KCE PATHWAYS · GRADE 3 · UNIT 6: BUILDING TOGETHER · WEEK 29 · READING

The Eagle Comeback Report — Teacher Lesson Plan & Answer Key

Learning objectives: Students ask a research question and pick out its key words, choose facts that answer it, take short notes in their own words while keeping names, dates and numbers exact, mark each note with its source (A or B), tell which facts are in one source or both, and sort notes into groups to plan a short report with a topic sentence, a conclusion and a list of sources.

Duration: 35–45 minutes
Materials: Computer or tablet with the lesson open · pencil · printed Pre & Post sheet

Lesson flow (as it appears on screen)

1. Title and name: the student types first and last name so results go to KingCretot Experience. Read the Pathway Points rules together: 2 tries per question, points only for a correct first try, and the answer and reason appear after a second miss. Introduce Giulia and her cousin Gideon in Alton, Illinois, a river town on the Mississippi River where hundreds of bald eagles fish every winter, and the librarian Ms. Goldie, who gives them two sources for the library's eagle display.
2. Warm-Up, Part 1: Week 28 Review (6 pts, 3 each): comparing two short stories with the same character (Gilda, Goran or Gisela, a different pair in each set).
3. Warm-Up, Part 2 (6 pts, 3 each): two more items about the same stories: the setting, a trait, or a comparing sentence with but.
4. Pencil Break (Pre): the student opens or prints the Pre/Post sheet (grade3/prepost/KCE_Reading_PrePost_G3W29.pdf) and completes Page 1 (Pre) before any teaching. Do not help with answers; it shows what they already know.
5. Word Wrangler: 6 vocabulary cards (research, source, nesting pair, endangered, comeback, protect), each with a sentence from the reading.
6. Picture It: From Sources to Report. Question, sources, notes, groups, report. A good note is short, in your own words and exact with names, dates and numbers, with an A or B to show where it came from. Always ask: does this fact answer my question? Which source said it?
7. Read: Two Sources About Bald Eagles (Source A, The Eagle Comeback, a magazine article from Wild River Kids; Source B, the Bald Eagle Fact Card from the library's eagle display). The research question: How did the bald eagle make a comeback in the United States?
8. Ask a Research Question, Part 1 (6 pts, 3 each): the key word comeback, which facts answer the question (1972, DDT banned; 1963, only 417 nesting pairs) and which do not (white heads, size), and the best research question.
9. Ask a Research Question, Part 2 (3 pts): key words, research uses facts from sources, not guesses, and skipping interesting facts that do not answer the question.
10. Take Notes in Your Own Words, Part 1 (6 pts, 3 each): the best note keeps the fact exactly right (1972, not 1927; 417, not 714) and gets an A or B for its source.
11. Take Notes in Your Own Words, Part 2 (3 pts): one more note item (a note in the researcher's own words, or an exact number from Source B).

12. Two Sources: Who Said What?, Part 1 (6 pts, 3 each): only Source A tells about DDT, 1972, 2007 and 316,700 eagles; only Source B tells about nests, food, looks and more than 71,000 pairs; both give 417 pairs in 1963. Use “According to Source B, ...”.
13. Two Sources: Who Said What?, Part 2 (3 pts): two sources that agree make a fact more sure, and each source adds facts the other does not have.
14. From Notes to a Report, Part 1 (6 pts, 3 each): sort notes into problem, help and comeback groups, choose a topic sentence, and list the sources at the end.
15. From Notes to a Report, Part 2 (3 pts): a two-step note count or nesting-pair problem, or a find-the-mistake item (316,700 eagles in 2019 belongs in the comeback group).
16. Word Work Bonus, Part 1: Plurals: -s, -es, and -ies (XP only, not scored).
17. Word Work Bonus, Part 2: Plurals: -s, -es, and -ies (XP only, not scored).
18. Match-Up Round (10 pts, 2 per first-try match): Set 1 matches research words to meanings, Set 2 matches years to eagle events, Set 3 matches sources and report groups to what they hold.
19. Fix the Sentence (10 pts, 5 each): each item names the one kind of fix (capital letters for the first word, a river, names, a town and a state, list commas, its with no apostrophe, or one verb). The whole sentence is checked exactly; curly quotes and extra spaces are forgiven. The corrected sentence appears after the 2nd miss.
20. Type-It Corral, Part 1 (8 pts, 4 each): typed vocabulary and text-detail answers; capital letters and a final period do not matter, but spelling does. The “Look back” panel is allowed.
21. Type-It Corral, Part 2 (4 pts): one more typed answer, a two-step word problem, same checking rules.
22. Speed Arena, Part 1 (XP only, not scored).
23. Speed Arena, Part 2 and Keyboard Corral (XP only, not scored).
24. Boss Battle, Part 1: Research Summit (10 pts, 5 each): which source tells about DDT and what it did, which sentence correctly tells who said what, the best conclusion, and typed facts (threatened, 834, Hawaii).
25. Boss Battle, Part 2: Research Summit (10 pts, 5 each): find-the-mistake items (eagles were not banned in 2007; 316,700 is eagles, not pairs), skipping the giant-nest fact, and typed facts from Source B (bird, Illinois, 6 feet).
26. Pencil Break (Post): the student turns to Page 2 (Post) of the same sheet (grade3/prepost/KCE_Reading_PrePost_G3W29.pdf) and completes it, plus the ★ Challenge if time allows, before seeing the score. The sheet buttons let the student open or print it again.
27. Results (Real Researcher!): the score out of 100 is sent to KingCretot Experience. 85 or higher shows “Research Reading Master!” with the congratulations message “Research reading master!” and a big confetti burst; below 85 shows “Great Effort Today!” with encouragement (“Every researcher checks the sources again. You can too!”), and the next attempt brings a fresh question set (sets rotate 1, 2, 3). Both messages remind the student to finish the Post-Lesson Challenge sheet.

Lesson answer key with reasoning

Every scored item the student sees, in order, across all three rotating question sets. Each item allows 2 tries and earns Pathway Points only on a correct first try. The "why" is the same reasoning shown on screen after a second missed try.

WARM-UP: WEEK 28 REVIEW (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
w1_s0	Set 1: *Two Stories About Gilda · a mini series Story 1: On a windy spring day at the park, Gilda's kite got stuck in a tree. She stomped her foot and gave up. Story 2: On a rainy fall morning at school, Gilda's paper boat sank in a puddle. This time she took a deep breath, folded a new boat, and tried again.* Type your answer: Story 1 happens at the ___ on a windy spring day.	**park** (also accepted: the park)	Story 1 says, "On a windy spring day at the park."
w2_s0	Set 1: How does Gilda act differently in Story 2? [She tries again instead of giving up. / She gives up again. / She stomps her foot. / She flies her kite.]	**She tries again instead of giving up.**	In Story 1 she gives up. In Story 2 she takes a deep breath, folds a new boat, and tries again. She changed!
w3_s0	Set 1: Type your answer: Type the signal word that shows a difference: "In Story 1 Gilda gives up, ___ in Story 2 she tries again."	**but** (also accepted: while, whereas)	But joins two ideas that are different.
w4_s0	Set 1: Find the mistake! Gideon says, "Both stories have the same setting, because Gilda is in both." What went wrong? [The same character does not mean the same setting. Story 1 is at the park in spring, and Story 2 is at school in the fall. / Gilda is only in Story 1. / Neither story has a setting. / Nothing went wrong.]	**The same character does not mean the same setting. Story 1 is at the park in spring, and Story 2 is at school in the fall.**	Remember from Week 28: compare the characters and the setting separately.
w1_s1	Set 2: *Two Stories About Goran · a mini series Story 1: At the town pool in July, Goran was too shy to say hello to the new boy. He swam alone all afternoon. Story 2: At the library in January, Goran saw a new girl sitting by herself. He walked over and asked, "Do you want to read with me?"* What is the setting of Story 2? [The library in January / The town pool in July / The park in the spring / The beach at night]	**The library in January**	Story 2 says, "At the library in January."
w2_s1	Set 2: Type your answer: In Story 1, Goran is too ___ to say hello to the new boy.	**shy**	Story 1 says Goran was too shy to say hello, so he swam alone.
w3_s1	Set 2: Which trait describes Goran in Story 2? [Friendly / Shy / Lazy / Unkind]	**Friendly**	He walks over and asks the new girl to read with him. That is evidence that he is friendly.
w4_s1	Set 2: Type your answer: What is the SAME in both stories? In both stories, Goran meets someone ___. (Type one word.)	**new**	In Story 1 he sees a new boy, and in Story 2 he sees a new girl.

ID	Question	Answer	Why (explain to student)
w1_s2	Set 3: *Two Stories About Gisela · a mini series Story 1: At the farmers market on a Saturday morning, Gisela forgot her grandma's shopping list, so she had to go home to get it. Story 2: At the bakery on a snowy evening, Gisela checked her pocket twice. The list was there, so she bought everything on it.* Type your answer: In Story 1, Gisela forgot her grandma's shopping ___.	**list**	Story 1 says she forgot the shopping list, so she had to go home to get it.
w2_s2	Set 3: What is the problem in Story 1? [Gisela forgot the list, so she had to go home to get it. / Gisela lost her money at the bakery. / The farmers market was closed. / Gisela bought everything on the list.]	**Gisela forgot the list, so she had to go home to get it.**	Forgetting the list is the problem. Going home to get it is what happens because of it.
w3_s2	Set 3: Which sentence compares how Gisela acts in the two stories? [In Story 1 she forgets the list, but in Story 2 she checks her pocket twice. / She forgets the list in both stories. / In Story 1 she is careful, but in Story 2 she forgets. / She is at the bakery in both stories.]	**In Story 1 she forgets the list, but in Story 2 she checks her pocket twice.**	Checking her pocket twice shows she learned to be careful. She changed from Story 1 to Story 2.
w4_s2	Set 3: Type your answer: Story 2 happens at the ___ on a snowy evening.	**bakery** (also accepted: the bakery)	Story 2 says, "At the bakery on a snowy evening."

ASK A RESEARCH QUESTION (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
t1a_s0	Set 1: Type your answer: Giulia and Gideon's research question is: How did the bald eagle make a ___ in the United States?	**comeback** (also accepted: a comeback)	Their question is about the comeback: how the eagles came back after almost disappearing.
t1b_s0	Set 1: Which fact BEST helps answer the research question? [In 1972, the United States banned DDT. / Bald eagles also eat mice and snakes. / Young eagles are mostly brown. / A bald eagle can weigh up to 14 pounds.]	**In 1972, the United States banned DDT.**	Banning DDT helped the eagles come back. The other facts are interesting, but they are not about the comeback.
t1c_s0	Set 1: Type your answer: The most important words in a research question are called ___ words.	**key**	Key words, like bald eagle and comeback, tell you what facts to look for.
t1a_s1	Set 2: Which fact does NOT answer the question about the comeback? [Young eagles get their white heads when they are about 4 or 5 years old. / DDT made eagles' eggshells thin and weak. / In 2007, the bald eagle was removed from the endangered list. / In 1963, only 417 nesting pairs were left.]	**Young eagles get their white heads when they are about 4 or 5 years old.**	White heads are a fun fact about how eagles look, but they do not explain the comeback.
t1b_s1	Set 2: Type your answer: In 1963, there were only ___ nesting pairs of bald eagles in the lower 48 states. (Type the number.)	**417** (also accepted: four hundred seventeen)	Both sources say there were only 417 nesting pairs in 1963.

ID	Question	Answer	Why (explain to student)
t1c_s1	Set 2: Find the mistake! Gideon says, "I will answer our research question with my best guess." What went wrong? [Research answers a question with facts from sources, not with guesses. / Research has no questions. / Guesses are always facts. / Nothing went wrong.]	**Research answers a question with facts from sources, not with guesses.**	Researchers read sources to find facts. A guess is not evidence.
t1a_s2	Set 3: Type your answer: Research means looking for ___ to answer a question.	**facts** (also accepted: information)	Research means looking for facts in sources to answer a question.
t1b_s2	Set 3: Which is the best RESEARCH QUESTION about bald eagles? [Why did bald eagles almost disappear? / Bald eagles are cool. / I saw an eagle once. / Eagles!]	**Why did bald eagles almost disappear?**	A research question asks something you can answer with facts. The others are not questions.
t1c_s2	Set 3: Which explanation is correct? Giulia says, "Some facts are interesting but do not answer our question, so we can skip them in this report." Gideon says, "We must copy every fact from both sources into our report." [Giulia is right, because a report uses the facts that answer the question / Gideon is right, because every fact belongs in every report / Gideon is right, because copying is the same as taking notes / Neither is right, because reports have no facts]	**Giulia is right, because a report uses the facts that answer the question**	A strong report stays on its question. Extra facts can go in a different report.

TAKE NOTES IN YOUR OWN WORDS (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
t2a_s0	Set 1: Which is the best NOTE for this sentence? "In 1972, the United States banned DDT." [1972: DDT banned in United States (A) / 1927: DDT banned (A) / Eagles banned in 1972 (A) / 1972: DDT was good for eagles (A)]	**1972: DDT banned in United States (A)**	The best note is short and keeps the fact exactly right. The others change the year or the facts.
t2b_s0	Set 1: Type your answer: A note should keep names, dates, and numbers exactly the ___.	**same** (also accepted: the same)	You may use your own words, but facts like 1972 and 417 must never change.
t2c_s0	Set 1: Type your answer: Finish Gideon's note from Source B: "White head at about age 4 or ___ (B)." (Type the number.)	**5** (also accepted: five)	Source B says young eagles get their white heads when they are about 4 or 5 years old.
t2a_s1	Set 2: Type your answer: Next to each note, write A or B to show which ___ it came from.	**source** (also accepted: the source)	The letter reminds you where the fact came from, so you can check it or tell readers.
t2b_s1	Set 2: Find the mistake! Giulia's note says: "1963: only 714 pairs left (A)." What went wrong? [She mixed up the digits. Source A says 417 pairs, not 714. / The year should be 1972. / She should not write A. / Nothing went wrong.]	**She mixed up the digits. Source A says 417 pairs, not 714.**	Always check numbers twice. A note in your own words must still have the exact facts.

ID	Question	Answer	Why (explain to student)
t2c_s1	Set 2: Which note is in the researcher's OWN words? [DDT → weak eggshells → eggs broke (A) / It made the eagles' eggshells thin and weak, so many eggs broke or did not hatch. / Eagles liked DDT (A) / Eggshells got stronger (A)]	**DDT → weak eggshells → eggs broke (A)**	The first wrong choice copies the whole sentence. The other two change the facts. The right note is short and true.
t2a_s2	Set 3: Type your answer: Finish the note for "By 2019, there were about 316,700 bald eagles in the lower 48 states." Note: "2019: about ___ eagles (A)." (Type the number.)	**316,700** (also accepted: 316700, three hundred sixteen thousand seven hundred, three hundred sixteen thousand, seven hundred)	Keep the number exactly the same: 316,700.
t2b_s2	Set 3: Which explanation is correct? Gideon says, "Notes should be short key words, but the facts must stay true." Giulia says, "Notes should copy every word from the source." [Gideon is right, because good notes are short, in your own words, and exact / Giulia is right, because copying is the best way to take notes / Giulia is right, because notes must be long / Neither is right, because notes can change the facts]	**Gideon is right, because good notes are short, in your own words, and exact**	Short notes in your own words help you understand and remember. Exact facts keep your report true.
t2c_s2	Set 3: Type your answer: Finish the note from Source B: "Nest up to ___ feet across (B)." (Type the number.)	**10** (also accepted: ten)	Source B says a nest can be up to 10 feet across.

TWO SOURCES: WHO SAID WHAT? (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
t3a_s0	Set 1: Type your answer: Which source tells about DDT? (Type A or B.)	**a** (also accepted: source a)	Only Source A, the magazine article, tells about DDT.
t3b_s0	Set 1: Which fact is in BOTH sources? [In 1963, only 417 nesting pairs were left. / The United States banned DDT in 1972. / A nest can be up to 10 feet across. / Eagles also eat ducks and snakes.]	**In 1963, only 417 nesting pairs were left.**	Both sources give the number 417 for 1963. The other facts are in only one source.
t3c_s0	Set 1: Type your answer: When two sources say the same fact, a researcher can feel more ___ that it is true.	**sure** (also accepted: certain, confident)	Two sources that agree make a fact more trustworthy.
t3a_s1	Set 2: Type your answer: Which source tells how big a bald eagle's nest can be? (Type A or B.)	**b** (also accepted: source b)	Only Source B, the fact card, tells that a nest can be up to 10 feet across.
t3b_s1	Set 2: Find the mistake! Gideon writes, "According to Source B, the United States banned DDT in 1972." What went wrong? [That fact is from Source A. Source B does not tell about DDT. / DDT was banned in 1782. / He should not tell where facts came from. / Nothing went wrong.]	**That fact is from Source A. Source B does not tell about DDT.**	Check your A and B letters. Telling readers the wrong source is a research mistake.

ID	Question	Answer	Why (explain to student)
t3c_s1	Set 2: Why is it smart to read two sources? [You can check facts, and you can find new facts that one source does not have. / Two sources always say exactly the same things. / Reading two sources means you do not need notes. / One source is always wrong.]	**You can check facts, and you can find new facts that one source does not have.**	Source A tells the comeback story. Source B adds facts about the eagle itself. Together they give more.
t3a_s2	Set 3: Which fact is ONLY in Source A? [In 2007, the bald eagle was removed from the endangered list. / In 1963, only 417 nesting pairs were left. / Young eagles are mostly brown. / Bald eagles eat mostly fish.]	**In 2007, the bald eagle was removed from the endangered list.**	The year 2007 is only in Source A. The 417 fact is in both, and the other two are only in Source B.
t3b_s2	Set 3: Type your answer: Finish the sentence that tells where a fact came from: "___ to Source B, bald eagles eat mostly fish."	**according**	According to tells the reader which source a fact came from.
t3c_s2	Set 3: Which explanation is correct? Giulia says, "Source A tells more about the comeback story, and Source B tells more about the eagle itself." Gideon says, "Both sources give exactly the same facts." [Giulia is right, because each source gives some facts the other one does not have / Gideon is right, because both sources are about eagles / Gideon is right, because both sources have numbers / Neither is right, because the sources have no facts]	**Giulia is right, because each source gives some facts the other one does not have**	They share a few facts, like 417 pairs in 1963, but most facts are in only one source.

FROM NOTES TO A REPORT (3 POINTS EACH)

ID	Question	Answer	Why (explain to student)
t4a_s0	Set 1: Which note goes in the PROBLEM group? [DDT → thin eggshells → eggs broke (A) / 1972: DDT banned (A) / 2007: removed from endangered list (A) / 2019: about 316,700 eagles (A)]	**DDT → thin eggshells → eggs broke (A)**	Thin eggshells are WHY eagles almost disappeared. That is the problem.
t4b_s0	Set 1: Type your answer: The first sentence of a report tells what it is about. It is called the ___ sentence.	**topic**	A topic sentence tells the reader what the whole report is about.
t4c_s0	Set 1: Type your answer: Two steps: There were 417 nesting pairs in 1963. Suppose one state had 200 of them and another state had 117. How many pairs were in all the OTHER states? (Type the number.)	**100** (also accepted: one hundred)	First add: 200 plus 117 equals 317. Then subtract: 417 minus 317 equals 100 pairs.
t4a_s1	Set 2: Type your answer: The group for what people did to save the eagles is the ___ group.	**help**	Banning DDT and protecting eagles by law go in the help group.
t4b_s1	Set 2: Which is the best TOPIC SENTENCE for the report? [The bald eagle almost disappeared, but it made an amazing comeback. / I like birds. / Eagles eat fish. / This is my report, and it is done.]	**The bald eagle almost disappeared, but it made an amazing comeback.**	The topic sentence tells what the whole report is about: the eagle's comeback.

ID	Question	Answer	Why (explain to student)
t4c_s1	Set 2: Find the mistake! Gideon puts "2019: about 316,700 eagles (A)" in the PROBLEM group. What went wrong? [That fact shows how eagles are doing now, so it belongs in the comeback group. / The number is too small. / It belongs in no group. / Nothing went wrong.]	**That fact shows how eagles are doing now, so it belongs in the comeback group.**	A big number of eagles in 2019 is good news. It shows the comeback.
t4a_s2	Set 3: Which note goes in the COMEBACK group? [2007: removed from endangered list (A) / DDT → thin eggshells (A) / 1963: only 417 pairs left (A, B) / 1972: DDT banned (A)]	**2007: removed from endangered list (A)**	Being removed from the endangered list shows that eagles came back. 1963 and DDT are the problem, and banning DDT is the help.
t4b_s2	Set 3: Type your answer: At the end of a report, researchers list their ___.	**sources** (also accepted: the sources)	Listing sources shows readers where your facts came from.
t4c_s2	Set 3: Type your answer: Two steps: Giulia has 4 notes in the problem group, 5 in the help group, and 3 in the comeback group. She cuts 2 notes that do not answer the question. How many notes are left? (Type the number.)	**10** (also accepted: ten)	First add: 4 plus 5 plus 3 equals 12 notes. Then subtract: 12 minus 2 equals 10.

MATCH-UP ROUND (2 POINTS PER FIRST-TRY MATCH)

ID	Question	Answer	Why (explain to student)
match_s0_1	Set 1: Match Research	**looking for facts to answer a question**	2 points if matched on the first try.
match_s0_2	Set 1: Match Source	**a place where facts come from**	2 points if matched on the first try.
match_s0_3	Set 1: Match Note	**a short reminder of a fact**	2 points if matched on the first try.
match_s0_4	Set 1: Match Key words	**the most important words in a question**	2 points if matched on the first try.
match_s0_5	Set 1: Match Report	**writing that shares facts about a topic**	2 points if matched on the first try.
match_s1_1	Set 2: Match 1782	**America chose the eagle as its national symbol**	2 points if matched on the first try.
match_s1_2	Set 2: Match 1963	**only 417 nesting pairs were left**	2 points if matched on the first try.
match_s1_3	Set 2: Match 1972	**the United States banned DDT**	2 points if matched on the first try.
match_s1_4	Set 2: Match 2007	**removed from the endangered list**	2 points if matched on the first try.
match_s1_5	Set 2: Match 2024	**a law made it the national bird**	2 points if matched on the first try.
match_s2_1	Set 3: Match Only Source A	**DDT and thin eggshells**	2 points if matched on the first try.
match_s2_2	Set 3: Match Only Source B	**giant nests of sticks**	2 points if matched on the first try.
match_s2_3	Set 3: Match Both sources	**417 nesting pairs in 1963**	2 points if matched on the first try.
match_s2_4	Set 3: Match Problem group	**why eagles almost disappeared**	2 points if matched on the first try.

ID	Question	Answer	Why (explain to student)
match_s2_5	Set 3: Match Comeback group	**how eagles are doing now**	2 points if matched on the first try.

FIX THE SENTENCE (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
fx1_s0	Set 1: Fix the sentence. The first word and the name of a river need capital letters. the bald eagle lives near the mississippi river.	**The bald eagle lives near the Mississippi River.**	A sentence starts with a capital letter, and Mississippi River is the name of a river.
fx2_s0	Set 1: Fix the sentence. Fix the one grammar mistake. Bald eagles eats mostly fish.	**Bald eagles eat mostly fish.**	Eagles means more than one, so use eat, not eats.
fx1_s1	Set 2: Fix the sentence. Add commas to separate the things in the list. Bald eagles also eat ducks mice and snakes.	**Bald eagles also eat ducks, mice, and snakes.** (also accepted: Bald eagles also eat ducks, mice and snakes.)	Use commas to separate three or more things in a list.
fx2_s1	Set 2: Fix the sentence. Fix the one grammar mistake. It happened in the past. In 1972, the United States ban DDT.	**In 1972, the United States banned DDT.**	1972 is in the past, so use banned, not ban.
fx1_s2	Set 3: Fix the sentence. Names of people, a town, and a state need capital letters. giulia and gideon live in alton, illinois.	**Giulia and Gideon live in Alton, Illinois.**	Giulia and Gideon are names, Alton is a town, and Illinois is a state.
fx2_s2	Set 3: Fix the sentence. Fix the one mistake. When its means “belonging to it,” it has no apostrophe. The eagle built it’s nest in a tall tree.	**The eagle built its nest in a tall tree.**	It’s means it is. The nest belongs to the eagle, so use its with no apostrophe.

TYPE-IT CORRAL (4 POINTS EACH)

ID	Question	Answer	Why (explain to student)
ty1_s0	Set 1: Type your answer: Hundreds of bald eagles come to the rivers near Alton, Illinois, in the ___.	**winter** (also accepted: the winter)	They come every winter, from about late December to early March.
ty2_s0	Set 1: Type your answer: An adult bald eagle has a white head and a white ___.	**tail**	Source B says an adult has a white head, a white tail, a dark brown body, and a yellow beak.
ty3_s0	Set 1: Type your answer: Two steps: Gideon counted 14 eagles in the morning and 23 in the afternoon. But 8 of the afternoon eagles were ones he had already counted. How many different eagles did he see? (Type the number.)	**29** (also accepted: twenty-nine, twenty nine)	First add: 14 plus 23 equals 37. Then subtract the 8 he counted twice: 37 minus 8 equals 29.
ty1_s1	Set 2: Type your answer: America chose the bald eagle as its national symbol in ___. (Type the year.)	**1782**	Source A says, “In 1782, America chose the bald eagle as its national symbol.”
ty2_s1	Set 2: Type your answer: Bald eagles eat mostly ___.	**fish**	Source B says bald eagles eat mostly fish.

ID	Question	Answer	Why (explain to student)
ty3_s1	Set 2: Type your answer: Two steps: The library display has 3 shelves with 6 eagle books on each shelf. Kids check out 7 books. How many books are left on the shelves? (Type the number.)	**11** (also accepted: eleven)	First multiply: 3 times 6 equals 18 books. Then subtract: 18 minus 7 equals 11.
ty1_s2	Set 3: Type your answer: Only Source ___ tells what eagle nests are made of. (Type A or B.)	**b** (also accepted: source b)	Source B says bald eagles build giant nests of sticks.
ty2_s2	Set 3: Type your answer: The librarian who gives Giulia and Gideon their sources is Ms. ___.	**Goldie**	The librarian, Ms. Goldie, gives them two sources.
ty3_s2	Set 3: Type your answer: Two steps: Each day, Giulia writes 3 notes from Source A and 4 notes from Source B. How many notes does she write in 2 days? (Type the number.)	**14** (also accepted: fourteen)	First add: 3 plus 4 equals 7 notes each day. Then multiply: 7 times 2 equals 14.

BOSS BATTLE: RESEARCH SUMMIT (5 POINTS EACH)

ID	Question	Answer	Why (explain to student)
b1_s0	Set 1: Two steps: Which source tells about DDT, and what did DDT do to eagles? [Source A; it made eggshells thin and weak. / Source B; it made nests bigger. / Source A; it gave eagles white heads. / Source B; it helped more eggs hatch.]	**Source A; it made eggshells thin and weak.**	First find the source: only Source A tells about DDT. Then find the fact: it made eggshells thin and weak.
b2_s0	Set 1: Type your answer: In 2007, the bald eagle was removed from the list of endangered and ___ species.	**threatened**	Source A says it was removed from the list of endangered and threatened species.
b3_s0	Set 1: Find the mistake! Giulia's note says: "2007: eagles banned (A)." What went wrong? [DDT was banned, in 1972. In 2007, eagles were removed from the endangered list. / The year should be 1782. / The fact is from Source B. / Nothing went wrong.]	**DDT was banned, in 1972. In 2007, eagles were removed from the endangered list.**	A note must keep the facts true. Mixing up two facts changes the meaning.
b4_s0	Set 1: Type your answer: In 2024, a new law made the bald eagle the official national ___ of the United States.	**bird**	Source B says a 2024 law made the bald eagle the official national bird.
b1_s1	Set 2: Which sentence correctly tells WHO said what? [According to Source B, a nest can be up to 10 feet across. / According to Source B, the United States banned DDT in 1972. / According to Source A, young eagles are mostly brown. / According to Source A, eagles also eat mice.]	**According to Source B, a nest can be up to 10 feet across.**	Nest size is a Source B fact. DDT is a Source A fact, and the brown young eagles and the mice are Source B facts.
b2_s1	Set 2: Type your answer: In 1963, there were 417 nesting pairs. A pair is 2 eagles. How many nesting eagles is that? (Type the number.)	**834** (also accepted: eight hundred thirty-four, eight hundred thirty four)	Multiply: 417 times 2 equals 834 nesting eagles.

ID	Question	Answer	Why (explain to student)
b3_s1	Set 2: Which explanation is correct? Giulia says, “The fact about giant nests is interesting, but it does not answer our question, so we can skip it.” Gideon says, “The fact about giant nests belongs in our comeback group.” [Giulia is right, because nest size does not explain how the eagles came back / Gideon is right, because nests are big / Gideon is right, because every fact is about the comeback / Neither is right, because the sources have no nests]	**Giulia is right, because nest size does not explain how the eagles came back**	Always ask: Does this fact answer my question?
b4_s1	Set 2: Type your answer: In winter, eagles near Alton fish in the open water of the Mississippi and ___ Rivers.	**Illinois**	Source B says they gather along the Mississippi and Illinois Rivers near Alton.
b1_s2	Set 3: Which is the best CONCLUSION for the report? [Because people banned DDT and protected eagles by law, the bald eagle came back. / Eagles have yellow beaks. / I saw a bird once. / DDT is a chemical.]	**Because people banned DDT and protected eagles by law, the bald eagle came back.**	A conclusion sums up the answer to the research question.
b2_s2	Set 3: Type your answer: The lower 48 states means all of the states except Alaska and ___.	**Hawaii**	Source A says the lower 48 states are all of the states except Alaska and Hawaii.
b3_s2	Set 3: Find the mistake! Gideon writes, “Source A says there were 316,700 nesting pairs in 2019.” What went wrong? [Source A says about 316,700 eagles, not pairs. Source B says more than 71,000 nesting pairs. / The year should be 1963. / Source A has no numbers. / Nothing went wrong.]	**Source A says about 316,700 eagles, not pairs. Source B says more than 71,000 nesting pairs.**	Eagles and nesting pairs are different. Read numbers and their words carefully.
b4_s2	Set 3: Type your answer: A bald eagle’s wings can stretch more than ___ feet from tip to tip. (Type the number.)	**6** (also accepted: six)	Source B says its wings can stretch more than 6 feet from tip to tip.

Pre & Post sheet answer guide

Many items are open-ended. Grade for genuine understanding and complete sentences, not exact wording. Sheet: grade3/prepost/KCE_Reading_PrePost_G3W29.pdf.

PRE-LESSON WARM-UP

#	Prompt	Model answer / grading note
1	Review: one sentence comparing how Gael acts, using but	Model: In Book 1 Gael rushes ahead, but in Book 2 he waits patiently.
2	What do you already know about bald eagles?	Answers vary. Accept any true fact (for example: a bald eagle has a white head).
3	One question you would like to research about an animal	Answers vary. Look for a real question that facts can answer, ending with a question mark.
4	Circle the places where a researcher can find facts	(a) a library book, (c) a fact card and (d) a magazine article. Not (b) a guess.

#	Prompt	Model answer / grading note
5	Draw a bald eagle and label one part	Drawings vary. Check that one part is labeled (head, tail, wings or beak).

POST-LESSON CHALLENGE

#	Prompt	Model answer / grading note
1	Note for: A nest can be up to 10 feet across and weigh up to 2,000 pounds	Model: nest up to 10 ft across, up to 2,000 lb (B). Short, in the student's own words, with both numbers exact and the letter B.
2	Gideon's note: 1972: eagles removed from the endangered list (B)	The year is wrong: eagles were removed from the endangered list in 2007 (1972 is when DDT was banned). The source is wrong: that fact is in Source A, not Source B.
3	12 facts in Source A and 15 in Source B; only 9 answered her question	Step 1: 12 + 15 = 27 facts. Step 2: 27 − 9 = 18 facts skipped.
4	Short report: How did the bald eagle make a comeback?	Answers vary. Check for a topic sentence, two facts that each name the source (for example: According to Source A, the United States banned DDT in 1972; according to Source B, by 2019 there were more than 71,000 nesting pairs), and a conclusion.

★ CHALLENGE

#	Prompt	Model answer / grading note
1	One fact in BOTH sources; why that makes you more sure	In 1963, only 417 nesting pairs were left (or: laws still protect eagles today). Two sources that agree make a fact more trustworthy.
