bars.

3. Find the mistake: The grid lines on a bar graph count by 2. Bodhi says a bar that stops on the 4th line shows 4 kites. What went wrong? What is the real number?

4. Two steps: Beatriz's key says each star stands for 5 visitors. Monday shows 6 stars and Tuesday shows 9 stars. The Market wants 100 visitors in the two days. How many more visitors are needed?

★ **Challenge:** Explain why a key of 10 works well for 30, 50, and 80 tulips, but a key of 20 does not.

Looking Ahead: Next week: measure wooden pieces to the half inch and quarter inch in an Ozark Mountains woodshop, and show the measurements on a line plot.
