KCE PATHWAYS · GRADES 4–5 · UNIT 6: VOICES OF CHANGE · WEEK 29 · SCIENCE

# People Protecting Earth

**Name:** _____ **Date:** _____

PRE-LESSON WARM-UP · DO THIS BEFORE YOUR COMPUTER LESSON

## Pre-Lesson Warm-Up: What Do I Already Know?

*Answer with what you know right now. It is OK to guess!*

1. **Review (Week 28):** Name the three ways heat moves. Give one example of each.

2. Name one way people can harm the land, one way they can harm the water and one way they can harm the air.

3. What does it mean when an animal is *endangered*? Name an endangered animal you have heard of.

4. Predict: Since 1970, the United States economy and the amount of driving have grown a lot. Do you think air pollution went up or down? Why?

5. Draw one thing your family or community does to protect Earth. Label it.

POST-LESSON CHALLENGE · DO THIS AFTER YOUR COMPUTER LESSON

## Post-Lesson Activity: Evidence for a Healthier Earth

*Use evidence from today's lesson. Write in complete sentences.*

1. **Sort it.** Write land, water, air or living things for each: (a) a forest cleared for a mall, (b) CFCs thinning the ozone layer, (c) lead poisoning condors.

2. **Two-step.** A factory released 4,000 tons of a pollutant. It cut that amount by 85 percent. What percent is left? How many tons is that? Show both steps.

3. **Find the mistake.** Porter says, "The air got cleaner because nobody drives anymore." Use the EPA data to explain what is wrong.

4. **Explain.** Why does giving hunters non-lead ammunition work on the CAUSE of the condors' problem, not just the effect?

★ **Challenge: Environmental justice.** In your own words, explain what environmental justice means and why scientists like Robert Bullard collect data on where pollution is.

**Looking Ahead:** Next week: the Final Checkpoint. You will show what you have learned across the Pathways program. Bring your best thinking and your scientist habits!
